6–2-Year-Old Bulls

39–Yearling Bulls

HOMO Polled

HOMO Black • Red

## SELLING 20 OPEN FEMALES

Storm Date: Sunday, February 14, 2021

Dear Friends and Cattlemen,

Welcome to our 10th Annual Production Sale.

Over the many years at Treftz Limousin, we stand behind this motto:

Develop a product you are passionate about.

Commit to your product.

Market your product.

Stand behind your product.

And most important, BELIEVE in your product.

As a small breeder, our success must come by differentiating our product from others. We need to develop a product we truly believe will enhance your operation. We feel by using our purebred bulls on your English based cows, you will see the most hybrid vigor than at any point of the crossbreeding plane. The more diverse the genetics between the 2 breeds of cattle, the more bang you will receive from the cross. We've done it here on our own F1 baldie herd and it works.

If you took an objective look at your calves in the fall and you came to the realization you need a shot of muscle and performance, you need to be with us on February 13. For more than 35 years, we've selected cattle with those traits in mind amongst others such disposition, milk and fleshing ability. Fat can be fed on, muscle can't. Using Treftz Limousin bulls will produce those wide topped calves with expressive hindquarters that will make you proud on sale day. If you take them to the next level and background or finish, you will be impressed with the conversion and efficiency where Limousin are second-to-none! We don't show cattle; instead we try to produce females that will make functional brood cows that are ready to go to work. The open heifers in the sale are destined for that goal.

Whether it's calving, feeding, clipping, picturing or videoing, we KNOW these bulls and heifers! If there are any details, no matter how small you want to know, don't hesitate to call prior to the sale. You will notice lots of photos in this catalog. We want to represent these cattle as best we can from a young age to sale day. Weather in our part of the country is very unpredictable in the winter so hopefully this will make your purchasing decisions easier in the event you can't attend. We understand in these uncertain times your concern with your health. If you do decide to buy sight unseen, rest assured, your purchase is guaranteed to your liking or you don't own it.

We highly recommend you insure your purchase on sale day as we all know the predicaments cattle can get into. Policies will be available sale day through Grassroots Insurance or most private insurance companies can insure them as well. We would like the open heifers, two-year-old bulls and fall bulls picked up sale day or shortly thereafter. If this doesn't work for you, please let us know sale day. A veterinarian will be available sale day to assist with health papers for those loading up sale day.

If phone calls, texts, or emails are any indication of where the Limousin breed is headed, I believe we have some very good years ahead.

Hope to see you February 13!

Sincerely,

Glenn, Lori, Dustin, Courtney, Reece, and Blue

# ABOUT THE CATTLE

The 18-month-old and two-year-old bulls are virgin bulls. They have been on a ration of corn, dried distiller's grain and free choice prairie hay to keep them in optimal breeding condition and Purina Availa 4 mineral tubs. They have been on pasture all winter.

The yearling bulls have had a similar diet of corn, dried distiller's grain, and free choice prairie hay and Purina Availa 4 mineral tubs. No silage is used in any of the cattle rations. CTC medicated pellets are fed for five days every 45 days to keep bulls healthy.

The bulls will be fertility tested and will have been vaccinated with Bovi-shield Gold FP5/VL5, anthrax and twice for pinkeye and foot rot prevention prior to delivery. The older bulls will be trich tested for states where needed. All our cattle are on a complete Purina mineral program year around. Please let us know prior to delivery if there are required vaccinations for your area of the country that are important to you. We also pour the bulls monthly with different products to keep in ahead of lice and rubbing issues.

Many of the bulls have been tested for the Homo polled and Homo black genes with the results listed on the pedigree of each bull.

We will keep the yearling bulls free of charge until April 1. After a satisfactory fertility exam, we will deliver the bulls with no cost to you up to 250 miles. Beyond that, we will work with you in getting your bulls delivered to an agreed upon central point. Please bring your trailer if you are thinking about purchasing two-year-old bulls, fall bulls or open heifers as we would like to move them as soon as possible right after the sale. We will deduct \$50 for each bull taken home sale day. A veterinarian will be on hand to issue health papers where needed.

A supplement sheet will be available online and sale day with adjusted yearling weights, scrotal measurements, and ultrasound data. Be sure to go to our website [www.treftzlimousin.com](http://www.treftzlimousin.com) or [www.dvauction.com](http://www.dvauction.com) for updated pictures, videos and other data.

Again this year, we are including a calving-ease score based on a combination of pedigree, EPDs, and calving history from sire and dam.

**E - Recommended for cows only**

**EE - Should work on cows or heifers**

**EEE - A good choice for breeding heifers**

*Treftz Limousin—“Where Muscle Still Matters”*

# Did you know...

Sometimes you reap a benefit without even knowing. Did you know Limousin cattle have a distinct gene called myostatin found in all fullblood Limousin cattle and in many purebreds with muscle expression? The myostatin gene is responsible for muscling and tenderness, yes, TENDERNESS in our beef. Studies performed indicate an improvement of up to 19% of the Primal Cuts of a beef carcass carrying two copies of the myostatin variant F94L. The data also cites better feed conversion rates.

several bulls and all have carried both copies. We feel confident this gene is inherent in our herd. As you will note, some of our top lots will carry the test result for myostatin. A test result of F94L2 indicates the animal carries 2 copies of the gene.

In our program, we use the F94L as a tool for our breeding program. Over the years, we've tested

## How should you use the data?

If you want feeder calves that have increased thickness then you'll want to select genetics carrying two copies of the F94L, especially if your cow herd is British based.

## More For Less THE LIMOUSIN ADVANTAGE

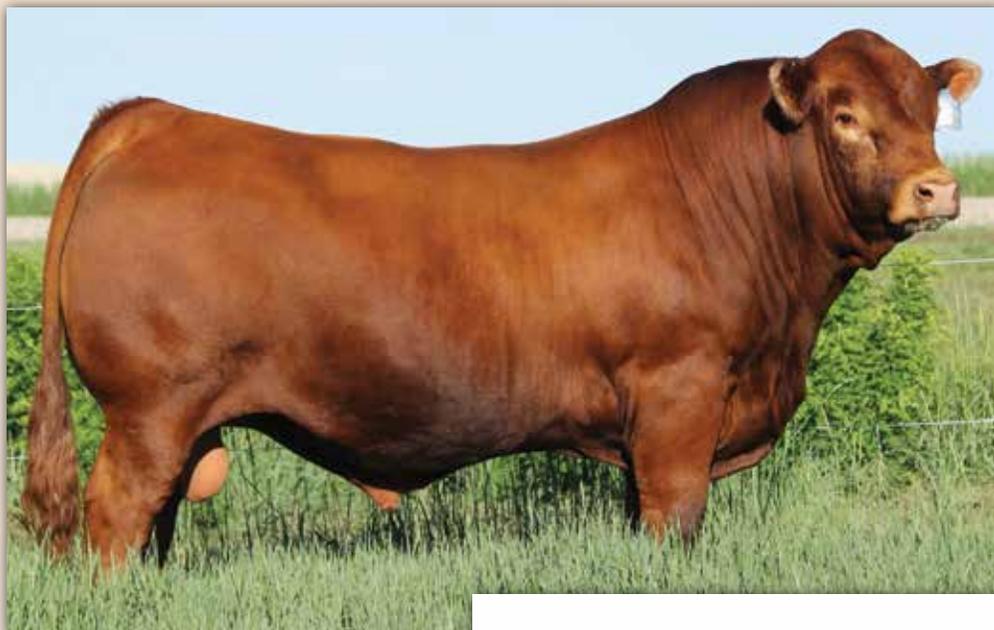

In a time where prices for our cattle are struggling to stay above input costs, feed conversion and cattle that perform will always improve the bottom line. Over the last 35 years in the Limousin business, one of our main focuses is on performance with as little feed input as possible. Our efforts have paid off.

In 2016, we were asked by our local Purina Company to participate in a feed trial using a product called Accuration Starter CP HL (in a pellet) fed free choice on our weaning bull calves. Already knowing Limousin is a very feed efficient breed, we were shocked with the results at the end of the 27 day trial.

Below are the results of 520 trials Purina conducted with several different breeds and Treftz Limousin on the bottom row. See the difference quality Limousin cattle will produce!

	Start Weight	End Weight	Days on Feed	ADG	Feed Conversion	Accuration Intake/Day	Grain % of Body Wt.
520 Proofs	499	575	22	3.47	4.79 to 1	15.11 lbs.	2.86%
Treftz Proofs	692	821	27	4.79	3.81 to 1	11.02 lbs.	1.46%

# YEARLING BULLS

Don't miss one of the last chances to get a herd bull from one of the most prolific cows and now deceased, TREF Yakira, to walk our pastures. This mating to Paynes Cracker, who had 12 sons average \$10,875 at the B Bar Cattle's Annual Sale in December of 2020, hit it out of the park. These three herd changing prospects have the pedigree, the power and super quiet dispositions to take your program to the next level. She is no stranger to our sales with her sons generally selling as Lot 1. In 2019, her first heifer calf went to TaDomi Hunt of Ontario, Canada, as the pick of the heifer crop. This is your chance to be the judge as we proudly offer choice on these exceptionally designed three full brothers. Bid with confidence.

TREF Yakira 766Y has raised 6 natural bull calves:

Average 205 wt. of 780 lbs. (108)

Average 365 wt. of 1,403 lbs. (112)

Average REA 17.5 sq. in. (111)

Average adj. scrotal of 38.4 c.m.

Folks, turn your attention to what we think is the best bull we've ever **GE-EPDs** created at Treftz Limousin! Once in a lifetime one is lucky enough to raise THE great one—we truly believe TREF Hardcore 204H deserves that rare moniker. Combining the genetics of some of the most powerful red bulls in the breed, TOMV Diesel, ROMN Made To Order and ROMN Justice, plus HUNT Mr. Jock, maybe it isn't luck, but destiny. He exemplifies all the traits we strive for in one package: massive muscle shape, calving-ease, soundness, easy fleshing, moderate frame, big ribeye, a 2 copies of the F94L gene. Plus, he is homozygous polled, super quiet and maternally oriented coupled with big time performance! He backs it up with his outstanding genomic-enhanced

EPDs which place him in the top 1% breed for weaning, yearling, total maternal and ribeye. We think he fits the call of the cattle industry and challenge you to find another red, purebred bull of his caliber anywhere in the land. Retaining one third interest.

Check out this heifer bull deluxe! Here's a bull we feel a program could build a herd of cows around. Physically, he's smooth made, sound structured, shapely and carries an impressive scrotal measurement. What's more, this herd prospect from the get go has been tremendously docile. This homozygous polled son of the popular AI sire, Wulf's Amazing Bull, puts it together on paper, ranking in the top 10% for birth weight and milk. Worth noting, his maternal sister was our high-selling open heifer in our 2020 sale going to Ben Roberts of Iowa.

Here's one that's easy to admire physically. If you like your cattle long sided, heavy muscled and stout made we feel Heartbreaker will suit you to a "T".

On paper, this homozygous polled herd bull prospect ranks in the top 20% for milk and top 15% for ribeye area. If payday weight is what you're after in your next calf crop, this one will get the job done!

Be sure not to overlook this wide bodied, thick-ended individual! A couple points worth noting is his dam is 11 years old and never misses. In addition, a full brother sold to E.J. Steinke Ranches of Idaho in 2020. His dam is unbelievably consistent raising a quality herd bull every year. As an added bonus, she has a perfectly constructed udder. We project the combination of the proven herd sire he is out of and the consistent production record of his dam will make this double homozygous herd bull and can't miss prospect.

Power, power and more power! Folks, here's a long bodied, thick ended, stylish bull that projects to work great on moderate made Angus-influenced cows. Worth noting, he has a touch more frame than most bulls in the offering, but that comes with his added length and natural performance. Numerically, notice he ranks in the top 25% or better for weaning, yearling, total maternal, docility, yield grade, carcass weight, ribeye and mainstream terminal index. This homozygous polled prospect puts it all together and should be a sale day favorite.

# 18-MONTH-OLD BULLS

## 18-MONTH-OLD BULLS • LOTS 10 – 17

We have a powerful set of 18-month-old bulls that are ready to be turned out and get to work this spring. They offer a balanced set of traits, are chock-full of muscle and bred to pack on the pounds in your calf crop come weaning time. Study them visually and numerically, and we know you'll find one to fit your needs.

Sit up and take note of this exceptional homozygous polled herd sire prospect. From day one he's been our pick of the red fall bulls. Visually, he comes to us in a sound footed, deep sided, heavy muscled package. What's more, his dam is from the same cow family as the donor in Lot 1. The combination of this bull's look, pedigree and top 4% ribeye has him atop our sale day favorites list.

**CALVING EASE: E**

## Treftz Limousin— “Where Muscle Still Matters”

We understand most of our customers want to take as many pounds to the sale barn as possible. With that in mind, we make a concentrated effort to breed for pounds and performance. The key to producing those pounds is increased muscling. Our ultrasound results over the last seven years illustrate our selection pressure for muscling is paying dividends.

Here is the last Bruiser son to sell! If growth and milk are top priorities, than Game Face is the herd bull for you! Worthy of mention, he is a maternal brother to our popular herd sire, TREF EZ Street. Numerically, this homozygous polled prospect ranks in the top 30% or better for yearling weight, milk, total maternal, scrotal, docility, carcass weight and ribeye area. Watch for this heavy weight, lunker sale day.

Terms fitting of this individual are moderate framed, thick made, sound legged and complete! As a bonus, we feel this is one could safely be used on heifers. Visually, he has the Limousin breed 'look'. EPD-wise, he is highlighted by his top 10% milk, total maternal, yield grade and ribeye traits. February 13, be sure to seek this one out.

Hercules is properly named because of his extra stout, big bodied, muscular look. Take note, he was raised by a heavy milking Jim Dandi cow and sired by JYF Extra Chuck. If you want thickness of muscle in the hindquarter, this is your herd sire prospect of choice. Take special note of his extra high percentage of Limousin blood which makes this true purebred Limousin herd sire prospect worthy of putting on your short list sale day. What's more, a high-selling, maternal brother went to Adam Davis in our 2020 sale. Power is in the blood!

Here is a dark cherry red bull that is deep bodied, thick-ended and exhibits great testicular development. In terms of being a fundamentally sound bull, he brings a combination fleshing ability, structural integrity and power to the table. On paper he is highlighted by a docility EPD which ranks in the top 3% of the breed.

If you came looking for a homozygous polled feature bull that could be considered heifer safe then Hunter is the herd sire prospect for you. Visually, he's smooth shouldered, level hiped and good footed. Take a look at his birth weight EPD which ranks in the top 4% of the breed. As an added bonus, he posts top a 10% milk EPD. Bid with assertion.

Study this attractive made herd sire prospect that combines rib and muscle to the highest degree. To the eye, Heartthrob is moderate made, big bodied, muscular and easy fleshing. On paper, he is highlighted by more than 740 lbs. of adjusted weaning weight. Note, he is a three quarter brother to Lot 38. His mother calved unassisted, as did all our heifers bred to TREF EZ Street 107E.

Well balanced is the term that best describes this fresh pedigreed son of Fait out of a great Wulfs Amazing Bull cow. Phenotypically, he is flat shouldered, level down his top, thick-ended and long sided. On paper, he holds staggering birth, milk and marbling advantages. We think this homozygous polled, red hided herd bull prospect does a lot of things right. He can be considered heifer safe and one to seek out sale day.

He may be toward the end of the sale but surely not because of lack of quality. This was his dam's last calf at 11 years old. She was one of our very best but came up open this fall. He is stacked for milk, ranking in the top 3%. His maternal brother was the Lot 3 bull in 2020 and sold to Jordan Leier of ND for \$8,750.

**CALVING EASE: E**

*After 45 years of using Limousin bulls, a lot of changes have happened. Treftz Limousin cattle have strong maternal traits complimented with Glenn's effort to add more performance, muscling and disposition to their bulls and heifers. Glenn has a herd to be proud of. Our purchases have filled a need for high percentages genetics to improve our cattle. He is friendly, honest and easy to do business with!*

## WORKING IN THE SANDHILLS

In 2018, we sold a bull to a first time buyer in the Sandhills of Nebraska. They run 100+ predominately Red Angus cows at one ranch with Red Angus bulls. He stumbled upon our program on dvauction weeks prior to our sale inquiring about Limousin cattle. He was impressed with what he saw and wanted to try something different. His first comment was "You'll never sell a Limousin bull to anyone over 50 in the Sandhills" because of the issues of disposition, but he was willing to take a chance. After several conversations talking Limousin and making him feel comfortable, Tim purchased a high-selling bull at our sale. Here is his testimony 18 months later:

"We DNA tested all of our herd bulls and when we weaned our calves we DNA tested what we thought were the best looking calves and the biggest calves. When the

tests came back, everyone of them was out of the Treftz bull! Also, when we were loading the calves on the semi, two of them came by the brand inspector and he said "I don't know which bull those two are out of but you better buy some more bulls from that guy."

Impressed with the result of his experiment, Tim purchased his second bull in our 2020 sale. He's made a believer of skeptics from neighbors, friends and even family who thought he was making a bad decision putting a Limousin bull on his herd. Now, everyone notices the difference. He has since lined us up with more potential customers who have witnessed from across the fence what he has accomplished.

Tim Wells, Nebraska Sandhills

# TREFTZ LIMOUSIN

# OPEN YEARLING HEIFERS

## OPEN YEARLING HEIFERS • LOTS 50A – 59B

Heifers were weaned Oct 30 with no creep and you can see for yourselves how easy they fleshed up by sale day. If you're in the game to produce the kind of bulls we've become known for, these are the type of TREF females that will take you to that level. Heifers meant to be cows and in turn meant to be bull producers. They've been paired to be evenly matched by pedigree, frame, and/or color. Selling choice or take them both. As before, we will offer free semen on any bull in our battery to breed them.
