

# LIMOUSIN 2021 Production Sale

**FEBRUARY 22, 2021 • 2:00 p.m.**  
At the Ranch - Flintoft, Saskatchewan

We are very proud to welcome you to our 2021 bull sale.

Our offering highlights our first progeny out of Plains Polled Executioner 19E. He has proven to have passed on his excellent disposition along with traits that initially drew our attention.

JYF Chunk has come up with another stout set of bulls with huge scrotals and calm dispositions.

Once again we will sell bulls individually by live and video auction. We will be following covid protocols that will be in effect at the time of sale. We encourage you to visit before the sale at your convenience so as to avoid any restrictions that may arise before sale day.

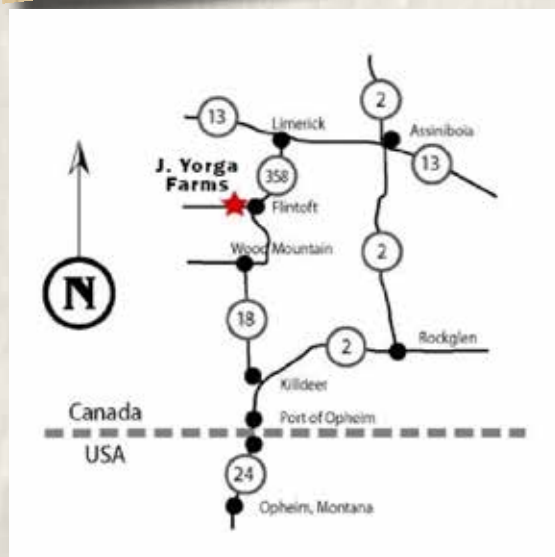

A covid lunch will be served and you can look forward to some good hospitality along with a great set of bulls.

JYF

**JYF Aged Bulls**

*Our bulls are not pushed to maximize yearling data. Instead, they are managed to grow out over winter; and this year were fed a mix of 2/3 clover grass and 1/3 greenfeed on return to the yard. We topped off with 12# of a 15% lentil based pellet. We try to get the bulls ready for multiple years in the breeding pasture.*

*We have made every effort to provide you, our customer, with the best bull for your money. We calve on the range, in April and May. This provides a 2 year old bull that will cover more cows and save you money. We also have a fall program where we calve from Sept 1 to Oct 15. These bulls are basically big January yearlings and provide another age option.*

*No bulls are sold before the sale so you're picking from the entire calf crop. Due to their age, these bulls have gone through extra rounds of culling to ensure that they are as problem free as possible.*

*The JYF aged bulls are designed with you in mind. It is extremely important to us that you get the best bull to meet your requirements. We will assist in any way we can, including at the auction. If you are not totally satisfied with your selection, you will not own him.*

EPDs	2.3	61	86	23	0.6	11	1.18	-0.15

## Management Rating

*We have been chute scoring docility at weaning since the system came out. We have found it useful, but that it did not adequately describe a bull's demeanor at sale time.*

*Bulls change as they get older and their testosterone levels increase. We see differences when working them to measure Yearling data, as well as sale preparation activities like picturing and video. In an effort to better describe a bull's disposition before they find out what they are made for; we have come up with the JYF Management Rating. We have scored them multiple times, on our own and talked about the scores together. We assure you that we have taken every opportunity along the way to weed out a potential problem bull. This rating is simply another way to differentiate one bull from another.*

1. *Pettable without halter breaking*
2. *Easily handled no matter the situation*
3. *Easy going. Very easily halter broke*
4. *Quieter than average, but slightly restless and may be stubborn during processing*
5. *Typical temperament. Manageable but nervous and impatient. Exits chute briskly*
6. *Restless and always moving away in the pen*
7. *Easily managed with other cattle, not so easily alone.*
8. *Heads up with a big flight zone. Seems to be the first to run*
9. *May exhibit attack behavior when handled alone*
10. *Always very aggressive, pronounced attack behavior*

## Herd Health Program

**Prior to breeding** - All cows and bulls are vaccinated with modified-live vaccine for: IBR, BVD (types 1 & 2) PI3, BRSV.

Calves are vaccinated with modified-live vaccine for: IBR, BVD (types 1&2) PI3, BRSV, 8 way clostridial, haemophilus, pasturellia.

Bulls, cows and calves are treated for internal and external parasites.

**Prior to weaning** – All calves vaccinated (boostered) with modified-live vaccines for: IBR, BVD (types 1&2) PI3, BRSV, 8 way clostridial, haemophilus, pasturellia.

Bulls, cows and calves treated with pour-on parasite control.

**Prior to Sale** - All bulls are semen tested and given the first treatment of Fusogard.

All cows are tested for Johne's disease. We have a zero tolerance policy for positive tests. These animals and their offspring are removed from the breeding herd to insure the the future health of your herd.

# DVAuction

[www.dvauction.com](http://www.dvauction.com)

Watch & Bid online for FREE!

**Can't make the sale?**

*Let DVAuction bring the sale to you!*

**Busy during the sale?**

*Let DVAuction represent your bid!*
