---------------------------------------	----------------

Dear Fellow Cattlemen,

All of us at Coleman Limousin Ranch welcome you to the Discovery Sale of 2017. Thank you very much for your interest, support and confidence in our program.

In the past, we have offered open yearling heifers at our Annual Bull Sale. We have also sold donor females and bred heifers privately. This fall, we decided to hold a special event to showcase our top females that have been responsible for producing breed-leading Limousin genetics. We are hoping to make this sale a bi-annual event.

We feel there is something for everyone at this sale. The offering is highlighted by designer flushes from two of our proven donor females, the pick of our 2017 Lim-Flex heifer calves and the pick of our 2017 purebred heifer calves. In addition, we are selling a select group of bred heifers, five-year-old bred cows, and open commercial heifer calves.

The females in this sale are backed by generations of proven genetics. The bred heifers and cows will be ultrasounded before the sale and sell guaranteed bred.

The cattle will be available for viewing at our ranch throughout the day October 6. Dinner will be served at Ninepipes Lodge at 6 p.m. and the video sale will start at 7 p.m. The Discovery Sale will be broadcast live by DV Auction. You can watch it on the internet and bid with DV Auction's "real-time" internet bidding services. We will have videos of the females posted to our website about mid-September.

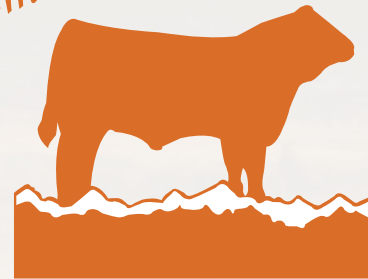

October is a beautiful time of year in the Mission Valley. Ninepipes Lodge is at the base of the majestic Mission Mountains. It is right on the way to Glacier National Park and Flathead Lake. Please join us for the sale and your own Montana vacation.

We hope this catalog's information will be helpful. Give us a call if we can be of further assistance to you. If you are unable to attend the sale, feel free to contact us at Coleman Limousin Ranch, Kiley McKinna or any of the sale staff. We look forward to having you with us October 6.

Sincerely,
Coleman Limousin Ranch
Larry and Anita Trent and Melissa

Coleman Limousin Ranch

DIRECTIONS: From Ninepipes Lodge, go north 1.1 miles on Hwy. 93. Take a left on Hwy, 212 and go 2.9 miles. Keep right onto Dellwo Rd. (the Hwy. curves left). Go 3.1 miles and take a left on Crow Dam Rd. The cattle will be displayed on your left at Coleman Limousin Ranch pasture.

Your Montana Adventure Begins Now...

Never in the nearly 50-year history of Coleman Limousin Ranch has a group of females such as these been assembled for appraisal. Not unlike the majestic Mission Mountains located here in Western Montana, when viewed as a group, this set of females has the ability to take your breath away. When we set out on this adventure, our goal was to assemble a set of Limousin and Lim-Flex genetics that would not disappoint. We feel we have succeeded, but as we have learned over our many decades as a superior seedstock supplier, we know the true value of our efforts will only be known at the final drop of the gavel. We sincerely hope you join us for what we hope materializes into one of the most memorable Limousin sales in recent memory. Please don't hesitate to contact us should you have any questions regarding the offering or in planning your trip to one of the most scenic places in all of North America.

Featured Lots

LOTS 1-4

As you study these exciting featured lots, you will find everything to be in order in terms of phenotype, pedigree, actual performance and EPDs. For 48 years, we have strictly selected and rigidly culled in an effort to develop a strong foundation cow base. The first two lots represent the culmination of our efforts. These two front-pasture donor females have proven their ability to be elite producers and we felt now is the time to share these genetic masterpieces with the buying public.

Lots 3 and 4 represent unique opportunities to select from the newest and freshest genetics available to the industry. Our breeding philosophy has long been to meld new and interesting genetics with the tried-and-true cow families we have painstakingly developed over the years. This is your opportunity to view them all and make your selection.

Rare opportunity abounds. On offer is the right to flush three unique ways on this impressive donor. We are guaranteeing a minimum of six eggs and maximum of 10, with flush expenditures at buyer's cost. Study the combination of quality and variety found in this intriguing genetic opportunity. These designer matings have strategically been

made to complement one of the breed's most proven and predictable Lim-Flex donors. COLE Miss Traveler 029X needs little introduction, having anchored the Coleman Limousin Ranch ET program, and being dam to the widely popular COLE Absolute 05A AI sire who's a lead bull in the progressive Linhart herd. This double homozygous donor

is huge footed, stout featured, big bodied and boasts a perfect udder configuration. Whether you purchase A, B or C, rest assured the AI sires featured are some of the most popular and genetically fresh the breed has to offer. Bid with confidence.

3 **PICK** of the Purebred Heifers

We proudly place on offer pick of our entire 2017 spring-born PUREBRED open heifer calves. This rare pick is coming from one of the most historic, internationally respected and leading firms the Limousin breed has ever known. The list of breed impacting cattle to have been raised over the years donning the COLE prefix is simply remarkable. Found in the 2017 PUREBRED spring heifer calf crop is more than 80+ females that feature leading Limousin genetics that combine both numerical superiority and desirable phenotype. Folks, this marks the first time in the existence of the Coleman Limousin program—spanning five decades—that an exclusive pick of the herd is being placed on offer for your appraisal. Bid with confidence. For more detailed information, contact the ranch direct or MC Marketing.

4 **PICK** of the Lim-Flex Heifers

This pick of the entire 2017 spring-born LIM-FLEX open heifers is coming from the heart of the robust Coleman Limousin spring-calving program, which is the fifth largest in the business today. The list of breed-impacting females and bulls the Coleman program has raised over the years continues to grow and it's with confidence that a matron worthy of that moniker exists in this very group. Found specifically in the 2017 spring-born Lim-Flex open heifer pen is approximately 50+ females from not only the strong Coleman genetic base, but also elite AI sires such as COLE Architect, SYES Backstage, MAGS Y-Axis, COLE Zone, ROMN Tuff Enuff and AHCC Xpense Account. That said, the combination of this group's genetic diversity and high quality all but secures your chance of finding numerous prospect donor females to sort through. For more detailed information, contact the ranch direct or MC Marketing.

Bred Heifers

LOTS 5-29

Within this group of bred heifers, you will find the females offered for sale are every bit as powerful and consistent as the bulls we have been offering for nearly 40 years. These females are descendants of many proven AI sires and can be traced back to many generations of consistent producers on the dam side. We are proud of the many Focus Dams that carry the COLE prefix and are confident the females on the following pages will go on to be impressive producers for their new owners. Rest assured these females represent the best the Coleman program has to offer. We have dug deep in an effort to offer you the kind of females we keep back as replacements.

• PE'd 5/22/17 to 7/6/17 to COLE Capital 69C (HP/HB)

This exceptionally well-designed, homozygous polled, PUREBRED female is a truly unique buying opportunity. Stout best describes this big-footed, free-moving, long-fronted, deep-bodied, square-hipped female to a tee. She ranks in the top 10% or better for weaning weight, yearling weight, scrotal circumference, carcass weight and ribeye area. Also note, she is by the highly predictable,

LOT 5

breeding-leading growth AI sire COLE Architect 08A and out of a high power cow that traces back to the popular outcross pedigree sire, HC Overtime 972. Bottom-line, this is a sure-fire PUREBRED donor female in the making and one who would be an asset to your genetic arsenal for years to come.

This exceptionally high-quality female had little trouble sorting herself to the top. This homozygous polled daughter of the widely regarded COLE Architect 08A AI sire who traces back to an extraordinary productive COLE First Down female. Visually, she is deep-sided, while maintaining a level top and superb structure. She rounds out the package with plenty of bone, a

LOT 6

big foot and muscle. She ranks in the top 1% for weaning and yearling, plus posted an IMF ratio of 128. There is no question she combines pedigree, phenotype and numbers to the highest level.

- PE'd 5/22/17 to 7/6/17 to COLE Capital 69C (HP/HB)

Study the overall design and makeup of this double homozygous, 75% Lim-Flex female. She does an excellent job of combining a brood-cow look with ample power and mass. Numerically, she's among the best in the breed, ranking among the top 15% or better for weaning, yearling, scrotal, carcass weight and \$MTI. From a pedigree standpoint, yet again she is by the widely recognized AI

LOT 8

sire COLE Architect 08A and out of a tremendous Coleman Production 608 cow that is earning an impressive reputation in our program. Make no mistake October 6 and invest in this outstanding breeding piece.

A scanned 7.84 IMF and a ratio of 162-we are quite simply in rare air. Make no mistake this is a breeding piece deluxe here. Be sure to study this well-balanced, double homozygous, PUREBRED that's super high quality. From a conformation vantage point, she's sound structured, long fronted, deep bodied and square hipped. She ranks in the top 25% or better for weaning, yearling and carcass weight. Don't miss your opportunity to add this very complete female to your breeding program October 6.

COLE Zone has left behind a solid string of females at leading programs across the country, while Justice made a name for himself siring performance-oriented, docile cattle. The two combined very well here resulting in a homozygous black, PUREBRED who posts strong milk figures. Digging a little deeper, the dam of this exceptional female has produced 10 calves with an average weaning weight ratio of 101.

Foundation Females

LOTS 30-38

Over the years we have been fortunate to enjoy much success at the National Western Stock Show Pen & Carload Show. The females contained here carry much of the same genetic material as their championship brothers. We strive to keep muscle and efficiency in our cowherd, and feel this group of females are both powerful and consistent. What's more, each of these bred females have shown the ability to excel in the real world of production, making them sound investments. These females have cleared all of the hurdles placed in front of them and have earned the right to be considered leaders among their contemporaries.
