

# Reynolds Land and Cattle

## *41ST Annual Production Sale*

**MARCH 18, 2023**

**LUNCH STARTS AT 11**

**SALE AT 1 P.M.**

**LIMOUSIN, LIM-FLEX, ANGUS & SIMX BULLS AND HEIFERS**

*PAP tested and Rancher approved!*  
*“A Breed Apart”*

# Welcome

*We welcome you to our 41ST Production sale and over 50 years of selling high quality Limousin and Limousin x cattle. The cattle industry is facing one of the best situations it has seen since the record setting year 2014. With cow numbers down over 2% country wide, and the demand for quality beef both nationally, and internationally at an all time high, we are looking at some of the best times ever in the cattle business.*

*One thing is for sure we will continue to produce the absolute best quality bulls and females for our customers. It is our commitment since dad started doing this over 50 years ago. If you are looking for high quality limousin, Lim-Flex, angus, or Simmental x bulls or maybe a heifer or two to add to your program, then plan on joining us on March 18, 2023 in Sanford, or join us online with DV Auction.*

*The last couple of years has brought many new challenges for all of us, but with the New Year brings new expectations and a fresh new look for the future. Thank you for your interest and looking forward to catching up on sale day.*

*Sincerely, The Rod Reynolds Family*

# Reynolds Land & Cattle

41st Annual Production Sale

At the ranch Sanford, Colorado

**17463 County Road 19**

**Sanford, CO 81151**

**\*With Guest Consignor Cimarron  
Angus - Bill Goebel**

## Schedule:

Bulls and Females are available for viewing anytime prior to the sale.

Saturday March 18, 2023

11:30 - BEEF lunch

1:00 Sale Starts

## Auctioneer:

Aaron Tenney \_\_\_\_\_ 208-320-8017

## Sale Day Phones:

Rod Reynolds \_\_\_\_\_ 719-588-1230

Troy Reynolds \_\_\_\_\_ 719-580-1308

Joe Cary \_\_\_\_\_ 719-580-8702

Bill Goebel \_\_\_\_\_ 575-643-5294

Sale Consultant:

MC Marketing

Kiley McKinna\_\_ 402-350-3447

Wiley Fanta \_\_\_\_\_ 320-287-0751

Air Transportation: Commercial airline service is available into the Alamosa Airport, 14 miles north of Sanford.

Buyers unable to attend the sale may send their bids to any of the sale staff or auctioneer. We guarantee 100% all sight-unseen purchases.

Terms: Terms of sale are cash or bankable check on sale day unless prior arrangements have been made. Settlements are to be made with clerk immediately after the conclusion of the auction.

Health and Guarantee: All bulls will be fertility and trich tested prior to sale. Health certificates will be provided on each lot sold. All bulls, 12 months of age and older are guaranteed breeders. A bull is determined a breeder when he settles one or more females and/or passes a satisfactory semen test.

Liability: Each animal will become the buyer's risk as soon as sold but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the animal. Neither owner nor sales manager can be responsible for any accidents, but every effort will be made to provide for safety and comfort of those attending.

Announcements: Announcements made on sale day will take precedence over printed material in catalog.

Feed Arrangements: If the buyer desires, Reynolds Land and Cattle will continue to feed the purchased yearling bulls their growing rations at the ranch in Sanford. The service will be free of charge. The bulls can then be picked up at the ranch or delivery arrangements made no later than April 15, 2023.

Free delivery on all cattle for the first 200 miles. Any distance past that we will work to accommodate delivery to central locations.

Weights and Scrotal Measurements: Will be available on sale day.

All animals have been PAP tested here at the Ranch by Curtis Martin under the direction of Dr. Tim Holt. We hope this will help you in choosing a bull or bulls for your program. Bulls and heifers without PAP scores are over 50.

## Online Bidding:

The sale will be broadcast live on DVAuction.com with videos available prior to sale day.

# Reynolds Land and Cattle

## 41st Annual Production Sale

OUR BREEDING PHILOSOPHY

When dad was discharged from the Army in 1946, he had saved up enough money to buy 20 acres of land and 14 hereford, shorthorn cross heifers. He had always had a desire to be a cattleman, now as the third generation rancher he had his opportunity.

In the late 60's a brand inspector told dad he thought his calves were a little small that year, that didn't set well with dad and he began studying what he might do to improve the genetics in his herd. Brown Swiss would improve the milk and growth. Angus bulls were used on those heifers until he saw a couple of Limousin calves at the NWSS, his comment was "those are the best calves I have ever seen, someday we will have a whole herd of them."

Dad once told me, if you just raise good cattle and not chase the fads, you will always have good cattle. We at Reynolds Land and Cattle believe in cattle that calve easily, have plenty of growth, convert feed, have excellent dispositions, make good mothers with plenty of milk, all while getting out and working in the harshest conditions.

We believe by using Reynolds Land and Cattle bulls and heifers, you will be raising some of the most problem free, productive cattle in the industry. More live calves due to the calving ease and hybrid vigor, which means more pounds at weaning time. The feeders love them because they convert feed better than any other breed. The packers love them because they get more saleable product than from any other breed. We believe we are producing the kind of cattle that exceeds the industry standard. If you haven't tried our cattle, maybe it's time you did, your bottom line will be glad you did. And if you have, come back as we will continue to work hard at making what we think are really good cattle even better.

Sincerely,  
Rod Reynolds

# Expected Progeny Difference and Performance Information

The EPD's in this catalog reflect the new base used to calculate EPD's for Limousin cattle. They now have the same look as Angus EPDs. For commercial producers this rescaling helps simplify the use of Limousin EPDs by making the set of ranking benchmarks similar for both breeds. While EPDs of two breeds cannot be directly compared, if you know the benchmark within the Angus genetic evaluation, you also know the EPD benchmarks within the Limousin evaluation. Twice a year the EPDs are recalculated to include any new data that has been submitted to NALF. This is done to keep them up-to-date and improve accuracies. With this in mind, expect EPDs to change on the animals you purchase. The EPDs for the Lim-Flex calves reflect the combined EPDs of the AAA and the current information in the Limousin EPD bank from the sires and dams of that breed. As this is a fairly new development, the accuracies will be low.

## Performance EPDs:

BW - Express the difference in birth weights on the progeny of animals being compared.

WW - Expresses the difference in pounds at 205 days on the progeny of bulls being compared.

YW - Expresses the difference in pounds at 365 days on the progeny of animals being compared.

MK - Expresses the differences in weaning weights from daughter's calves due to genes inherited for milk.

SC - Expressed in centimeters of scrotal circumference, and compare the differences expected in sons of the animal.

Scrotal EPDs are a good indicator of age of puberty of an animal's offspring.

DOC - Expresses the difference in animals predicted for docility. Higher EPD value represents calmer behavior.

YG - Expresses differences in yield grade score. Smaller values predict a better lean to fat ratio.

CW - Expresses the difference in pounds of hot carcass weight.

REA - Expresses the difference in square inches of ribeye between the 12th and 13th rib.

MB - Expresses the difference in degree of marbling score units.

\$MTI - Mainstream terminal index predicts genetic differences in profit per carcass by combining potential of post-weaning growth, quality grade and yield.

\*EPDs are subject to change as more information is calculated.

## A word about PAP..

Pulmonary arterial pressure (PAP) testing is used as a predictor in cattle for susceptibility of high mountain disease (HMD)

Not all PAP tests are equal! There are key differences to pay attention to:

- Elevation of the animals tested.
- Age of the animal when tested.

Elevation: The higher the elevation of the test the higher the accuracy of the test. Here at Reynolds Land and Cattle we test all our cattle at over 7,600 feet. Our cattle run up to 12,000 feet in the summers and have been adapted to the elevation for many generations. Our PAP tests are a good indicator but are simply another tool to use in your selection.

Don't let an animal get away or overlook one that may be a few points higher than your ideal score. Evaluate your bulls in a range of PAP scores including those that are slightly above your target score. PAP score is an indicator but we also stand behind our elevation adapted genetics and cull and select animals accordingly. Below are only guidelines as other considerations should be given to all other aspects of an animal. Please know that we bring you the best of our best.

PAP Risk Factor at High Elevation Test Chart  
 PAP test conducted at elevation of 5500-7000 feet.  
 (75-95% Repeatable, Predictive Value)

PAP SCORE	USE AT LOW <4000 FEET	USE AT MODERATE 4000-5000 FEET	USE AT HIGH 5500-7500 FEET	USE AT EXTREME >7500 FEET

## ELITE YEARLING HEIFERS

These phenomenal cow prospects are strategically designed to go out into the industry and produce economically relevant cattle. These girls are right out of the replacements. We stand behind these females 100%. Whether you're looking for a show prospect, a serious brood cow, or just something to make all your neighbors jealous help yourselves!

\*\*For an additional \$250 we would be glad to keep these heifers here at the ranch until June 1st and service them first service A.I. to any sire of your choice including our owned herdsires.

THE ONLY RED HEIFER IN THE OFFERING BUT WELL WORTH THE WAIT. SHE HAS A GREAT MATERNAL LOOK AND DISPOSITION. HER MOTHER GOT HURT ON US THIS SUMMER BUT WAS STILL ABLE TO DO A GREAT JOB RAISING THIS ONE. WE FEEL WE ARE CLOSING THE WITH ONE THAT SHOULD WORK IN THE REAL WORLD.

# THANK YOU!!

We also have a set of cross-bred cows used to raise show steers and heifers. They consist of Chi-Maine, shorthorn, Simmental, and Angus. This began a number of years ago after leaving Colorado State fair and knowing we needed to do more to compete in the Final Drive. From this herd have come numerous champion steers and females all across the country. Watch for our sales this fall on [sconlinesales.com](http://sconlinesales.com) and pick out a champion.
