 Canadian Farm Insurance

Delivery

Free delivery to central points near your ranch in Alberta, Saskatchewan, and Manitoba.
 Trucking arrangements to Eastern Canada will be co-ordinated and at cost of the buyer

U.S.A Buyers

We welcome our U.S. customers and will provide the necessary health and export papers. For our USA Friends, take advantage of the weak Canadian Dollar. For example, currently a \$10,000 purchase will only cost you \$7,700 US! Trucking arrangements to USA will be co-ordinated. U.S. funds will be accepted at the Rate of Exchange current on sale day.

Hotel Accommodations

Best Western Blairmore Hotel 306.242.2299

Videos & Pictures

Pictures were taken over the course of September and early October. Videos will be available on our website www.bbarcattle.com a week prior to the sale

Viewing

Cattle are available for viewing at the farm prior to December 8, 2018
 Cattle will be available for viewing at SLS December 9-11, 2018

Terms and Conditions

Cattle will sell according to the Terms and Conditions of the Canadian Limousin Association

The amazing story at B Bar continues to evolve. When you tour the rolling hills of the B Bar pastures the cattle, one after another, continue to impress. These Limousin cattle are practical, functional, correct, quiet and flat out good.

This sale marks year two and there is no "Sophomore Jinx" here! The red bulls are deep, stout and full of muscle. The black section is much stronger than year one, with a wide selection of bulls with power. Check out the calving ease numbers on these guys.

The female section is a "Wow" group. Probably a super promotion for the ET industry. On each of my visits these girls impress me more.

The breds are awesome - deep made, broody, and ready to move the Limousin industry forward. The proven MTO cow may well be the best investment you can make sale day.

Finally the Credential and Bubba Watson semen is available. Analyze their contribution and buy with confidence.

The B Bar program, along with their partners, have offered a fantastic opportunity for you to share in their genetic bank.

We at BMS are extremely familiar with the total B Bar program, and can answer all your questions and help with your selection(s) on December 11 in Saskatoon.

It is with pleasure and fond memories that I return to the Province I was born and raised in to be a part of the 2nd B Bar Cattle Annual Bull and Female Sale.

The Boon family have been advocates and students of the Limousin breed since 1982 when Delaney made his first purchases. Their dedication to the breed extends well beyond the pasture gates via their involvement in various associations on the local, provincial and national level. Furthermore, over their 35 year span in the Limousin seedstock business, they have exhibited numerous champions at major Canadian livestock events and have consigned untold numbers of elite Limousin seedstock to the most prestigious sales in the country. This commitment and involvement with the breed has paid long term dividends in the breeding pasture and consequently in the cattle presented to the buying public through this sale.

As you study the bulls, open and bred females and frozen genetics, you will notice a skillfully crafted combination of both U.S. and Canadian bloodlines. Evidence that the Boon family's ultimate goal is to create the best possible Limousin seedstock for their ever growing loyal customer base.

On behalf of the entire Boon family and the B Bar Cattle team, I invite you to the Saskatoon Livestock Sales, Tuesday, December 11 for what we anticipate to be one of the most well-attended and active sales held this fall on either side of the border.

Please do not hesitate to contact me directly, or any member of the sales team, leading up to the sale with any questions you may have regarding this truly unique and valuable set of Limousin genetics.

I look forward to assisting you in achieving your genetic goals.

Sincerely,

Kiley McKinna

Welcome to our Second Annual Bull and Female sale! We have come full circle once again and can not thank our customers enough for the support that has been shown in our program. We have felt so much gratitude towards what we believed was a tremendous first annual sale. Since then, we have worked harder and dug even deeper to bring an offering we are very proud of.

We work towards producing cattle that are well rounded; that fit the needs of the commercial cattlemen, have the ability to work in seedstock operations, complete with the integrity to be competitive in the show ring. Our goal is to develop a product that has breed character, structural soundness, genetic predictability, eye appeal, projected data and actual data to back them up.

As you flip through the catalogue pay close attention to the cow families and productivity of the young dams. Many maternal and paternal siblings cross over on the bull and female portion of the sale. We have brought a strong cross section of bulls for your appraisal. Two exciting pick of the heifer calf flush lots have already caused a stir. The six bred heifers have impressed visitors all summer long. Our one and only proven seven year old cow we enrol on WHE will command your attention instantly. The frozen genetics are sound, proven and profitable.

We provide a lot of information and data to help make your selection easier. If you have any questions, concerns or comments please contact us. We want to make sure you end up with the right animal for your program. We know our herd better than anyone, we are in this business for the long haul and we want you to be satisfied with your purchase.

We hope to see you Tuesday, December 11 at Saskatoon Livestock Sales for our Second Annual Bull & Female Sale. Come for supper, hospitality and to view Limousin cattle!

Wintering & Bull Development

Our selection criteria and bull development will not change. We will continue to select our bull pen and develop the same as we have over the years. The only difference is you purchase your bull in December.

Payment on bulls: ½ down sale day, remaining ½ after successful semen test.

We insist to winter the bulls for you, the buyer, at no additional cost. This will allow us to properly develop them on a balanced ration as we prepare to semen test them and for longevity in mind to benefit you the customer.

All bulls going back to B Bar Cattle must be insured.

We will semen test the bulls at B Bar Cattles cost the last week in February 2018.

We feed a high roughage TMR ration consisting of oat silage, alfalfa/grass hay, Masterfeeds bull development pellet and right now onyx mineral for a gain of 3-3.5 lbs per day.

B Bar Cattle reserves the right to collect semen on any bull sold through this sale. The semen collection will be at B Bar Cattles expense and the buyers convenience. Any semen collected will be for B Bar Cattles in herd use only. This also applies to any partners on a bull

Our goal is to have you happy with a B Bar bull!

Bull Crop Year	December 1st Scrotal Average / Range	March 1st Scrotal Average / Range
2012	29 cm (25cm – 35cm)	32 cm :: (31.5cm – 38cm)
2013	33 cm (26cm – 37cm)	36 cm :: (33cm – 39cm)
2014	30 cm (27.5cm – 35.5cm)	35 cm :: (31cm – 38.5cm)
2015	31 cm (28cm – 36.5cm)	35 cm :: (33cm - 40cm)
2016	33 cm :: (26cm – 35cm)	36 cm :: (33.5cm - 39cm)
2017	31 cm (26cm - 34cm)	35.5 cm (32 cm - 38cm)

Table. Shows the average and range on scrotal size on sale bulls over the last 6 years at December 1st (10-11 months of age) to March 1st (13-14 months of age).

- B Bar Silverback 5F is a true herd-sire candidate that is quickly found in the pen. His herd bull presence is combined with muscle, length of body, tremendous foot, stout stature, overall mass and capacity. He takes the #2 spot at weaning and indexed 111. His dam is a functional 3 year old maternal sister to B Bar Austin Healy 4D. On her first 2 calves, B Bar Nicole 13C has indexed 105 on weaning. Bulls like Silverback 5F do not happen by accident!

- Powerful flush brothers with exceptional growth, scrotal development and performance. This pair should add pounds to calf crop, while leaving beautiful daughters. Their gorgeous dam is feminine, with length, style, capacity and superb udder quality. The Dam stems from our very maternal Molly cow family that are known for their capacity and udder quality. She was Matt Heleniak's \$16,000 pick of our 2015 heifer calves. She has remained here under our management as we work closely with Matt.

- A big, stout bodied Lim-Flex bull by Bubba Watson, with the growth to sire a strong set of feeder calves and the genetics to sire a beautiful group of females. B Bar Mayday 28F earned a weaning ratio of 107 and carries with him a strong set of EPD's. His beautiful 3 year old dam comes from the tremendous Belvin Angus operation; she is sound in her type, with great breed character and a tremendous udder

Pick of the Foxtrot Flush Heifer Calves

Selling 1 pick, with selection to be made immediately after the hammer falls

- This flush is no accident! It is the result of combining some of the Limousin breeds most influential cow families into 1 package. When Matt Heleniak purchased B Bar Foxtrot 21B in the 2014 Solid Gold his hopes were to add females just like her into his herd. So, the decision to part with one of these heifers did not come easy.
- I am not going to write individual footnotes for these 7 heifers. They all blend power, eye appeal, soundness and docility into an exciting genetic package. The fact is when you see them in the flesh you'll realize there is not a wrong pick. These females have the ability to be competitive in the show ring but more importantly they have the ability to be productive, functional, real world mommas.
- Maternal Brothers have sold to Triple D Enterprises, ON and Jamie Visser, ON and a Full Brother sold to Conner Bros, AB & Andrew Ranches, AB
- **Flush brothers sell as Lot 5 and Lot 6**
- **Owned with Hawkeye Land & Cattle, ON**

Pick of the Xotic Flush Heifer Calves

Selling 1 pick, with selection to be made immediately after the hammer falls

- In the 2015 BMS NYR sale we teamed up with Venture Livestock to buy the right to flush the popular Richmond donor, Richmond Xotic SRD 6X. The only other daughter to be sold off Xotic 6X was a \$10,250 high seller in the 2014 Solid Gold Sale to Y2K Land & Cattle Co. She is also the dam of many top herd sires that have all went into purebred operations, Richmond's retained Zodiac 29Z while 3 other bulls went to Lake Road Limousin, AB and Dry Creek Ranch, BC; Smart Limousin, ON; and Circle T Limousin, SK.
- Fame 30F ET has a sweetheart disposition and is very correct in her design and movement. A beautiful front end that ties into her shoulder and rib that flows into a square stout back third. Her sire, Birubi Jupita J15, is our Australian import bull; the maternal attributes are strong coming from the recognized Wunda donor who has 109 registered progeny.
- Fortune 41F has been a standout from the beginning; she carries herself in an eye appealing package with length of body, stout wide base and plenty of breed character. B Bar Cognac 1B was our highly sought after 2015 high selling bull and competitive show bull who has stamped his progeny with breed character and females that have milked strong with neat, tidy udders.

• ***B Bar Shania 204Y is designated by the CLA an Elite Female***

• The ROMN Made To Order females are a huge reason why our herd is where it is today and females like B Bar Shania 204Y never go out of style. Shania 204Y is moderate framed, easy fleshing with massive volume and tremendous dimension. A female with a sound foot and leg structure, complete with an udder that will last. Shania 204Y progeny have a ratio of 103 on weaning, 104 on yearling, 117 on ribeye and 101 on marbling. Her dam is our original Shania cow that has put many natural females into our herd, including B Bar Shania 234X, sold in last years sale to Lazy A Limousin, SK. We also have two younger maternal sisters retained in the herd. The mating to Ivy's Bubba Watson 24B has already proven to work in her last three calves!

AI Bred to LFLC Dollar Bill 764D :: Due January 27, 2019
Exposed to Ivy's Bubba Watson 24B :: April 29 – June 4 (Vets opinion bred for early March 2019)
