

9th Annual Limousin
& Lim-Flex Bull Sale

MARCH 23 • 5 p.m.

Kist Livestock Auction • Mandan, ND

HAGER **HCE** CATTLE
COMPANY

HAGER HCC CATTLE COMPANY

Welcome to our 9th Annual Hager Cattle Co. Bull Sale. We invite you to Kist Livestock March 23 in Mandan, North Dakota, at 5 p.m. central standard time. This year we are offering 90 Purebred and Lim-Flex bulls, highlighted by the 2015 National Western Stock Show Lim-Flex and Limousin Pen of bulls.

An additional sale highlight this year will be 17 direct sons of our leading donor, LVLS 9066U, by leading Limousin and Angus sires including AHCC WestWind, S A V Resource and S A V Angus Valley

In the offering you will find an exceptional blend of calving-ease, performance and mainstream carcass-oriented bulls in the form of yearlings, 18-month-olds and two-year-olds. In the interest of full disclosure, we would like to point out that the birth weights on the bulls offered this year are slightly higher than in year's past. We attribute this to a much colder year and having to feed the cows harder.

As always, the bulls have been semen tested and ultrasounded, and come with a first breeding season guarantee. If a bull should go down during the breeding season, please don't hesitate to call.

As the cattle industry continues to set records, we are fortunate to all be beneficiaries of this cycle. The need for high-growth, performance-oriented cattle with the ability to grade has never been greater. We've tirelessly bred for bulls with the ability to sire calves that meet these market-topping demands.

We have made it our primary objective to serve the needs of commercial cattlemen while striving to produce a mainstream acceptable product. We have focused on propagating high-growth, performance cattle, while focusing on calving-ease and the maternal aspects of the business. We strive to maintain the thickness Limousin cattle are known for, while adding rib shape, fleshing ability and carcass characteristics conducive to mainstream Choice markets. We feel we've been able to achieve these goals in the set of bulls we are offering for your appraisal.

Please take note, all of our bulls are individually videoed and available for viewing on our website www.HagerCattleCompany.com. Absentee buyers may contact any member of our sale team or use our online-bidding provider www.dvauction.com. In addition, all of the bulls will be available for viewing at the ranch anytime up until March 21, and at Kist Livestock March 22 and 23.

We invite you to join us Monday, March 23 at 5:00 p.m., and we welcome any feedback you may have on how we may better serve you. For more information on the bulls, contact the ranch or any sale affiliate listed in the catalog. Thank you for your interest. We look forward to seeing you sale day.

Sincerely,
Austin & Leah Hager
Hager Cattle Company

HAGER CATTLE CO.

9th Annual Limousin & Lim-Flex Bull Sale

Things You Should Know...

TIME AND LOCATION:

Monday, March 23, 2015 • 5:00 p.m. CST
Kist Livestock • Mandan, North Dakota

SALE-DAY PHONES:

Austin Hager(701) 626-2345
Kist Livestock.....(800) 732-1163

SPECIAL GUESTS:

Kiley McKinna, MC Marketing(402) 350-3447
Mark Smith, Grassroots Genetics & Consulting.....(515) 229-5227
Weston Geppert, *Limousin World*.....(605) 433-1387
Kirby Goettsch, Farm & Ranch Guide.....(605) 380-3939
Kris Peterson, Cattle Business Weekly.....(701) 339-0305
Jason Frey, Western Ag Reporter.....(701) 300-0845
Frank Padilla, NALF Director of Marketing(308) 350-3323

AUCTIONEER:

Chisum Peterson.....(605) 730-4214

ACCOMMODATIONS:

A block of rooms will be reserved under Hager Cattle Company until March 13. The block is available March 22-24.

Bismarck Ramada Hotel (formally Doublewood Inn)
1400 E Interchange Ave., Bismarck, ND 58501
(Exit 159 off of I-94)
(701) 258-7000

Food and Refreshments will be served at the sale.

ADDITIONAL INFORMATION:

Videos, Yearling Weights, Scrotal Measurements and Ultrasound Data will be available March 15.

If you wish to purchase Livestock Insurance on your bulls or to purchase semen from HCC sires, please contact Mark Smith of Grassroots Genetics and Consulting, (515) 229-5227

TERMS:

Terms of the sale are cash unless prior credit arrangements are made between buyer and seller. Settlements are to be made immediately after the conclusion of the auction.

SALE MANAGEMENT:

(405) 350-3447
mcmarketingsales@aol.com
www.mcmarketingmanagement.com

HEALTH:

Inforce 3, Calf Guard, Bovi-Shield Gold, 7-way, Sommus, Dectomax Injectable, Ivermectin

GUARANTEE:

All bulls are semen tested and guaranteed to be breeders. Scrotal measurements will be available March 15.

LIABILITY:

Each animal will be the buyer's risk as soon as sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither owner nor sales management can be responsible for accidents, but every effort will be made to provide for the safety and comfort of those attending the sale.

TRANSPORTATION:

SELLING 90

Limousin & Lim-Flex Bulls

73 Yearlings • 11 Fall Yearlings

6 Two-Year-Olds

HAGER H&C CATTLE COMPANY

Performance EPDs—

- CED EPD:** Stands for Calving-Ease Direct and is important when choosing sires to produce calves born easily. The higher the number, the better.
- BW EPD:** Express the difference in birth weight on the progeny of the bulls being compared.
- WW EPD:** Express the difference in pounds at 205 days on the progeny of the bulls being compared.
- YW EPD:** Do the same as WW, except it is the weight at 365 days.
- MA EPD:** Predict differences in weaning weights from daughter's calves due to genes inherited for milk.
- GEM EPD:** Stand for Calving-Ease Maternal and is important for choosing sires that produce replacement females that give birth to their first calf easily. The higher the number, the better.
- SC EPD:** Are expressed in centimeters of scrotal circumference, and compare the difference expected in sons of the animal. Scrotal EPDs are a good indicator of age of puberty of both sons and daughters of the animal.

Carcass EPDs—

- CW EPD:** Express the difference in pounds of carcass weight.
- REA EPD:** Express the difference in square inches of rib eye area.
- YG EPD:** Indicate genetic differences for yield grade and cutability of offspring.
- Fat EPD:** Express the difference in inches of back fat.
- MS EPD:** Express the difference in the amount of marbling or flecks of fat in the rib eye.
- \$MTI:** Dollar Value Indexes are used to rank animals according to net genetic merit for profit from genetics for post-weaning growth and carcass performance.

This information should help you analyze and sort the bulls to fit your specific needs. We realize this is a lot of data to use, so please ask us if you need further assistance.

UNDERSTANDING THE NEW LIMOUSIN EPDS

The Spring 2015 North American Limousin Foundation EPDs have greater predictability from the benefit of an international multi-breed genetic evaluation.

What are the advantages of changing to a multi-breed genetic evaluation?

- The Limousin evaluations (EPDs) are directly comparable to Red Angus, Simmental and Gelbvieh, among other breeds, making selection decisions easier for commercial producers.
- The carcass trait EPDs are more conservative, but consequently, will be more accurate in the long run.
- A contemporary group realignment into larger groups contributes to higher accuracy EPDs.
- Embryo calves are no longer taken for account in the growth traits, but carcass data will be included.

Across Breed Comparisons for 2013-2014 US Born Non-Parents on Common Base

AHCC 907B Selling 2/3 Semen Interest and Full Possession. Lead bull in our Denver Pen. This could quite possibly be the best purebred bull we've ever raised and he drew an enormous amount of attention to our pen. Countless astute cattlemen from around the country were drawn to this bull for his shear power, mass, and substance. Phenotypically it is hard to make one much better. He is sound, heavy-structured, wide-topped, big-bodied, deep-muscled and massive anyway you study him; not to mention he is early maturing and possess a large scrotal measurement. Study his growth on paper and you will see, he is an elite growth bull ranking in the upper 2%, and individually speaking, he's overloaded the scale at weaning, with an impress 840-lb. 205-day weight (109 ratio). Don't miss this opportunity March 23 to invest in a truly elite performance bull, who combines genetic predictability, natural performance, and huge numerical growth advantages.

Selling 2/3 Semen Interest and Full Possession. Member of our Denver pen, 908B anchored this group of flushmates and for good reason. He had the attention and admiration for his type and kind by some of the most discriminating cattlemen in America that walked into our display pen. He is the youngest of his flushmates and posted the most performance. He recorded an actual weaning weight of 850 lbs. He is a large, outlined bull with extra frame and power. He exhibits the most extension through his front end and ties into the tightest shoulder among his flushmates. Through the center portion of his body he maybe the deepest, easiest fleshing, loosest flanked bull of the group. When set in motion he sets down on a good size foot and most relaxed pasterns of his siblings. His dam 9066U has elevated or genetic pool to new heights, with her genetic influence on 32 progeny born on our ranch in 2014. For a performance bull that will put a little more look, style, softness and doability into a set of calves, here's the sire for you.

Selling 2/3 Interest and Full Possession. Seedstock producers take notice. Sired by the legendary AHCC WestWind, 901B is a front-pasture sire who has the genetic ability to sire heavy-muscled, naturally thick, performance cattle. He ranks in the upper 10% for WW and 3% for YW. He is complete as evidenced by his many admirers in Denver for his natural thickness, muscle shape, width of top and overall balance. He is long-sided, deep-bodied and exhibits a large scrotal size and an early age. His dam, LVLS 9066U, needs no introduction. She has 17 sons in this year's sale, and is currently the most influential donor on our ranch. Buy with confidence, this bull has the genetics and numbers to back it up.

Alternate member to our purebred Denver pen of three. 966B is the natural calf to 9066U who comes to you in an outcross genetic package. He is a complete, well-balanced bull with extra length of body, smooth shoulder and a level top and hip. On paper he supports respectable numbers ranking in the upper 30% for growth traits and posted an impressive 806-lb. Adj. 205- (104 ratio). If you're looking to add a bull from a proven cow family that adds a different genetic twist to your breeding program, look for him March 23.

Selling 2/3 Semen Interest and Full Possession. Lead bull in our division-winning pen of Lim-Flex bulls at the NWSS. 912B is a bull who garnered the attention of many respected cattlemen in Denver for his flawless style, balance, and structural integrity that the most discriminating cattlemen observed when they set their eyes on this genetic masterpiece. On paper, he ranks at or above breed average for seven economically relevant traits. His flushmate sister was selected by Magness Land & Cattle for their pick of the AHCC Lim-Flex heifer calves, a high-selling lot on last year's sale. His dam, LVLS 9066U, has gathered the attention and respect of fellow cattlemen, around the country, she has made more genetic progress and generated more revenue than any other female walking the pastures at Hager Cattle Company. We could write a book on the genetic and phenotypic strides this cow has made for us, and it is evident in her progeny represented in this offering. If you're in the market for a Lim-Flex bull that can put some appeal, style and balance into a set of calves, buy with confidence.

Selling 2/3 Semen Interest and Full Possession. Member Of our 2015 Division Champion Lim-Flex pen. This 50% Lim-Flex has a ton of good to offer the beef cattle industry. He has the look and attitude of a great herd bull. 911B is moderate-made, with a tight shoulder and small head. He is deep throughout, from his fore rib to his flank, and when viewed from behind he has an abundance of natural thickness and rib shape. He offers up just as much numerically, breed rankings CED, WW 10%; YW 15%; CEM 5%; Marb and \$MTI 25%. 911B had impressive individual stats at weaning pushing the scale down to 809 lbs. (107). He scanned great for both REA and Marbling, and we feel has a tremendous amount of potential to sire front-pasture females and bulls with excellent carcass attributes. If you're looking to invest in a bull, one we plan on using AI, who covers all the bases, then don't miss this genetic opportunity.

Alternate member to our 2015 Denver Lim-Flex pen. The only 75% Y-Axis x 9066U, Lim-Flex bull to sell, and he is impressive in terms of sheer mass, depth, width of body. He is equally as stunning on paper. Modest 0.8 BW EPD. And the number 1 WW EPD bull in the entire offering for both Lim-Flex and Purebred bulls, combined with a 92, which ranks in the top 1%. He also smashed the scale down at weaning with a 938-lb. Adj. 205 (124 ratio). He ranks among the breed elite for YW of 118, 42 CW, and .78 REA which ranks in the top 10% for these industry relevant traits, Milk 40%. Not only does this bull get it done on paper, he also has the individual performance stats to back it up, as he was also the number one Adj. WW bull of the bull calf crop. Raw power, performance and production best describe this numeric monster. Be ringside sale day to add him to your herd bull arsenal.

A tremendous red, calving-ease prospect by our senior herd sire, Unheard Of. He combines great individual performance. 72-lb. BW (96) and a whopping 750-lb. WW (107) by a first-time heifer. On paper he ranks in the upper 10% for CED and BW EPDs and upper 10% for Marbling and 15% for \$MTI. Visually he combines a smooth, tight shoulder into and ultra-deep rib cage and shows plenty of natural shape and thickness making him a calving-ease bull with real performance.

The number one weaning weight bull out of the first-calf heifers. AHCC 225B smashed the scales down at a whopping 833 lbs. (119 ratio). If performance is what you're after, here he is. Above average growth EPDS, along with a MA EPD of 31, ranking in the upper 10% of the breed. Couple that performance with an REA EPD of 0.68, ranking in the 20%, and he has performance written all over him. He is a power bull, large-framed, long skeletal and a big middle. He is the type and kind that will sire performance cattle.

This bull exemplifies the type we love to use on our commercial cows. He is as complete as you can make one. Moderate, sound-structured, and thick and deep. His numbers are equally as impressive, negative birth, above average growth, maternal, and marbling, and ranks in the upper 20% for \$MTI. Combine that with great individual performance—a 69-lb. birth weight and 744-lb. weaning weight (106). Raised by a first-calf heifer, he should work great on heifers and sire cattle that grow and grade.

Performance enthusiast take notice. EBFL Ypsilanti is a bull you will be hearing more about. He sires light to modest birth weight cattle with above average for growth. It is evident here as AHCC 229B weighed 70-lbs. at birth and posted a 792-lb. WW (113). A calving-ease bull with performance. Below breed average for birth and above average for grow and REA EPDS (upper 10%) and it's obvious when you study him. Big-topped, following through into a powerful hind quarter, this bull puts it all together.

Selling 2/3 Interest and Full Possession. Out of a first-calf heifer, 206B is a tremendous herd-sire prospect. We love his numerical combination of BW, WW and REA. He may be the most complete bull of the first-calf heifers this year. He is smooth through his shoulder, long-sided, and clean in his lines. From behind, he is super thick, explosive through his center portion with extra width, base, shape and ties this together into a well-balanced package. We think this bull will work great on our yearling Lim-Flex replacement heifers and plan to AI back to him.

A great performance bull by Grand Slam, one of the more noted AHCC WestWind sons in the country and for good reason. The Grand Slam calves appear to offer the same growth and power as WestWinds, but come in a softer, deeper-made package. 905B is stout, big-bodied, loose-hided, has good substance of bone, and stands on a big foot. He stacks up just as well on paper as he ranks in the 20% percentile for WW and YW. For a performance bull with a little different pedigree twist and one more generation further removed from WestWind, look 905B over sale day.

27 AHCC NORTHLANDER 147B

For a higher percentage Lim-Flex bull with added thickness, muscle shape, depth of body and fleshing ability, here he is. 044B is a 75% bull who represents the kind of performance cattle we strive to produce. Not to mention, he is backed by the "44" cow family, the same cow family that produced AHCC WestWind W544, and has produced so many functional, practical progeny for HCC over the last 20 years.

Longevity is a trait that is often over looked in the beef cattle industry, and I don't know if there is one that is more important to a commercial rancher. 8512M, the dam to this bull, is still producing sale highlights at 13 years of age, and has another great bull in 85B. He is smooth through his shoulder, long-spined, and bold sprung, combined with plenty of shape and thickness. He combines this into a complete package.

This bull has a great genetic combination. We had 13 calves of this flush born in 2014 and really like the Angus Valley-sired cattle for their depth, fleshing ability, natural thickness and structural integrity. These Lim-Flex ET calves, were out of big Simmental-cross commercial cows, which may add more birth weight, but they came easily and he is a bull we would breed virgin heifers to buy with confidence.

AHCC 685B is what we strive to produce for our commercial bull buyers. Light BW combined with explosive growth, this bull weaned off at 917 lbs. (122). This 5/8 Lim-Flex possesses as much muscle mass, shape, natural thickness and Limousin breed character as any purebred bull you'll find, plus he adds rib shape, body depth and fleshing ability. He stacks an extremely useful set of numbers. Top 30% for CED and 15% MA, Marb and \$MTI. To increase performance and add quality grade to a set of feeders, don't pass up B685 sale day.

Phenotypically speaking, I think this may be one of the most complete bulls in the sale. He is eye-catching and sound from the ground up with great feet and legs, a smooth shoulder, depth of body, base width and shape, and thickness. Plus, he is soft-made and easy-doing. Great spread on individual performance of 78 lbs. to 921 lbs.

This complete-made bull by AHCC 695Z is moderate, long-sided and exhibits real breed character with his natural thickness and shape. His dam is a model Limousin cow that is easy-doing, moderate, bold in her rib shape and naturally thick with a near-perfect udder that milks heavy. 564B ranks in the upper 25% for growth and 35% for MA. He recorded a low 80-lb. BW and an actual WW of 655 lbs. at just 154 days of age, therefore to young to adjust to an adjusted 205-day weight.

Here is a really nice, modest birth weight bull by MAGS Ur A Robin. He is moderate-made, deep-sided and thick from fore to rear. With four calving-ease sires in the first two generations of his pedigree, he could possibly be used on heifers. He posted an actual WW of 580 lbs. at just 151 days of age, therefore he was too young to adjust to his 205-day weaning weight.

NORTH AMERICAN LIMOUSIN FOUNDATION (NALF) SUGGESTED SALE TERMS & CONDITIONS

IDENTIFICATION OF ANIMALS: (1.) Each animal sold will have a readable tattoo corresponding to its registration paper. (2.) Seller agrees to check all tattoos for accuracy prior to the sale. The buyer has the responsibility for rechecking the tattoos after taking possession and reporting any discrepancies to the seller immediately. (3.) All animals to be sold will be identified by their official registration numbers, their tattoos and their registered names. If nicknames are used, they should be in addition to the other information. (4.) The NALF Board of Directors recommends that, when any animal is sold, there is complete disclosure of any retained genetics in the form of pregnant recipients, frozen embryos or frozen semen. (5.) The prefix in an animal's registration name cannot be removed or changed by subsequent owners. Owners other than the original applicant cannot add a two-, three- or four-letter prefix to the name of the animal unless it matches the prefix in the animal's tattoo.

REGISTRATION CERTIFICATES: (1.) The seller of the animal will submit the original registration certificate with transfer information or an application for registration with transfer information on it so that a certificate can be produced by NALF and transferred to the new buyer. The seller must sign the back of the certificate on the application to authorize the transfer. (2.) It is the responsibility of the seller to provide NALF with the buyer's complete name, address and membership number (if available) so the transfer can be completed. It is important that the membership number be given if the buyer is already a member of NALF. (3.) It is the seller's responsibility to provide the registration certificate or application and transfer information to NALF within 60 days following the date of sale and pay transfer and registration fees.

TERMS: Terms of all sales are considered to be cash unless credit arrangements have been made prior to the sale between the buyer and the seller.

HEALTH: (1.) On all animals sold, health tests will be announced at the sale or printed in the sale catalog. It is understood that health papers reflect the condition of the animal at the time of the sale, but carry no further guarantee as to the future health of the animal. (2.) Buyers having special health requests or who wish to take cattle into states with specific and rigid health regulations should inquire specifically about the health tests required for entry into their state prior to the sale. (3.) All females sold are considered to be calfhood vaccinated for brucellosis, unless they are otherwise stated in the catalog or announced from the block. It is suggested that verification of vaccination be written on the health certificate.

PURCHASER'S RISK: (1.) Each animal becomes the risk of the purchaser as soon as it is sold. (2.) It is the responsibility of the buyers to see that their purchases are fed and cared for following the sale. (3.) It is the responsibility of the buyers to arrange all trucking for their purchases.

ANNOUNCEMENTS: (1.) Any change from the information that is printed in the catalog will be announced through the auction block. (2.) All announcements made from the auction block take precedence over the printed catalog. (3.) Cataloged lots not selling will be announced prior to the sale or printed on a current supplement sheet.

BREEDING GUARANTEE: (1.) All animals are guaranteed to be breeders with the exception of (a) calves under 12 months of age; (b) in the event of any injury or disease that occurs to the calf after sale; (c) gross negligence or willful misconduct on the part of the purchaser; or (d) females used in embryo transplant/transfer (ET). (2.) A lactating cow with calf at side, sold as one unit, is a proven breeder, as indicated by the calf at side. (3.) Bulls are guaranteed to be breeders at the time of sale or at 14 months of age if they are younger than 14 months at time of sale. Any bull that either settles cows by natural service or passes a fertility test made by a competent veterinarian is considered fertile. Any guarantee with respect to the ability to freeze semen shall be a separate agreement between buyer and seller. (4.) Females sold as safe-in-calf have been examined by a competent veterinarian or other reproductive technician and are so guaranteed to be with calf. It is the buyer's responsibility to pregnancy-check all females and report any discrepancies within 30 days following the sale. (5.) Any guarantee with respect to ET production shall be a separate agreement between buyer and seller.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT: (1.) All claims for adjustments or refunds must be made in writing either within six months of the date of the sale or no later than six months after the animal reaches 18 months of age, whichever occurs later. (2.) In the event that an animal is claimed to be a non-breeder, the animal must be returned to the farm of the seller in good condition and must have met the health requirements of the original seller's state. The seller shall be entitled to six-month trial following the return of the animal in which to prove that the animal is a breeder. If, at the end of six months, the seller has been unable to prove the animal as a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the total purchase price. The return of the purchase price shall in all cases be deemed as full settlement. (3.) Any expense incurred in transporting the animal that is claimed to be a non-breeder shall be the responsibility of the purchaser except that the seller shall be responsible for transportation costs in the excess of the distance between the purchaser's farm and the location of the sale. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expenses incurred for transportation. (4.)

It is the obligation of the buyer and seller to negotiate any settlements on cattle that have not been properly represented at a sale. The selling of an animal constitutes a contract between buyer and seller, and it is not the responsibility nor the right of NALF or of the sale-management firm to settle disagreements between buyers and sellers of cattle that have not been properly represented. The return of an animal at the expense of the purchaser with a refund of the purchase price made by the seller is in all cases considered a complete settlement. Other settlements, which are negotiated between buyer and seller, may be equitable to cover instances in which cattle are not as represented sale day, but that does not warrant complete return of the animal.

BLOOD-TYPING FOR PARENTAGE VERIFICATION: (1.) If, at some time, the purchaser raises a question as to the accurate parentage of an animal he has purchased, it may be settled by blood-typing. Blood samples will be taken by a licensed veterinarian of the animal in question and of its sire and dam if they are not currently on file. The verification of the parentage test will be made by NALF's approved laboratory (MMI Genomics). The results of these tests will be sent directly to NALF and will be sent on to both the purchaser and the seller so they will be aware of the official results. (2.) If the blood tests indicate that the animal is not as it was registered originally, the seller will reimburse the buyer for the test and will refund the total purchase price of the animal or replace the animal with another of equal quality and value as determined by the purchaser. (3.) It is important to remember that blood-typing is not 100 percent exclusive and that it simply identifies animals that will qualify as the parents or animals that cannot be the parents. (4.) All bulls born after December 31, 1990, that are to be used for artificial insemination (AI) must be parent-verified by blood-typing (both the sire and dam). All females born after July 1, 1987, that are to be used for ET and all bulls born between July 1, 1987, and December 31, 1990, that are to be used for AI must be sire-verified through blood-typing. All females born prior to July 1, 1987, that are to be used for ET and all bulls born prior to July 1, 1987, that are to be used for AI must have an identification blood type on file.

HORNED/SCURRED/POLLED DEFINITIONS: (1.) HORNED. An animal with a horn growth affixed to the skull that has or has not been removed. (2.) POLLED/SCURRED. An animal with rudimentary horn growth that will not develop into a horn. The rudimentary horn growth may or may not become affixed to the skull at an older age. (3.) POLLED. An animal with absence of horn growth. (An animal can have scurs and still be genetically polled.) (4.) SMOOTH POLLED. A smooth-polled individual has no scurs and does not develop scurs later in life.

GUARANTEES: (1.) If an animal is sold as polled or polled/scurred and proves to be horned, the seller shall be obligated to refund the purchase price upon return of the animal to the farm of the seller at the expense of the seller or may be exchanged for a polled animal of equal value, whichever is acceptable to the buyer. The buyer has 30 days from date of sale to notify the seller that an adjustment is in order. (2.) If an animal is sold as smooth-polled and proves to be scurred, the seller shall be obligated to refund the price upon return of the animal to the farm of the seller at the expense of the seller or, at the buyer's option, shall be exchanged for a smooth-polled animal of equal value. (3.) If an animal is sold as polled and develops scurs, the seller will not be obligated to make any adjustment because a scurred animal is considered polled. (4.) If an animal is sold as polled and has scurs, it shall be announced at the time of sale that the animal has scurs. If it is not announced and the buyer finds before the animal leaves the sale premises that the animal has scurs, the buyer must notify the seller of the findings. The seller shall then be obligated to refund the purchase price.

DISCLOSURE OF RETAINED GENETICS: Because the sale of a registered Limousin animal constitutes the transfer of ownership of all, or a portion of, a "genetic package," it is the seller's responsibility to inform potential buyers of all retained genetics of animals in circumstances where potential exists for buyers to be misled. This includes, but is not limited to, semen collected and frozen prior to sale, embryos flushed, existing clones as either live animals or embryos, and cows carrying the service of an offered bull.

DISCLOSURE OF TESTS RESULTS FOR KNOWN GENETIC DEFECTS AND FACTORS: (1.) The seller shall have an affirmative duty to notify the buyer of any test results for genetic defects or genetic factors not otherwise reflected on an animal's pedigree. (2.) Nothing contained herein should be construed to relieve the parties from complying fully with the rules and policies of NALF relating to genetic defects generally or individually.

LIMITATIONS OF OBLIGATIONS: (1.) If these suggested terms and conditions are adopted, they should constitute a contract between the buyer and seller for each animal sold under these terms, as such; and it should be binding upon both parties. Animals resold following purchase in a sale shall constitute a separate transaction, and the privileges and obligations of the original two parties connected thereto are not covered by the terms and conditions of sale. (2.) NALF, its directors and employees are not in any way responsible or liable for enforcing the suggested terms and conditions of any agreement involving transactions between buyers and sellers.
