# WELCOME

Dear Friends,

Welcome to Coyote Hills Ranch. We trust you will come early and enjoy yourself, meet new friends and renew old acquaintances. Circle May 6 on your calendar and plan to be with us in Chattanooga.

As many of you know, this will be the second female sale we have hosted since the passing of the Ol' Coyote himself. Ken was a larger-than-life figure who approached all things with enthusiasm and practicality. To say his presence, wisdom and guidance are missed is a huge understatement. But as they say, the show must go on, so that is exactly what we are doing. We would like to take a moment to thank the many people who have shown their love and support to our family. It has not been easy, but your kindness and willingness to step in and help whenever and wherever possible has made all the difference in the world.

As it always has, the annual Coyote Hills Ranch Production Sale offers some of the top Limousin and Lim-Flex genetics available anywhere in the country. A special attraction this year, will be the dispersal of all of our partnership females, which will help us get our herd down to a more manageable size.

Most of the females in this sale were born and raised here in the short grass country of southwestern Oklahoma and those that were not have been managed in a similar manner. Regardless of the prefix these cattle are carrying, buy from any of these breeders with the utmost confidence, as we are all truly in this together.

You will note that we offer a host of information in the catalog – and additional information will be available sale day on the supplement sheet. If you have any questions regarding any of this information, don't hesitate to contact any member of the sale team. You may also monitor our website ([www.coyotehillsook.com](http://www.coyotehillsook.com)) for sale updates including videos of the cattle selling.

We appreciate your interest in these genetics and look forward to working with you. Don't hesitate to contact any one of us with any questions you may have.

See you May 6.

Sincerely,  
Coyote Hills Ranch Crew and Friends

**Lawrence  
Family  
Limousin**

## SPECIAL GUESTS & REPRESENTATIVES:

Bruce Lawrence .....	President, North American Limousin Foundation
Ronn Cunningham .....	Secretary, North American Limousin Foundation
Troy Gulotta .....	Director, North American Limousin Foundation
George Hubbard .....	Director, North American Limousin Foundation
Colton Pratz.....	Oklahoma Cowman
Phil Stoll .....	The Weekly Livestock Reporter
Chisolm Kinder .....	Special Assignment
Scott Manley .....	Special Assignment
L.D. Barker, DVM & Matt Barker, DVM.....	Professional Animal Health

Randy Lathrop, Trucking.....	847/910-4673
J. McNeill, Trucking.....	940/391-6996

*The entire sale offering has been developed to deliver a product with calving-ease, growth, muscle and marbling in a black, polled, docile package. Raised in the arid conditions of southwest Oklahoma and west Texas, these cattle represent some of the top genetics in the Limousin breed'.*

**Videos of sale cattle available at  
[www.coyotehillsook.com](http://www.coyotehillsook.com)**

# Congratulations!

Reserve Champion  
Pen of Lim-Flex Bulls, 2023 National Western.

Grand Champion  
Pen of Lim-Flex Bulls, 2023 Cattlemen's Congress

We congratulate the Lawrence Family Limousin operation for their success at the 2023 Cattlemen's Congress in Oklahoma City and National Western Stock Show in Denver. The Lawrence family showed the Reserve Grand Champion Pen of Three Lim-Flex Bulls at both prestigious shows. Many of the cattle selling here come from the same genetic base as these bulls.

LH Belle 015B  
Her Flushmate Sister Sells

The PBRS Touch Me Gently 798T cow family has made a lasting impact not only on Coyote Hills Ranch, but across the breed. In this sale you will find 5 direct daughters of Touch Me Gently. One of those females, LH Belle Star 016B, is a flushmate sister to LH Belle 015B, the heifer that did so much winning for Colt Cunningham. Additionally, through her sons, DHIL Colt 5793C and CHR Eight Ball 011E ET, there is another 26 animals in this sale that trace back to Touch Me Gently. Truly a legendary cow family.

LOT 42 - LH Belle Star 016B

# PERCENTILE BREAKDOWN

	GE	CD	BW	WW	YW	MK	TM	CM	SC	ST	DC	YG	CW	RE	MB	FAT	\$MI
Current Average of Limousin Active Sires	-3.1	10	1.5	63	92	22	54	6	0.5	12	12	-0.54	23	1.10	-0.19	-0.10	46.77
Current Average of Limousin Active Dams	-2.9	10	1.3	62	89	22	52	6	0.4	13	12	-0.53	21	1.08	-0.18	-0.09	46.35
Current Average of Lim-Flex Active Sires	-2.9	11	0.9	71	110	21	56	7	0.9	12	13	-0.17	35	0.67	0.19	-0.03	59.86
Current Average of Lim-Flex Active Dams	-2.6	11	0.9	68	104	21	55	7	0.8	12	12	-0.19	31	0.65	0.17	-0.03	58.15

In order to allow you to compare the animals in this sale with the breed average, we have listed their percentile rank alongside the EPDs of the breed's most economically relevant traits. This allows you to make a quick reference when selecting for specific traits to fit your needs.

EPDS USED IN THIS CATALOG ARE CURRENT AS OF 4/10/23

## VACCINATION PROGRAM

### TIMING

### PRODUCT SUGGESTION

Birth.....	CalfGuard (if needed) <sup>1</sup>
Branding (-3 months).....	Bovi-Shield Gold <sup>2</sup> Ultracoice™ <sup>7</sup>
Preweaning (-2-4 weeks prior).....	Bovi-Shield Gold <sup>2</sup> OneShot Ultrabac 7/Somubac Spirovac <sup>3</sup> Ivomec
Weaning.....	Bovi-Shield Gold FP 5 VL 5 Ivomec Ultrabac 7/Somubac
Prebreeding (heifers/developing bulls).....	Bovi-Shield Gold <sup>2</sup> Spirovac <sup>3</sup>
Prebreeding (cows/bulls annually).....	Bovi-Shield Gold <sup>2</sup> Spirovac <sup>3</sup> Ivomec
Pregnancy Breeding Soundness Exam (cows/bulls annually).....	Leptoferm 5 Ivomec

- 1 Rota-corona virus vaccine administered prior to nursing
- 2 May be given to calves nursing pregnant cows if cows have been vaccinated within the previous year with Bovi-Shield (or PreGuard)
- 3 Spirovac should be administered to breeding animals twice at 4-6 week intervals the first year of administration. Spirovac should be administered as early in life as possible (after 4 weeks of age) to provide immunity prior to exposure and potential development of the carrier state. A preweaning/weaning period is included in the protocol. However, this could be given at branding (followed by a 2-4 week booster) or twice prior to breeding.

### NOTES

- No more than three gram (-) vaccines administered at one time
- 5-way Lepto administered twice annually (6 month intervals) in "high risk" herds and once annually in "low risk" herds
- Spirovac administered twice the first year and once annually
- Spirovac filters may be a problem for export requirements or AI centers. Consult your veterinarian or AI center personnel prior to administration to breeding animals destined for export or semen collection.
- Bovi-Shield may be used in calves nursing pregnant heifers/cows or in pregnant heifers/cows if the heifers/cows were vaccinated within 12 months. Bovi-Shield must be given initially to open females.
- ScourGuard 3 (K)/C should be administered precalving if calf scours is a problem. This should be administered twice (at least two weeks apart) the first year, with the second dose given 2-3 weeks before calving. A single annual booster may be given 2-3 weeks before each subsequent calving. Heifers' calves are twice as likely to develop scours as calves born to mature cows.

Take note: When applicable bulls are indicated with the GE-EPD (Genomically Enhanced Expected Progeny Differences) logo. They are the best estimate of the animal's genetic worth as a parent as if they have produced 10-25 progeny.

AI'D 1/14/23 TO LFL EDDIE 7019E; PE'D 1/25/23-3/15/23 TO LFL EDDIE 7019E.

LFL Eleanor 7103E had an adjusted WW of 722 that ratio'd 129; a YW of 1,329 that ratio'd 115, a REA of 13.79 that ratio'd 105 and an adjusted IMF of 8.35, and we thought WOW. Then her first calf, LFL Gavin, was the 2021 After 5 Champion Bull that is now working at Brooks Cattle Co. Two of her 2020 ET bull calves by AHCC Hemi were members of our 2022 Grand Champion Pen of 3 at Cattlemen's Congress. Another ET, son LFL Jack Knife, by LFL Deluxe Edition topped our 2022 Cattlemen's Congress Online Sale going to Sennett Cattle Co. and went on to be Grand Champion Bull at the 2022 Fort Worth Stock Show. Selling Half Embryo Interest. LFL Eleanor will calve in the fall and be ready to go back into embryo production.

## FOR YOUR QUICK REFERENCE

B  
G  
M  
C  
MB

Due to the limited amount of time in a fast-paced auction, we are providing an additional tool for your quick reference for your selection of bulls for a specific purpose. Each bull has been evaluated by visual inspection, pedigree analysis, performance records and EPDs.

“B” is in the catalog to indicate those bulls we feel comfortable recommending as calving-ease bulls with birth weight EPDs below breed average and most likely suitable to use on heifers.

“G” is noted on those bulls whose evaluation of all criteria including their own performance and EPDs indicate they can add growth above breed average.

“M” is listed on those bulls whose pedigree and EPDs indicate they can add maternal ability or milk for those who plan to keep replacement heifers.

“C” is listed on those bulls whose carcass weight EPD and ribeye area EPD exceed breed average thus adding pounds of carcass and muscling to their offspring.

“MB” is listed on those bulls whose marbling EPD and/or ultrasound IMF% indicate their ability to sire offspring that fit the mainstream market.

# TERMS & CONDITIONS

## IDENTIFICATION OF ANIMALS

1. Each animal sold will have a readable tattoo corresponding to its registration paper.
2. Seller agrees to check all tattoos for accuracy prior to the sale. The buyer has the responsibility for rechecking the tattoos after taking possession and reporting any discrepancies to the seller immediately.
3. All animals to be sold will be identified by their official registration numbers, their tattoos and their registered names. If nicknames are used, they should be in addition to the other information.
4. The NALF Board of Directors recommends that, when any animal is sold, there is complete disclosure of any retained genetics in the form of pregnant recipients, frozen embryos or frozen semen.
5. The prefix in an animal's registration name cannot be removed or changed by subsequent owners. Owners other than the original applicant cannot add a two-, three- or four-letter prefix to the name of the animal unless it matches the prefix in the animal's tattoo.

## REGISTRATION CERTIFICATES

1. The seller of the animal will submit the original registration certificate with transfer information or an application for registration with transfer information on it so that a certificate can be produced by NALF and transferred to the new buyer. The seller must sign the back of the certificate on the application to authorize the transfer.
2. It is the responsibility of the seller to provide NALF with the buyer's complete name, address and membership number (if available) so the transfer can be completed. It is important that the membership number be given if the buyer is already a member of NALF.
3. It is the seller's responsibility to provide the registration certificate or application and transfer information to NALF within 60 days following the date of sale and pay transfer and registration fees.

## TERMS

Terms of all sales are considered to be cash unless credit arrangements have been made prior to the sale between the buyer and the seller.

## HEALTH

1. On all animals sold, health tests will be announced at the sale or printed in the sale catalog. It is understood that health papers reflect the condition of the animal at the time of the sale but carry no further guarantee as to the future health of the animal.
2. Buyers having special health requests or who wish to take cattle into states with specific and rigid health regulations should inquire specifically about the health tests required for entry into their state prior to the sale.
3. All females sold are considered to be calfhood vaccinated for brucellosis unless they are otherwise stated in the catalog or announced from the block. It is suggested that verification of vaccination be written on the health certificate.

## PURCHASER'S RISK

1. Each animal becomes the risk of the purchaser as soon as it is sold.
2. It is the responsibility of the buyers to see that their purchases are fed and cared for following the sale.
3. It is the responsibility of the buyers to arrange all trucking for their purchases.

## ANNOUNCEMENTS

1. Any change from the information that is printed in the catalog will be announced from the auction block.
2. All announcements made from the auction block take precedence over the printed catalog.
3. Cataloged lots not selling will be announced prior to the sale or printed on a current supplement sheet.

## BREEDING GUARANTEE

1. All animals are guaranteed to be breeders with the exception of (a) calves under 12 months of age; (b) in the event of any injury or disease that occurs to the calf after sale; (c) gross negligence or willful misconduct on the part of the purchaser; or (d) females used in embryo transplant/transfer (ET).
2. A lactating cow with calf at side, sold as one unit, is a proven breeder, as indicated by the calf at side.
3. Bulls are guaranteed to be breeders at the time of sale or at 14 months of age if they are younger than 14 months at time of sale. Any bull that either settles cows by natural service or passes a fertility test made by a competent veterinarian is considered fertile. Any guarantee with respect to the ability to freeze semen shall be a separate agreement between buyer and seller.
4. Females sold as safe in calf have been examined by a competent veterinarian or other reproductive technician and are so guaranteed to be with calf. It is the buyer's responsibility to pregnancy-check all females and report any discrepancies within 30 days following the sale.
5. Any guarantee with respect to ET production shall be a separate agreement between buyer and seller.

## OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT

1. All claims for adjustments or refunds must be made in writing either within six months of the date of the sale or no later than six months after the animal reaches 18 months of age, whichever occurs later.
2. In the event that an animal is claimed to be a nonbreeder, the animal must be returned to the farm of the seller in good condition and must have met the health requirements of the original seller's state. The seller shall be entitled to six months' trial following the return of the animal in which to prove that the animal is a breeder. If, at the end of six months, the seller has been unable to prove the animal as a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the total purchase price. The return of the purchase price shall in all cases be deemed as full settlement.
3. Any expense incurred in transporting the animal that is claimed to be a nonbreeder shall be the responsibility of the purchaser except that the seller shall be responsible for transportation costs in the excess of the distance between the purchaser's farm and the location of the sale. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expenses incurred for transportation.
4. It is the obligation of the buyer and seller to negotiate any settlements on cattle that have not been properly represented at a sale. The selling of an animal constitutes a contract between buyer and seller,

and it is neither the responsibility nor the right of NALF or of the sale-management firm to settle disagreements between buyers and sellers of cattle that have not been properly represented.

The return of an animal at the expense of the purchaser with a refund of the purchase price made by the seller is in all cases considered a complete settlement. Other settlements, which are negotiated between buyer and seller, may be equitable to cover instances in which cattle are not as represented sale day, but that does not warrant complete return of the animal.

## PARENTAGE VERIFICATION

1. If, at some time, the purchaser raises a question as to the accurate parentage of an animal he has purchased, it may be settled by DNA-typing. DNA samples will be taken by a licensed veterinarian of the animal in question and of its sire and dam if they are not currently on file. The verification of the parentage test will be made by one of NALF's approved laboratories (GeneSeek Inc., or Zoetis Inc.). The results of these tests will be sent directly to NALF and will be sent on to both the purchaser and the seller so they will be aware of the official results.
2. If the DNA tests indicate that the animal is not as it was registered originally, the seller will reimburse the buyer for the test and will refund the total purchase price of the animal or replace the animal with another of equal quality and value as determined by the purchaser.
3. It is important to remember that DNA-typing is not 100 percent exclusive and that it simply identifies animals that will qualify as the parents or animals that cannot be the parents.
4. All bulls born after January 1, 2009 that are to be used for artificial insemination (AI) must be parent-verified by DNA-typing (both the sire and dam). Sires born between January 1, 2001 and December 31, 2008 must have a DNA type on file and be parent verified through DNA typing. All females born after January 1, 2009 that are to be used for ET must be sire-verified through DNA-typing. All females born prior to January 1 2009, that are to be used for ET must have DNA type on file and be sire verified through DNA typing. If sire is deceased and no sample is available for DNA typing, blood typing may be used for sire verification.

## HORNED/SCURRED/POLLED

### DEFINITIONS

1. **HORNED** - An animal with a horn growth affixed to the skull that has or has not been removed.
2. **POLLED/SCURRED** - An animal with rudimentary horn growth that will not develop into a horn. The rudimentary horn growth may or may not become affixed to the skull at an older age.
3. **POLLED** - An animal with absence of horn growth. (An animal can have scurs and still be genetically polled.)
4. **SMOOTH POLLED** - A smooth-polled individual has no scurs and does not develop scurs later in life.

### GUARANTEES

1. If an animal is sold as polled or polled/scurred and proves to be horned, the seller shall be obligated to refund the purchase price upon return of the animal to the farm of the seller at the expense of the seller or may be exchanged for a polled animal of equal value, whichever is acceptable to the buyer. The buyer has 30 days from date of sale to notify the seller that an adjustment is in order.
2. If an animal is sold as smooth-polled and proves to be scurred, the seller shall be obligated to refund the price upon return of the animal to the farm of the seller at the expense of the seller or, at the buyer's option, shall be exchanged for a smooth-polled animal of equal value.
3. If an animal is sold as polled and develops scurs, the seller will not be obligated to make any adjustment because a scurred animal is considered polled.
4. If an animal is sold as polled and has scurs, it shall be announced at the time of sale that the animal has scurs. If it is not announced and the buyer finds before the animal leaves the sale premises that the animal has scurs, the buyer must notify the seller of the findings. The seller shall then be obligated to refund the purchase price.

## DISCLOSURE OF RETAINED GENETICS

Because the sale of a registered Limousin animal constitutes the transfer of ownership of all, or a portion of, a "genetic package," it is the seller's responsibility to inform potential buyers of all retained genetics of animals in circumstances where potential exists for buyers to be misled. This includes, but is not limited to, semen collected and frozen prior to sale, embryos flushed, existing clones as either live animals or embryos, and cows carrying the service of an offered bull.

## DISCLOSURE OF TESTS RESULTS FOR KNOWN GENETIC DEFECTS AND FACTORS

1. The seller shall have an affirmative duty to notify the buyer of any test results for genetic defects or genetic factors not otherwise reflected on an animal's pedigree.
2. Nothing contained herein should be construed to relieve the parties from complying fully with the rules and policies of NALF relating to genetic defects generally or individually.

## LIMITATIONS OF OBLIGATIONS

1. If these suggested terms and conditions are adopted, they should constitute a contract between the buyer and seller for each animal sold under these terms, as such; and it should be binding upon both parties. Animals resold following purchase in a sale shall constitute a separate transaction, and the privileges and obligations of the original two parties connected thereto are not covered by the terms and conditions of sale.
2. NALF, its directors and employees are not in any way responsible or liable for enforcing the suggested terms and conditions of any agreement involving transactions between buyers and sellers.

## INSURANCE

Anyone wishing to insure their purchases may do so by contacting the sale manager or settling clerk.

## MAIL BIDS

Mailed or telephoned bids will be handled in a most confidential manner if you are unable to attend the sale personally. By contacting a representative of the sale staff prior to sale day, you will enable us to assist you at ringside on sale day.

# GLOSSARY OF THE SALE

**FERTILITY TESTED** – Definition: Bulls’ semen has been tested by a licensed veterinarian or a recognized A.I. breeding center and is considered a satisfactory breeder as per the accompanying signed veterinarian certificate.

**HEALTH PAPERS** – Definition: Proper health papers furnished on all animals in the sale resulting from T.B. and Bangs test.

a. **T.B. TEST** – Animals have been tested for T.B. and found negative within thirty (30) days of the sale, both males and females with the exception of young calves or from a TB-free state.

b. **BANGS TEST** – Animals have been tested by licensed veterinarian and have met the requirements for a negative test in the state which animals sells. This includes all males and females except those exempted from this test due to age, calfhooed vaccination, or certified Brucellosis free herd status.

**BREEDER** – The owner or lessee of the dam at the time the dam was served to produce the calf.

**OWNER** – The individual, partnership, or corporation in whose name an animal is registered.

**HORNED** – Those animals with hard, bony projections from their head. May be surgically removed or dehorned.

**POLLED** – Those animals that are genetically hornless. They have at least one copy of the polled gene. Animals with both parents polled that have been tested and found not to be homozygous are not listed double polled, but Het Polled.

**DOUBLE POLLED** – Those animals that result from two polled parents and have not been DNA-tested.

**HOMOZYGOUS POLLED** – Individual has been DNA-tested to be genetically “PP” or proven by parentage to be homozygous thus not carrying the “p” horned gene by pedigree or DNA test.

**PB** – Those animals that are 94% or more Limousin.

a. **American PB** – Those upgraded PBs that are 94% or greater Limousin, and 6% or less other breed as indicated by the breed codes. Registration numbers beginning NPM (North American PB Male) and NPF (North American PB Female).

b. **Fullblood** – From 100% or full French ancestry. They have registration numbers beginning with NFM (North American Fullblood Male) and NFF (North American Fullblood Female).

**HOMOZYGOUS BLACK** – DNA-tested and found to be homozygous black or genotype ED/ED or both parents were DNA-tested homozygous.

**DOUBLE BLACK** – Indicates animals whose parents are both black in color. These animals have NOT been DNA-tested. Animals with both black parents have been tested and found to be red carriers are not listed as double black, but as Het Black.

**LIM-FLEX** – Denotes the Limousin-Angus hybrid that may vary in composition from 25-75% Limousin and 25-75% Angus or Red Angus with a maximum allowance of other breed or unknown genetics of 12.5%.

**EPD** – Expected Progeny Difference – A user friendly way of summarizing performance information for quick reference.

**GE-EPDs** – Genomically Enhanced Expected Progeny Differences are the best estimate of an animal’s genetic worth as a parent. GE-EPDs predict an animal’s genetic worth as a parent as if they have produced 10-25 progeny

**% RANK** – Percentile breakdown that allows for quick reference when comparing individuals to current sires of the most recent calf crop recorded with NALF.

**(100/89.9)** – Percentage of Limousin genetics. The first figure indicates the rounded NALF percentage while the second number is the actual percentage of Limousin genetics.

**RETAINING SEMEN INTEREST** – Seller retains option to collect semen on said bull at buyer’s convenience and seller’s expense. Should both parties agree to offer semen for sale – each share in revenue proportionately.

**AgDefense**  
risk management

A full service agency dedicated to

**DEFENDING**  
Your Agricultural Risks!

## AVAILABLE SALE DAY

Offering livestock mortality insurance sale day. Ask for rate at the clerks’ desk.

LIVESTOCK NUTRITION CENTER

## BETTER FEED, BETTER RESULTS

Livestock Nutrition Center specializes in blending customized rations, supplements and premixes to meet the specific nutritional needs of your operation. We understand that management, performance objectives and feeding practices can be vastly different between operations, and that these differences dictate specific nutritional or formulation requirements. Our experienced sales staff will work with you to design a feeding program that is specific to your operation.
