Dear Limousin Friends,

My how times flies as we approach the hosting of our 10th annual "Proof Of Progress" production sale. As we celebrate 23 years in the registered Limousin business we realize that the friendships and fellow breeders that we have met over those years mean the most to us.

We are quick to realize that the people that make up the team at P Bar S Ranch are just as valuable as the cattle. We are proud to have Elgin Elmore as general manager along with his very able crew of Derik Frazier, Jud Koziol and Roy Selsors.

THE Little Ranch with BIG Genetics was designed to be a source for some of the finest registered seed stock in the business. We want and desire for each and every client that purchases a PBRs bred animal to appreciate the many years and resources that we have put into the product so they will go into the new buyers herd and enhance their programs in the very best way possible.

We are in hopes that as you view this catalog you will appreciate the sale offering as much as we do.

This year's sale offering includes the best from our Limousin, Lim-Flex, Angus and Red Angus herds.

Sincerely,

Paul Sisemore  
P Bar S Ranch

RLBH Days Of Thunder is our most recent purchase designed to enhance the P Bar S herd sire battery. He has truly grown into something very special and we felt this 62% Lim-Flex beef bull could be a breeding piece in the P Bar S Ranch program and offer a very positive influence. He is extremely big footed, very soft and sound in his movement and stands very structurally correct. The big attribute of this bull is the amount of muscle and thickness that he can bring to the strong selection of lower percentage Lim-Flex and purebred Angus females that our in our program and in the breed. His sire is the breed popular EF Xcessive Force and her dam is a daughter of the once national top selling bull EXLR New Generation 071M. RLBH Days Of Thunders full brother is RLBH Air Force One that has taken the breed in a very positive direction.

// RLBH Days of Thunder

RLBH Air Force, a full brother to RLBH Days of Thunder.

The most popular A.I. sire in the Limousin business right now is RLBH Air Force One. He sired more champions at the recent National Junior Heifer Show and All American Futurity Show than any other sire. He himself had amazing chow accomplishments such as ...

- 2013 NAILE Grand Champion
- 2014 SESC Grand Champion
- 2014 NAILE Grand Champion
- 2015 National Limousin Sale top selling bull
- 2013 Denver National Western Grand Champion
- 2014 All American Futurity Grand Champion
- 2015 Denver National Western Division Champion

He is currently owned by Council Family Limousin, Madisonville, TX

EF Up To The Challenge has been an amazing addition to the P Bar S Donor line-up, her success for Rachel Booth in the showing and as the dam of RLBH Apple Pie was just the beginning of what she is going to accomplish in this breed. Very rarely does a bull that is double digits CED, negative BW carry the lineage of a previous competitive show heifer as well as have the design that 724E does. Homozygous polled and homozygous black, this herd sire prospect offers a tremendous future servicing cows as well as selling semen. The breed is hungry for good Purebred bulls that check off all the boxes like 724E does.

EF Up to the Challenge,  
 sire of Lot 1.

A maternal sister to the lot 1 herd sire prospect, 724E is this standout show heifer prospect, PBRS Destiny's Cruze. 6251D falls into that Sr heifer calf division and should definitely be a contender simply based on her power and shape alone. Study this female out of her hip and at the ground and there are very few that are constructed like she is. With a sire and dam that are known for stamping out good ones, this is a female that I would add to the must have list for this fall. Then you add her calving ease data profile on top of her stunning good looks and the fact that she is homo/home, you suddenly have one of the finest every generated in the P Bar S Program.

PBRS 79E is everything you could ask for in a donor prospect. ADLL 5125C was P Bar S's premier selection out of the fall 2016 Linhart Limousin Sale. This standout MAGS Aviator daughter is exceptional in her design and futuristic look. Her epd set is ahead of the times as well, she masterfully calculates a jump from a 12 CED to 11 YW on her genomically enhanced profile.

We talk about females that do it all, well here is one that does it all plus some! 7101E is homozygous polled/homozygous black and has the genetic make-up to become one of the great ones. This direct daughter of MAGS Aviator is identical to him in terms of her lines and power. She is equally as athletic as well. When you pull up the data on this one, you aren't going to be disappointed, she has breed changing spread from CED to YW and is in the top 15% of the breed for MB and \$MTI. There is a lot to be said about finding the right one to build your program around, why not start with one that doesn't have any strikes against her?

SLKF Sister Act was campaigned by truly one of the best junior families in the Limousin breed. Peyton Haley stood in the backdrop numerous times as the lead of Sister Act inside the breed and head to head with other breeds. As a donor this female has surpassed our expectations and is producing tremendous replacements just like this special lot. 6296D is a direct daughter of the All-American Futurity Champion, AUTO Lucky Strike. Truly a special opportunity to add a premium individual to you program.

This is the blending of the best in two breeds and the creation of an exciting Lim-Flex product. Sired by Six Mile Taurus 519A one of the only bulls in the Red Angus breed to win the grand champion bull honors at the Denver National Western Show and then come back as a 2 year old and win the show again. That truly says something about a bull and how well he has been received. He has been mated to the purebred female and new donor at P Bar S Ranch, ARWL Watermelon 9000W. Her dam is the Ashley Rae Wellman bred female that carries the MINE prefix that is synonymous with functional cattle.

# Selling Choice of 2 embryo heifer calves

It is no secret that we look at a lot of cattle, sort through a lot of stock for sales and write a lot of footnotes. We enjoy the quality that we witness day in and day out, but this lot right here gets our heart pumping and makes us truly excited about the future of the Lim-Flex breed. We are proud to own one of the most popular National Champion Females to date, Carrouels Pina Colada. She has proven over time that she is a major force in production.

Colburn Primo is stamping his progeny nationwide within the Angus breed and the hybrid sector. If you are interested in the future and diving into Lim-Flex show cattle head first, this is the one to do it on.

Colburn Primo 5153

The Primrose cow family is one of the very finest in the Red Angus breed, they are known the world over for their ability to balance performance and phenotype. This high growth female is in the top 20% of WW, YW, CW and REA. This profit driven performance profile is complemented by a beautifully designed skelton and outline. Ladies Night is a high quality individual that has a neat sweep to her underline, is long and level out of her hip and is maternally constructed through her front one third. As a young February calf, we cannot believe the signs of greatness that this one is already exhibiting, both as a show heifer prospect and as a foundation donor female.

717 is a bit out an outlier in terms of her type and kind, we feel that the muscle, foot and bone that this female can add to a breeding scenario is truly unique. You evaluate this one at the ground and she steps down on an extraordinary foot and durable bonework. When you view her down her top and out her hip, there is a ton of muscle working in her. She will complement a sharp lined, birthweight sire right out the gate for her first breeding. As a Six Mile Taurus daughter she is destined for success and marketability.

PBRS Diamond is a bright, shining result in our Red Angus breeding program, who we are particularly proud of. Sire by Silveira's Mission Nexus, who was the top selling Red Angus bull for Origen in 2014, 2015 and 2016. Holding that record for three years is truly a honor achieved by one the great ones in their respective breeds. Nexus has passed on his beef type and functional make-up to his progeny on a consistent basis. She traces back heavily to the great Northline program, which adds extra piece of mind and predictability.

ENGD Cover Girl was our selection out of Englewood Farms Top Shelf Online Sale that was held during Louisville several years ago. That was an exceptional offering and we were excited when we were able to introduce this female in our program. We were particularly attracted to her athleticism and the brood cow look she displayed even as a young female. Her daughter PBRS Zennia 798 has the same exact qualities, we could be more pleased with her. Soft middled, easy fleshing and has "cow" written all over her. Sired by Six Mile Taurus, the Denver Champion who is one of the premium breeding option in the Red Angus genetic pool.

If you are searching for one that screams "look at me" than here she is! PBRS Machesa 745 is as striking as they come and has that exclusively high neck should juncture that is in such high demand in today's showing. She has a phenomenal shape to her rib, both upper and lower. She is deep from flank to flank and easily covers her step when you put her in motion. This one need a halter put on her and campaigned by a junior who is looking for a heifer to take to Expo next summer.

KCC Pinnacle has been as consistent in terms of producing low birthweight, calving ease cattle as an Red Angus bull in recent history. The neat thing about the Pinnacle heifer, like PBRS Cartier 723 is that the hit the ground running and they never slow down in terms of gain and performance. This February heifer is ultra long sided, flexible in her joints and long hipped.

When we opted to sell several elite Red Angus this year, we sat down as a team and decided to sell only the very best. Prada is a prime example. The Firefly cow family is synonymous with quality in the Red Angus breed for generations, their combination of power and eye appeal is known throughout the industry. When you evaluate the PBRS Prada 750 you will notice that she balances up with the best of them and her pattern reads with tremendous functionality. In terms of carcass traits, she is particularly balanced across the board in a very unique data set.

P.E. 12.28.16 to 4.3.17 to AUTO Lucky Strike 118B.  
Out of the Deuce son, DJ Xplosive, this female comes from a stout pedigree. Her dam, EXLR La Veda 212T sold for \$20,000 in Tubmill Creek's "The Crossing" sale to P Bar S. EXLR La Veda produced TMCK Architect, one of the most popular show bulls in 2014. PBRS 5192C's offspring will have the numbers, performance and genetic package to match her great phenotype.

A.I. on 12.28.16 to SBLX First Class 707A; P.E. 1.12.17 to 2.14.17 to TMCK Durham Wheat 6030X.

Here is a homozygous black/ homozygous polled daughter of MAGS Xyloid. Her dam, BOHI Sundance 6217S is sired by GAR Integrity, a Bon View New Design son.

A.I. on 12.17.16 to TMCK Durham Wheat 6030X; P.E. 1.12.17 to 2.14.17 to TMCK Durham Wheat 6030X.

This calving ease specialist is in the top 20% of the breed for CED, yet she doesn't sacrifice the mass and power that so many calving ease cattle do. This Emblazon and EXT influenced cow would be an outcross to many of the new popular Angus sires on the market and has a tremendous amount of mating flexibility. This one would be fun to "play" with and find that perfect sire, the results could be very, very worthwhile.

# What is a Lim-Flex®?

Limousin are the ideal complement to British-based cattle. With Lim-Flex® hybrids, there are genetic options to fit every need, from fullblood and purebred Limousin to Lim-Flex hybrids. Breeders can offer a just-right shot of Limousin to meet the needs of any crossbreeding program.

Lim-Flex stands for Limousin with muscle and efficiency, along with flexibility — the most significant strength of this powerful genetic blend:

- Flexible seedstock for simple, easily managed crossbreeding;
- Flexible market progeny that consistently hit dressing percent, yield and quality grade targets;
- Flexible females adapted for efficiency across a wide range of environments.

FLEX stands for Limousin Efficiency Cross — the beef industry’s answer to profitable system-wide production of case ready products. NALF’s UltraMate Xbreeding System outlines how to use Limousin and Lim-Flex seedstock on different types of commercial cows to hit end-product and maternal targets.

Registered Lim-Flex are backed by documented pedigrees, EPDs, and genomic data provided by the North American Limousin Foundation.

Dr. Jim Gosey, beef specialist emeritus at the University of Nebraska, states, “A carefully constructed British x Continental can come a lot closer to hitting most of the targets for reproduction, production, and end-product than any straightbred I’m aware of.”

ULTRAMATE XBREEDING SYSTEM	Step #1	Step #2	Step #3	Breed
	Scope Out Your Cows	Aim at the target Market	Fire with the Right Bulls	Blends of Progeny*
	Angus (British) & British Cross	→ Mainstream → Marbling	→ Limousin → Lim-Flex	≡ 50/50 ≡ 25/75
	Angus (British) Continental Cross	→ Muscle → Mainstream → Marbling	→ Limousin → Lim-Flex → Lim-Flex	≡ 75/25 ≡ 50-50 ≡ 25/75
	Continental (High percent)	→ Muscle → Mainstream	→ Limousin → Lim-Flex	≡ >75 ≡ 62/37

\* Indicates approximate percentage of Limousin and Angus (black or red), respectively (i.e. 50/50 = 50% Limousin 50% Angus). British may also include Hereford and Shorthorn, which impacts sire selection strategy (e.g. when using Hereford cross cows and targeting mainstream market, select sires for higher marbling as compared to Angus and Shorthorn cross cows).

Progressive cow-calf producers recognize the value of hybrid vigor: 20% more pounds of calf weaned per cow exposed; 1.3 years of additional cow longevity; 30% greater lifetime production; and increased fertility. The Limousin and Lim-Flex UltraMate Crossbreeding System makes crossbreeding easy to produce calves that excel in any market and replacement females that have longevity and productivity.

PBRS Maverick 6114D is a direct son of AUTO Ajay, one of our lead-off donors who is destined to make a serious impact on our program and on the breed. Sired by, MAGS Aviator the syndicated sire that was a past member of Magness's Denver winning pen who is now becoming one of the phenotype go-to bulls in the industry. This mating is clearly one of the most intriguing and anticipated ones that we have ever produced. PBRS Maverick steps down on a substantial foot, has a powerful hip working in him, yet still gives you the balance and soft look of a high quality Lim-Flex Sire. To top it off, he is in the top 5% of the breed for MB and top 10% for \$MTI.

# Using Limousin & Lim-Flex® EPDs to Aid Selection

The North American Limousin Foundation (NALF) uses all available information to predict an animal's EPD. This information includes: individual performance, pedigree, progeny and grand progeny performance, and genomic information. All this information is combined into one, easy to use, number that helps producers make genetic improvement in their herd.

Since the spring of 2015, NALF joined 11 other U.S. and Canadian breed associations to form the largest international multi-breed cattle evaluation in the world through International Genetic Solutions (IGS). This allows growth and carcass EPDs for Limousin and Lim-Flex® (Limousin x Angus hybrid) animals to be directly compared with Red Angus, Simmental, Gelbvieh, Shorthorn, Maine Anjou, and Chianina animals (and all their hybrid animals). This makes selection decisions easier for commercial producers.

Listed below are the definitions for Limousin and Lim-Flex EPDs and the units in which they are published. For more information visit [www.NALF.org](http://www.NALF.org) or call 303-220-1693.

## Maternal and Growth Traits

**Calving ease direct (CED):** Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease.

**Birth weight (BW):** Predicts the difference, in pounds, for birth weight of the calf.

**Weaning weight (WW):** Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

**Yearling weight (YW):** Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

**Milk (MK):** The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

**Total maternal (TM):** An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. A greater TM value means a mother that returns comparatively higher weaning weights on her calves.  $TM \text{ Index} = MK \text{ EPD} + \frac{1}{2} WW \text{ EPD}$ .

**Calving ease maternal (CEM):** Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease.

**Scrotal circumference (SC):** Is a good indicator of age at puberty, and is a highly heritable trait. EPDs for scrotal circumference are expressed in centimeters, with higher values indicating genes for larger yearling scrotal circumferences of sons and earlier puberty of daughters.

**Stayability (ST):** Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a

bull's ability to produce females with reproductive longevity.

**Docility (Doc):** Predicts genetic differences in the probability that offspring are scored a 1 (docile) or 2 (restless) as opposed to 3, 4, 5 or 6 (nervous to very aggressive). Higher EPD values for docility represent genetics for calmer behavior.

## Carcass Traits

**Yield grade (YG):** Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

**Carcass weight (CW):** Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

**Ribeye area (REA):** Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

**Marbling (MB):** Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

**Fat (FT):** Differences for fat thickness, in inches, for a carcass over the 12th rib. Smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

**Mainstream Terminal Index (\$MTI):** Predicts genetic differences in profit per carcass by combining the potential for and value of post-weaning growth, quality grade and yield.

# NALF-Tyson Fresh Meats LIMOUSIN GRID

Marketing opportunity for Limousin cross fed cattle.  
For more information on the Limousin Grid, contact  
the NALF office at 303-220-1693 or visit [NALF.org](http://NALF.org).

## Market Cattle on the Limousin Grid

The North American Limousin Foundation has partnered with Tyson Fresh Meats to provide a Limousin Grid to market commodity cattle.

The North American Limousin Foundation (NALF), in an effort to further promote Limousin genetics, has teamed up with Tyson Fresh Meats to create a value-added cattle feeding pricing program. Tyson is offering feeders the opportunity to market cattle on a Limousin Grid, which is designed to pay substantial premiums for conventionally fed cattle. This grid rewards cattle that excel in quality and yield grade.

The grid uses average harvest results from all Tyson plants for each week's deliveries. The premiums are tremendous for cattle that exceed the week's averages for Prime, CAB, and Yield Grade 1s and 2s.

In the example grid, the USDA 5 Area Weekly Weighted Average Price is used as the initial starting price. Since the cattle are being compared to the weekly average results for all Tyson plants, the actual harvest averages are figured for the week with resulting premiums and discounts for the clean-up cost. The average discount total of \$5.56/cwt was used to subtract the \$3.88/cwt of premiums for a difference of \$1.68/cwt, which is then added to the base price

of \$222.89/cwt for a new starting price of \$224.57/cwt. The producer's cattle are then figured against the results of the plant averages for each category and the variances are calculated for the final price.

As a result, the starting base price is adjusted upwards since the cattle are competing against all cattle harvested for the week at Tyson plants. If a set of cattle exceeds the averages for quality and yield grade while keeping discounts at a minimum, the ability to achieve an additional bonus is very apparent.

Limousin cross cattle have the ability to do well on this grid given their natural ability for yield and grade. The advantages of Limousin cattle to put a high percentage of cattle into the Yield Grade 1 and 2 categories while achieving quality grade standards when fed correctly with a moderate implant program equals premiums for the feeder.

To be eligible to be marketed on the NALF-Tyson Fresh Meats Limousin Grid, cattle must carry a Lim-Choice panel ear tag and be reported to the NALF office. For more information on this grid or other marketing opportunities through natural and NHTC programs, contact Mark Anderson, NALF executive director, at 303-220-1693 or [Mark@NALF.org](mailto:Mark@NALF.org).
