

ENGLEWOOD FARMS BULL & FEMALE SALE

April 25, 2015 • 1 p.m.
Lancaster, Kentucky

ENGLEWOOD
Solid Values, Futurist Vision **FARMS**

ENGLEWOOD FARMS

Solid Values, Futurist Vision

Dear Cattle Breeders,

We are very excited about the animals we have assembled for this year's spring sale. We feel like the bulls and females represented are the best Lim-Flex and Limousin seedstock cattle we are able to produce.

We are exceptionally proud of the 11 MAGS Y-Axis sons in the offering. They are very consistent and reflect his superior carcass EPDs and great phenotypic appearance. We know you will be impressed by the quality of these sons of Y-Axis and the other bulls selling by other great herd sires. In addition, we are featuring more than 20 females bred to MAGS Y-Axis.

The females being offered are from the core of our Limousin-influenced cowherd. We are only making them available because we have more than 100 E.T. calves due in 2015 that will feature these same type genetics. These are the kind of females even the most progressive seedstock operation can build a program around.

We hope you will block the weekend and join us for the sale. If you have any questions, feel free to contact any of us at the farm or any one of our sale consultants.

Sincerely,

Joanne & John Tobe

ANNOUNCEMENTS...

Announcements made sale day by the owners or auctioneer take precedence over statements in the sale catalog.

INSURANCE...

Livestock Mortality Insurance will be available through Grassroots Consulting, Mark Smith.

SALE ORDER & SUPPLEMENTAL INFORMATION...

Supplemental information will be posted at www.englewoodfarm.com for your convenience when available.

GUARANTEE...

All cattle sell under the standard guarantee of the North American Limousin Foundation.

FINANCING...

For financing options, contact John Ethington 859.533.1301

ACCOMMODATIONS...

Super 8 Motel - 859.236.8881
3663 Hwy. 150/127 Bypass, Danville, KY

Hampton Inn - 859.236.6200
100 Montgomery Way, Danville, KY

TERMS & CONDITIONS...

Terms of the sale are cash unless satisfactory credit arrangements have been made prior to the sale. A representative will be on hand sale day if you wish to insure your purchases. Please note: All persons who attend the sale do so at their own risk; Englewood Farms does not assume liability, legal or otherwise, for any accidents which may occur.

SIGHT-UNSEEN PURCHASE AGREEMENT...

If you are unable to attend the sale and want to speak with any of the sale staff, please don't hesitate to call. They will provide you with a complete satisfaction guarantee for the cattle purchased. If within two weeks from the date of the sale you are not satisfied with your purchases and how they were described to you, the seller will gladly give you a refund and take the animal back.

MAGS Y-AXIS

HOMOZYGOUS BLACK - HOMOZYGOUS POLLED - 50% LIM-FLEX

SIRE: TC ABERDEEN 759 DAM: MAGS UAHUKA

Owned with Magness Land & Cattle and Edwards Limousin

	CE	BW	WW	YW	MA	CM	SC	DO	CW	RE	YG	MS	\$MI
MAGS Y-Axis EPDs	16	-1.5	73	127	30	9	0.9	30	43	1.16	-.31	-.05	53
Lim-Flex Sire Ave. EPDs	9	1.1	65	100	24	6	0.2	13	31	.44	-.06	.30	61

Many stockmen have asked us “What are Lim-Flex?”

The answer is Lim-Flex are registered cattle in the Limousin breed that are a composite of the Limousin and Angus breeds with the stated percentage representing the percent Limousin influence.

The Lim-Flex Advantage

Limousin females are biologically efficient and flexible enough to be used under a variety of environmental conditions. Limousin is the leading Continental breed for calving-ease along with moderate milk and mature cow size.

Limousin cattle are the ideal complement to British-based cattle.

With Lim-Flex hybrids, there are genetic options for the mainstream markets with a blended combination of muscle from Limousin with added marbling and maternal from Angus. By combining both breeds you obtain heterosis which gives calves and mature cattle hybrid vigor for better growth, better reproduction and increased longevity.

Study the Y-Axis progeny in this sale and decide for yourself where Lim-Flex best fits into your program. The majority of the bulls in Englewood’s sale are Lim-Flex.

ENGLEWOOD

FARMS

Solid Values, Futurist Vision

Performance EPDs—

- CE EPD:** Stands for Calving-Ease Direct and is important when choosing sires to produce calves born easily. The higher the number, the better.
- BW EPD:** Express the difference in birth weight on the progeny of the bulls being compared.
- WW EPD:** Express the difference in pounds at 205 days on the progeny of the bulls being compared.
- YW EPD:** Do the same as WW, except it is the weight at 365 days.
- MA EPD:** Predict differences in weaning weights from daughter's calves due to genes inherited for milk.
- CM EPD:** Stands for Calving-Ease Maternal and is important for choosing sires that produce replacement females that give birth to their first calf easily. The higher the number, the better.
- SC EPD:** Are expressed in centimeters of scrotal circumference, and compare the difference expected in sons of the animal. Scrotal EPDs are a good indicator of age of puberty of both sons and daughters of the animal.

Carcass EPDs—

- CW EPD:** Express the difference in pounds of carcass weight.
- REA EPD:** Express the difference in square inches of ribeye area.
- YG EPD:** Indicate genetic differences for yield grade and cutability of offspring.
- Fat EPD:** Express the difference in inches of back fat.
- MS EPD:** Express the difference in the amount of marbling or flecks of fat in the ribeye.
- \$MTI:** Dollar Value Indexes are used to rank animals according to net genetic merit for profit from genetics for post-weaning growth and carcass performance.

This information should help you analyze and sort the sale offering to fit your specific needs. We realize this is a lot of data to use, so please ask us if you need further assistance.

UNDERSTANDING THE NEW LIMOUSIN EPDS

The Spring 2015 North American Limousin Foundation EPDs have greater predictability from the benefit of an international multi-breed genetic evaluation.

What are the advantages of changing to a multi-breed genetic evaluation?

- The Limousin evaluations (EPDs) are directly comparable to Red Angus, Simmental and Gelbvieh, among other breeds, making selection decisions easier for commercial producers.
- The carcass trait EPDs are more conservative, but consequently, will be more accurate in the long run.
- A contemporary group realignment into larger groups contributes to higher accuracy EPDs.
- Embryo calves are no longer taken for account in the growth traits, but carcass data will be included.

WHAT IS A BULL WORTH?

by Dr. Patrick Gunn
Extension Cow-calf Specialist
Iowa State University/Iowa Beef Center

I often get the question “How much should I pay for a bull?”. My first answer is “Whatever the market will bear.” Admittedly, that answer really gives no insight into return on investment for the producer relative to traits of emphasis for their particular marketing goals. With the record prices currently being observed in all markets of the beef industry, it’s no secret this translates to increased prices for replacement breeding stock.

While to my knowledge, no calculator exists to determine the exact price a producer should spend on a bull, there are multiple factors that can be considered to establish a base price.

Typical thumb rules I have heard over the years for the value of an average purebred or composite bull include two times the value of a fed steer, five times the value of a feeder calf at weaning, or 25 times the cwt. price of feeder calves.

In the current market, using these thumb rules, we get an approximate range of \$4,450 to \$6,750. This price, while representative of many early sales from 2015, is also lower than many reported sale averages from this spring.

While spending less does not insinuate you have purchased an inferior bull, it should be expected that an above average bull for traits such as

calving-ease, weaning weight, docility, stayability, marbling, etc., will likely garner a premium.

Assuming an average bull in today’s market will be utilized for four years and mated to 100 cows—on a \$6,000 bull, the mating fee over the life of the bull will be \$60 per cow. Regardless of base price, for every \$500 dollars more spent on a herd sire, it raises the service fee only \$5 per cow over the life of the bull.

Given today’s feeder prices, and assuming a 90% conception rate in the cowherd, for every \$500 more spent on a herd sire, only three more pounds of weaning weight per calf would need to be obtained to offset the added investment on a sire with improved growth EPDs.

Similarly, only 0.4 more calves would need to be born to a sire with an improved calving-ease (CE/CM) EPD profile. Given the fluctuations in grid premiums and discounts, return on investment needed for bulls with improved carcass traits is harder to pinpoint, and will be specific to your operation.

The initial investment of a bull in today’s market may seem staggering, but it is an investment that adds immediate value to the herd working forward. Good luck, and happy bidding.

BID ONLINE
