

Welcome to the 3rd annual Diamond Hill Cattle online female sale...

"The Collection"

My direct involvement in livestock production began at a very early age with the purchase of a handful of Horned Hereford pairs. I have always had Limousin cows in the herd, but committed to the breed when my father, L.D. Barker, purchased LH U-Haul 135U in the spring of 2010. Since then, I have been building a foundation of Limousin and Lim-Flex cows. I have also been honored to serve the breed on both the Oklahoma Limousin Breeders Association and North American Limousin Foundation boards of directors.

At Diamond Hill Cattle, I strive to meet the demands of all markets by producing phenotypically attractive, structurally sound, performance-oriented seedstock. Accomplishing this is a matter of balancing resources, utilizing the latest technologies in genetic testing, and breeding for the future.

All this in mind, the sale has been appropriately named, "The Collection." This set of heifers and genetics are an example of the effort and are hard to part with. I hope you will take the opportunity to study them and find one that fits your needs. Your success is the best indicator of Diamond Hill's progress. Let's continue to work together to improve on and provide a great product—BEEF.

Thank you,
Mark A. Barker, DVM

All females in the sale have been DNA tested for black, polled and genomic enhancement. Diamond Hill Cattle retains the right to one flush on each live lot at the seller's expense and buyer's convenience. For assistance, contact the ranch or a marketing team member.
