SALE ORDER & SUPPLEMENTAL INFORMATION

Sale order is catalog order! Any additional information or corrections to the printed sale catalog will be available online at www.Wagyu365.com and DVAuctions.com

LIABILITY

All persons attending the sale, do so at their own risk, legal or otherwise for their safety. Synergy Wagyu, Wagyu 365 sale management, and sales staff assume no responsibility or liability for property loss or any accidents that may occur. Cattle are to be inspected by purchaser and or his or her agents and is being purchased "As Is," "Where is basis."

HEALTH PAPERS

All live cattle sold will be accompanied by an appropriate health paper for immediate shipment. Additional health testing may be required from some locations. A veterinarian will be at the sale to write any additional health work needed on any purchases.

REGISTRATIONS & TRANSFERS

As soon as the cattle are paid for, the cattle sold will be transferred (registrations) to the new owners through the offices of the American Wagyu Association and/or the Australian Wagyu Association and the fee is paid for by the seller.

SCHEDULE

FRIDAY, AUGUST 25TH

12:00 p.m. Cattle available for viewing
5:00 p.m. Refreshments

SATURDAY, AUGUST 26TH

7:00 a.m. Cattle available for viewing
8:00 a.m. Refreshment available

Speaker Schedule:

9:30 - 9:45 a.m. Robert Williams: Wagyu in the USA
9:45 - 10:15 a.m. Reid Martin: The Lone Mountain Program
10:15 - 10:45 a.m. Megan Angus: JBS and Wagyu
10:45 - 11:15 a.m. Break
11:15 a.m. - 12:30 p.m. Laird Morgan: Arubial Wagyu & Lillyvale Feedlot
12:30 - 1:00 p.m. Matt McDonough: Genomics and EBVs

1:00 p.m. Lunch
3:00 p.m. Synergy Wagyu 2023 Vision Live Cattle Sale

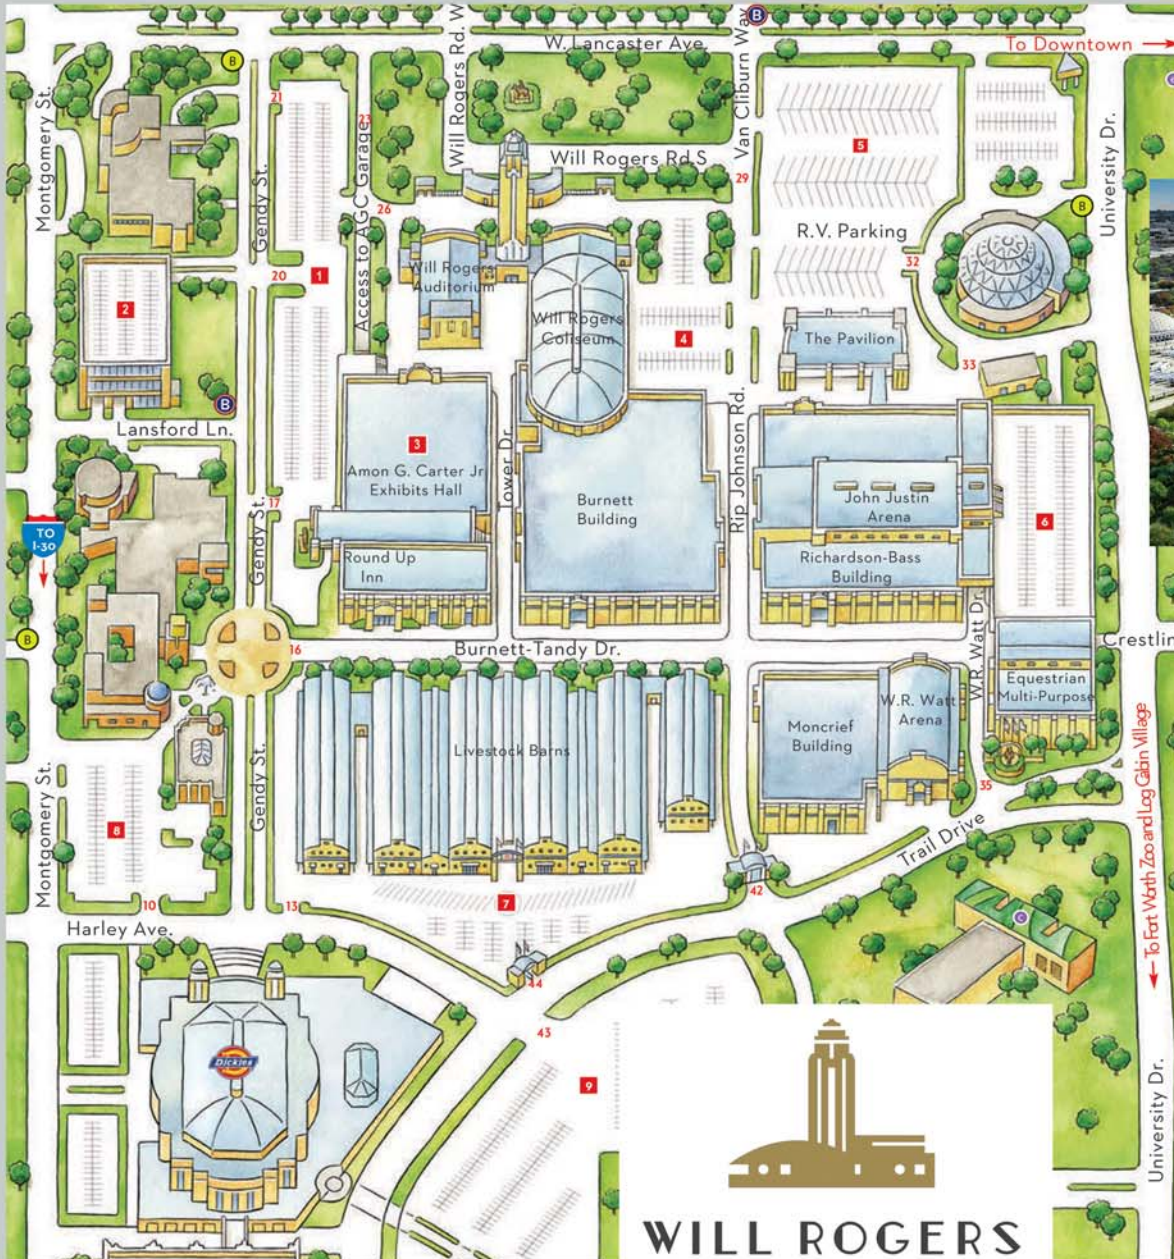

SUNDAY, AUGUST 27TH

7:00 a.m. Cattle load out can take place
Cattle must be off premises by Noon on Sunday the 28th

CATTLE SELLING

Cattle sell in catalog order

Additional details on all lots will be on the supplement sheet as of 8.25.2023.

SALE LOCATION

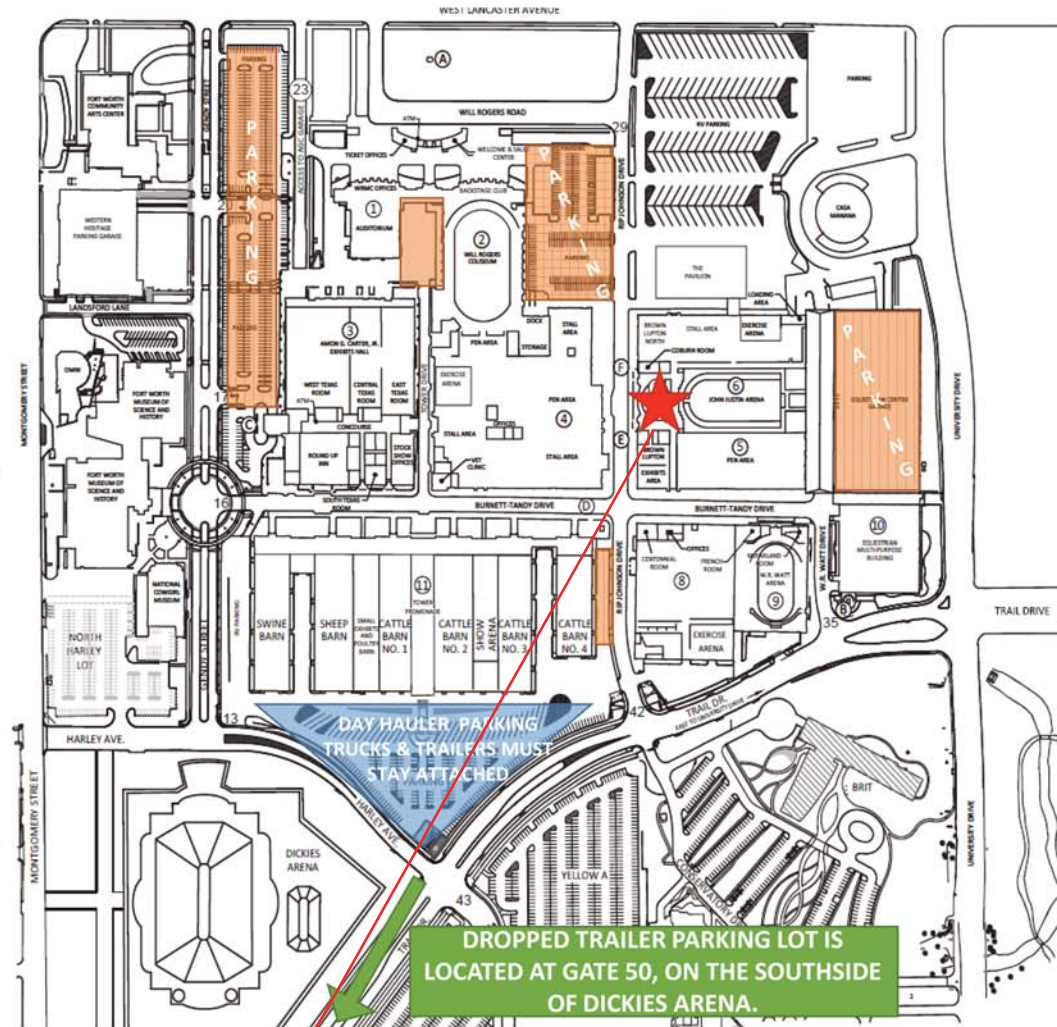

Will Rogers Memorial Center, Fort Worth, TX
1501 Rip Johnson Dr., Fort Worth, TX 76107

- 1 West/ Orange Lot
- 2 Western Heritage Garage
- 3 Amon G. Center Garage
- 4 East Coliseum/ Red Lot
- 5 North Red Lot
- 6 Equestrian Garage
- 7 South Red Lot
- 8 North Harley Lot

Trucks & Trailers: Please enter through **Gate 42 or Gate 16** and either park in the **Day Hauler lot (must stay attached)** or park in the **Dropped Trailer lot at Gate 50**.

Vehicles: Please enter through **Gate 42 or Gate 16** and either park in the **East Coliseum Lot, John Justin Parking Deck, small lot by Cattle Barn 4, West Surface Lot or West Coliseum lot**.

*** Sale cattle will be displayed in the Richard Bass Building! ***

**DV AUCTION**

Watch & bid online for FREE at DV Auction Buying online is as easy as 1, 2, 3 ...

1. Create an account at www.dvauction.com under the "register" tab.
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction — a DV Auction representative will notify you once you have been approved.
3. Tune in for the sale and make your purchases! After the sale, contact the sale manager or owner to arrange transportation and payment. High speed internet is required for successful bidding. Be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

PROXY BIDDING: If you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. The DV Auction full-time support team can also always be reached at 402.474.5557.

**LOAD OUT & DELIVERY**

Buyers are responsible for any cost pertaining to transportation of the live cattle. Randy Lathrop and David Tanner will work together with buyers to make this the easiest and most efficient process possible.

Each animal will be verified to the buyer via invoice paperwork and accompanied with a health paper to be approved for loadout. All live cattle must be off the sale site by noon on Sunday, August 27th immediately following the sale — either via new owner pick up or Lathrop Trucking.

LATHROP TRUCKING TRANSPORTATION - To coordinate trucking needs, please contact Randy Lathrop, 847.910.4673

ROUGHRIDE CATTLE SERVICES - To coordinate trucking needs, please contact David Tanner, 352.807.8203

**INSURANCE**

If you would like to purchase insurance, please contact James Bessler Insurance, 815.762.2641

**PAYMENT**

All lots must be paid for immediately following the conclusion of the Synergy Wagyu 20/23 Vision Sale. Both IN PERSON and ONLINE buyers are welcome to pay by cash, check, credit card (you will be charged a 3% fee on the total sum of your purchase), or wire.

**PAYMENT INFORMATION FOR ALL BUYERS**

| CASH

| CREDIT CARD (3% fee will be added) - please call Abby at 919.618.8098 to run your card information or request a quickbooks invoice to enter your information manually

| CHECK PAYMENT - please send with a tracking # to our Nashville office, PO Box 60097 Nashville, TN 37206

| BANK WIRE - wiring instructions will be available at the check out desk, or if you are an online buyer, these instructions will be send with your invoice.

**IN PERSON BUYER INFORMATION**

If you are a WINNING BIDDER, please follow these closeout steps:

- 1.) Visit the clerking table to get a printed copy of your invoice and receive all payment options and instructions. You cannot load out or set up trucking until you have been provided a copy of this invoice.
- 2.) Payment options—please let our clerking table know how you plan to pay for your purchase
- 3.) Collect heath papers on the live animals you purchased
- 4.) Set up trucking arrangements with Randy Lathrop, 847.910.4673 He will also be present at the sale.

IN PERSON BUYER INFORMATION

If you are an ONLINE WINNING BIDDER, please follow these closeout steps:

- 1.) You will receive a buyer invoice via email with payment options and instructions.
- 2.) Once you receive your invoice (check your spam), please send a text or email to confirm receipt with your name, invoice number, and your preferred method of payment to: Abby Hinton 919.618.8098, abby@wagyu365.com
- 3.) Once received, a member our Wagyu365 team will contact you if needed for payment assistance (applies to credit card or quickbooks payment links)
- 4.) All buyers are responsible for setting up trucking arrangements with Randy Lathrop, 847.910.4673; or organizing pick up details by noon on Sunday, August 27th following the conclusion of the sale on Saturday.

**MANAGEMENT**

Auction money and proceeds will be conducted under Randall O. Ratliff, DBA R & R Marketing, P.O. Box 60097, Nashville, TN 37206. Bond # 7901027402 (U.S. Department of Agriculture, Grain Inspection, Packers and Stockyards Administration Packers & Stockyards Program).

WELCOME FROM SYNERGY WAGYU

We extend a warm welcome to everyone within the Wagyu community, both domestic and international, and to breeders, feeders, processors, and beef industry representatives. It has been several long-awaited years to be able to host this event in its originally intended format.

The concept for Wagyu Vision was born four years ago in 2019 as an idea to play on the coming calendar year “2020” and “20/20 vision”. We envisioned hosting several speakers from Australia to present what was happening within the Wagyu sector in Australia. American breeders were just discovering the introduction of genomics and EBVs (Estimated Breeding Values) into the Wagyu breed in Australia. We were excited with the prospect of implementing these breeding tools in our herd and helping to introduce these tools to the US Wagyu community. The major breeds of beef and dairy cattle were already employing genomics to aid in making breeding and selection decisions. Unfortunately, just weeks prior to the 2020 Wagyu Vision Event scheduled for Ft. Worth, COVID – 19 started to change the course of activities worldwide. The Australian speakers were forced to cancel, and event venues became off-limits. To salvage the work already completed, and the commitment of sale consignors, the Wagyu365 sale management team quickly devised an alternative plan to take the sale online only. The venue was switched to the Vanderbilt hotel in Nashville. The Vanderbilt was one of a few open hotels in Nashville due to its proximity to the Vanderbilt hospital. On the day of the sale, we walked throughout the hotel without seeing anyone other than our sales staff and a literal handful of hotel staff. Now, three years later, international travel has opened and we are pleased to bring international speakers and guests to the US for Wagyu Vision 2023!

Our vision is to have an event that encompasses the whole Wagyu industry. We want to gather seedstock and commercial Wagyu breeders, Wagyu feeders, Wagyu processors, and Wagyu beef industry representatives in one location so that everyone can interact together on a personal level to increase their networks and business relationships and opportunities. The Wagyu breed is unique from other breeds, and we hope this event lends itself to this uniqueness and the opportunity to connect with others within the Wagyu industry.

The Wagyu industry is much more than just breeders, feed lotters, or processors. As a fledgling industry, we are much more interdependent upon each other than we may realize. We have a historic opportunity to embrace and capitalize upon something that will never occur within the beef industry again! The phenomenon that is sweeping this country and the world is special, as it has been driven by the consumer and is rapidly gaining momentum. We are at a point in time where the consumer is dictating what beef products they want, rather than the beef industry producing a product and then telling the consumer that this is what they must buy. The Wagyu product sells itself and consequently will drive the demand for Wagyu and Wagyu influenced cattle.

Wagyu provides an unprecedented opportunity within the beef industry. There are opportunities for seedstock producers, F1 and purebred producers, direct to consumer markets, direct to restaurants, farmers markets, online beef sales, feeder sales, fat cattle sales. No other breed offers this kind of profit opportunity to everyone, from very small breeders to large commercial cattle herds and feedlots.

We hope this event is a stepping stone for much greater things to come for everyone involved in the Wagyu cattle and beef industry. Thank you for your support and participation. We hope you thoroughly enjoy the day!

Loren and Mitchell Ruth

Synergy Wagyu

Dear Wagyu enthusiasts,

It is with great pride and pleasure that all of us at Wagyu365 welcome you to the 2023 Wagyu Vision Conference and Sale. We are more than excited to be working closely with the sale hosts, Synergy Wagyu. Synergy owner, Loren Ruth and his son Mitchell are leaders in the Wagyu Breed, and we have enjoyed getting to know them over the last few years! They are great stewards of the land and in animal husbandry, as well. They have traveled internationally for several years studying the genetics of Wagyu cattle and have implemented their knowledge into their own herd as well as made major investments. They work closely with several of their business friends and partners and have been forging ahead in creating some of the finest Wagyu in the land. They are working closely with their U.S. and International alliances to create the very best they can. This will be the 1st ever 2023 Wagyu Vision Conference and Live Sale! As you will read in these pages ahead, the speakers that will be head- lining this event are some of the most knowledgeable and well respected in their fields. They along with Loren and Mitchell will give us their prospective on the Wagyu breed and what lies ahead in the future.

The team at Wagyu365 are pleased to be branding and marketing this Unique and Special event and are so looking forward to seeing so many that have signed up to attend. We think you will be very impressed with the sale offering that is listed in this catalog. They are hand selected from leading herds that will bring attention to all the things that are great about Wagyu!

Please let any of us know if you have any questions in regards, to the sale lots and/or the details regarding the conference.

Best regards,

Randall O. Ratliff, Wagyu365 team member

**WELCOME
FROM
WAGYU365**

PRESENTER BIO'S

We are extremely pleased to introduce the speakers who will be sharing with us for Wagyu Vision 2023. They represent a wide cross section of the industry, from breed associations to breeders to feeder to international packer/processor to vertically integrated to consumer. Whatever our positions, it is beneficial to understand other segments of the marketplace. That knowledge helps us make wiser, more informed decisions regarding our own respective businesses. It was our intention in selecting these speakers to cover as much of the Wagyu marketplace as possible, helping to improve everyone's profitability.

MATT MCDONAGH, PH.D CEO AUSTRALIAN WAGYU ASSOCIATION

Matt McDonagh is CEO of the Australian Wagyu Association. Australia has been a driving force in the Wagyu breed, both from a genetics advancement perspective and as a Wagyu beef producing powerhouse. As the CEO of the Australian Wagyu Association, Mr. McDonagh has a unique view into the total workings of the breed: from membership to data collection and performance recording, and to marketing of the Wagyu breed.

LAIRD MORGAN ARUBIAL WAGYU BREEDER OF UNITED, BOND AND ANTICIPATED

Laird Morgan, Arubial Wagyu and Lillyvale Feedlot, brings a great perspective as both a breeder and feedlot operator. He has a tremendous opportunity to see the connection/correlation between genomic EBVs and actual feedlot and carcass performance. Mr. Morgan is also on the Board of Directors of the Australian Wagyu Association.

MEGAN ANGUS HEAD OF SPECIALITY BRANDS JBS USA

Megan Angus, JBS USA, is a truly international member of the Wagyu industry.

Megan Angus brings a wealth of knowledge and entrepreneurial experience to the JBS specialty beef brands. The aptly named Angus family were the first ranchers to introduce the Wagyu breed to South Africa. After building a strong cattle operation, Megan and her father established their own beef processing plant on their land and began to harvest and sell very high-quality Wagyu and Angus beef to foodservice and retail customers throughout South Africa and international markets. When the Angus family sold the plant and brand into a partnership with a large corporation, Megan became the Head of Operations. After emigrating to the U.S., she became the Head of Sales for Mishima Reserve Wagyu Beef® based in Seattle. Megan holds a B.A. in Marketing and a postgraduate diploma in Entrepreneurship from The University of Cape Town. She has been recognized with numerous awards as a leader in agriculture in South Africa. Her new role at JBS is focused around building strong beef brands to capture margin for various domestic and international initiatives.

REID MARTIN COO LONE MOUNTAIN WAGYU

Reid grew up with beef in his blood on his family cattle ranch and dairy farm in Northern California. He made his first trade for a beef heifer with his Dad when he was nine-years-old and has never looked back. Reid studied business and animal science at California State University at Chico and competed nationally on the university livestock judging team. Before joining the Lone Mountain Ranch team, he spent ten years in sales and marketing of branded beef throughout the Western US. When the chance came to work with Lone Mountain Reid jumped at the opportunity. He has come full circle in the business as his passion for Wagyu was ignited long before joining LMR, when he spent two years teaching English in Japan. There he learned the great care and attention to detail that the Japanese take to produce incredible Wagyu beef. At Lone Mountain Reid brings together his passion for cattle genetics, beef quality and delivering an amazing steak experience to consumers throughout the US. Reid has two children, Charlie and June, and loves to travel and grill Lone Mountain steaks on his Big Green Egg.

ROBERT WILLIAMS, PH.D EXECUTIVE DIRECTOR AMERICAN WAGYU ASSOCIATION

Robert Williams, the Executive Director of the American Wagyu Association, achieved his B.S. in Animal Science from Oklahoma State University and was honored as a Graduate of Distinction for his accomplishments there.

Following his experience in the beef industry, Williams pursued further education and obtained his M.S. and Ph.D. in Beef Breeding and Genetics from the University of Georgia. His research primarily focused on utilizing ultrasound technology for evaluating carcass quality and employing genetic selection methods to enhance fertility.

Williams played a pivotal role in introducing groundbreaking advancements to the U.S. beef industry. He spearheaded the development of the industry's first web-based customizable decision support and selection index, facilitated the creation of a comprehensive suite of carcass EPDs (Expected Progeny Differences) utilizing ultrasound as a correlated trait, and pioneered the concept of offering multiple options for whole herd enrollment programs to association members.

Throughout his career, Williams has been an active member of the Board of Directors for the Beef Improvement Federations (BIF). He has served as chairman for various committees, including the Live Animal Carcass and End Product committee, Frank Baker Award Committee, Eighth Revision of the BIF Guidelines, and currently holds the position of Historian. In recognition of his contributions, Williams received the esteemed BIF Continuing Service Award in 2005.

Williams also played a crucial role in the establishment of the Ultrasound Guidelines Council (UGC) for the seedstock beef industry. Serving as a founding director, he held the position of chairman or served on the board of directors from the council's inception in 2002 until 2015. Additionally, he contributed his expertise as a board member for the United States Livestock Genetics Export Association for a two-year term. Currently, Williams serves as the President of the US Beef Breeds Council.

Notably, Williams has authored or co-authored numerous research papers and educational articles. His dedication to promoting U.S. genetics on a global scale has led him to extensive travels and engagements as a beef cattle judge and invited speaker, both domestically and internationally.

Browarny
©

It is both amazing and hard to believe the incredible changes within the Wagyu breed since the Wagyu Vision 2020 Sale three years ago! Mayura Itoshigenami JNR genetics were not yet available. Now breeders have access to JNR grandsons! An SRI of +200 was special then, now we have surpassed +300, and an SRI of +400 will become the new +200. The introduction of EBVs and genomics has opened a whole new dimension to Wagyu breeders. Genomic EBVs have provided a selection tool that greatly enhanced our abilities and opportunities to select genetics that have very rapidly taken us to new levels of performance. Cattle breeding is a slow process and while performance data has identified elite maternal lines and cows/sires over the last several decades in the US and Australia, we now have tools to speed the rate of genetic gain and shorten generation intervals. For example, with the aid of genomics, we can make better informed selections between full brothers for sires/semen collection and between full sisters for ET/IVF work, or simply selecting what is retained as breeding stock and what goes to the feedlot. This saves valuable time and expense. We have a heightened ability to lower the risk and raise the success level of our breeding programs by incorporating pedigree evaluation, genomic EBVs, and performance data.

We all know that it costs as much to feed lower performing cattle as it does to feed the top performers. With that in mind, we wanted to provide a sale offering that would offer cattle that raise the average genetic and performance levels of the herds into which they will be introduced. We have put together an outstanding lineup of live cattle that will fit a wide range of breeding programs, from commercial-minded meat production to elite seed-stock programs. The pedigrees are extremely solid, with outstanding maternal lines supported by very strong sire stacks and genomic EBVs. The sale lots have a very wide range of sires which provide genetic investment opportunities for any breeding program. Progeny from well over a dozen sires are in the sale! Diversity will be key to successful breeding by providing more options for the individual breeder and the Wagyu breed.

We are very thankful to the consignors! They dug deep into their breeding programs and provided cattle that present excellent investment opportunities! We have participation from international consignors that truly make this a special sale. The females and bulls are the right age to begin making an immediate return on investment and will have an immediate impact within their new herds. The embryo lots are tremendous opportunities to lay exceptional foundations for the future with elite, proven maternal lines and superior sire stacks. The semen offerings present investment opportunities ready to go straight to work in flush or AI programs. We are extremely pleased to present this Wagyu Vision 2023 Sale offering!

Loren and Mitchell Ruth
Synergy Wagyu

2023 WAGYU VISION SALE COMMENTS

WAGYU BREEDPLAN EBVS

AUSTRALIAN WAGYU GENETIC ANALYSIS

Wagyu BREEDPLAN is the genetic evaluation program implemented by the Australian Wagyu Association, which uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of performance and pedigree recorded cattle for a range of economically important production traits (e.g. weight, carcass, fertility). More than 600 scientific publications have been produced describing BREEDPLAN and its implementation for driving genetic progress across cattle breeds.

Wagyu BREEDPLAN includes pedigree, performance and genomic information from the Australian Wagyu Association's database, which is the largest globally available Japanese Black database, to evaluate the genetic merit of animals.

The Wagyu BREEDPLAN analysis provides the most thorough and accurate assessment of fullblood Wagyu genetics available outside Japan. The analysis includes over 250,000 registered Wagyu animals with 170,000 dams and 24,000 sires. In addition, there are 59,000 animals with birth weights, 64,000 with weaning (200-Day) weights and 48,000 with 400-Day weights. Carcass data includes 29,000 carcass weights, 19,000 carcass EMAs and a total of 27,500 carcass AUS-Meat marble scores, camera marbling percent and camera fineness index measures.

ESTIMATED BREEDING VALUES (EBVS)

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, it is possible to make good estimates based on the performance of the animal and its progeny. These are called Estimated Breeding Values (EBVs) and are therefore the best estimate of an animal's genetic

merit. EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the Wagyu BREEDPLAN genetic evaluation and are reported in the units in which the measurements are taken.

Estimated Breeding Values for an animal may change as additional performance data or genotype information is provided for that animal or animals within that animal's pedigree. It is not unusual for EBVs to change, particularly where the EBVs are low accuracy (<50%). For hard to measure, or traits that can only be measured late in life, such as carcass and meat quality traits, EBVs provide the best estimate of an individual's genetic merit early in life to help inform management decisions.

Submission of performance data can have a large bearing on the estimate of an animal's genetic merit over its life and this will impact the genetic merit of the animal's progeny. As the accuracy of an EBV improves over time (along with more data and genotype information), EBV values will be more constant. Please refer to the section on Accuracy within this guide for additional information.

USING EBVS TO COMPARE ANIMALS

Wagyu BREEDPLAN EBVs can be used to estimate the expected difference in the genetics of two animals. The expected difference equals half the difference in the EBVs of the animals, assuming they are used in the same way (i.e. they are joined to the same animal/s). For example, a bull with a 200 Day Growth EBV of +20 would be expected to produce progeny that are, on average, 5 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +10 kg (i.e. 10 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

BENCHMARKING AN ANIMAL WITHIN THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Wagyu animals. To benchmark an animal's genetics relative to other Wagyu animals, the EBV can be compared to the breed average EBV for the trait or the percentile table.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analyzed for that animal or its relatives.

ACCURACY RANGE INTERPRETATION

Less than 50% = Low accuracy and should be considered a preliminary estimate. The EBV could change substantially as more performance information becomes available, however the EBV is still the best guide for genetic merit of the animal at that point.

50 - 74% = Medium accuracy, usually based on the animal's own performance records, genomics and pedigree.

75 - 90% = Medium-high accuracy and also includes some progeny information. Becoming a more reliable indicator of the animal's true value as a parent.

90% and above = High accuracy associated with a large amount of performance and progeny information.

FERTILITY AND BIRTH EBVS

SCROTAL SIZE EBV (SS) (CM) an indicator of male fertility (semen quality and quantity) in Western breeds of cattle. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation (desirable) with the age of puberty and fertility in female progeny. The relationship between scrotal size and fertility in Wagyu is assumed, but not proven.

GESTATION LENGTH EBV (GL) (DAYS) based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to lighter birth weights and easier calving.

BIRTH WEIGHT EBV (BW) (KG) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

GROWTH EBVS

200-DAY MILK EBV (MILK) (KG) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200-DAY GROWTH EBV (MILK) (KG) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-DAY WEIGHT EBV (400) (KG) is calculated from the weight of animals taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-DAY WEIGHT EBV (600) (KG) is calculated from the weight of animals taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MATURE COW WEIGHT EBV (MCW) (KG) (kg) is based on the weight of the cow when the calf is weighed for weaning, adjusted to five years of age. This EBV is an estimate of the genetic difference in cow weight at five years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Breeders of steers wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

CARCASS EBVS

CARCASS WEIGHT EBV (CWT) (KG) is based on abattoir carcass records and live weight measurements (particularly 600 Day weight) and is an indicator of the genetic differences in carcass weight at the industry average slaughter age of 990 days. Larger positive values are more favorable.

EYE MUSCLE AREA EBV (EMA) (CM²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 420kg dressed carcass. A higher positive EBV indicates larger eye muscle area and therefore higher retail beef yields. Ultrasound, AUSMeat and Japanese Digital Image Camera measured Eye Muscle Areas from slaughter animals contribute to this EBV.

RUM FAT EBV (RUMP) (MM) estimates the genetic differences in fat depth at the P8 site of a 420kg dressed carcass. A higher positive EBV indicates more subcutaneous fat and earlier maturity.

RETAIL YIELD PERCENT EBV (RBV) (%) estimates the genetic differences in total (boned out) meat yield as a percentage of a 420kg dressed carcass. A higher positive EBV indicates higher percentage yield for the 420kg carcass weight.

MARBLE SCORE EBV (MS) (AUSMEAT MARBLE SCORE) is an estimate of the genetic difference in the AUSMeat Marble Score in a 420kg carcass. Marble Score EBV utilizes AUSMeat Marble score on a scale of 1 to 10 where 10 is equivalent to an AUSMeat Marble Score grading of 9+. Where results from the Meat Image Japan digital carcass camera are available, Camera Marbling Percentage and Marble Fineness are also used to calculate Marble Score EBV as the genetic correlations between these measures and AUSMeat Marble Score are very high. Larger positive values are more favorable.

MARBLE FINENESS EBV (MF) (MARBLING FINENESS INDEX) estimates the genetic differences in the Marbling Fineness Index (degree of fineness of marbling fat) as measured by the Japanese Digital Image Camera. A higher more positive EBV indicates higher levels of marbling fineness.

WAGYU BREED OBJECT INDEXES

BreedObject \$Indexes, which utilize Wagyu BREEDPLAN EBVs, are now available and allows selection of Wagyu seedstock based on profitability for different commercial production systems. Four Wagyu BreedObject \$Indexes have been developed to date:

Self-replacing Breeding \$Index (SRI) Wagyu Breeder \$Index (WBI)
Wagyu Fullblood Terminal \$Index (FTI) Wagyu F1 Terminal \$Index (F1I)

Each of the \$Indexes are targeted specifically to a defined Wagyu production and market scenario and producers should identify and use the index that best suits their purpose. It is not appropriate to compare index values of different \$Indexes as they are based on different production model assumptions. It is not the index with the highest \$ value that you should use, it is the index that best reflects your production system.

BreedObject \$Indexes target economic breeding objectives based on average herd and market conditions and have generally targeted the main markets within the main production systems, combining genetic information within BREEDPLAN into one EBV for each \$Index that considers production costs and realized value.

SELF-REPLACING BREEDING INDEX (SRI)

The Self-replacing Index can be used to select fullblood bulls that will produce more profitable females when these are retained in fullblood or purebred herds, in addition to profitable slaughter progeny.

The SRI estimates the genetic differences between animals in terms of net profitability per cow joined for production of replacement females and slaughter steers to a carcass weight of 435kg at 32 months of age and a 385kg carcass from surplus heifers at 29 months of age. In terms of relative economic importance, the SRI places the following

emphasis on these main traits: 41% on marble score (MS); 14% on Residual Feed Intake (RFI) feedlot; 12% on sale liveweight (which will reflect the growth potential and therefore carcass weight of an animal); 9% on meat yield; 6% on dressing percentage and 23.5% placed on other cow and calf traits.

WAGYU BREEDER INDEX (WBI)

The Wagyu Breeder Index estimates the genetic differences between animals in net profitability per cow joined in a commercial fullblood or purebred self-replacing herd that has a low-input, grass-based production system. Heifers are retained for breeding and steers and surplus females are sold as feeders for feedlot finishing.

Steers are assumed to be slaughtered at 32 months after 550 days of feedlot finishing targeting 460kg carcasses.

Heifers are retained for breeding and therefore maternal traits are of importance. Marbling is targeted at breed average with optimized growth.

In terms of relative economic importance, the WBI places the following emphasis on these main traits: 37% on marble score (MS); 12% on sale liveweight; 9% on meat yield; 7% on dressing percentage and 13% placed on other cow and calf traits.

FULLBLOOD TERMINAL INDEX (FTI)

The Fullblood Terminal Index has an increased weighting on the Marble Score EBV and can be used to select bulls to produce profitable slaughter progeny where none are retained for breeding.

The FTI estimates the genetic differences between animals in terms

of net profitability per cow joined based on production of slaughter stock only, with a 435kg carcass from steers at 32 months of age and a 385kg carcass from heifers at 29 months of age. In terms of relative economic importance, the FTI places the following emphasis on these main traits: 64% on MS; 11% on Residual Feed Intake (RFI) feedlot; 9% on sale liveweight; 7% on meat yield; 5% on dressing percentage and 3% placed on other young animal traits and 0% on maternal traits.

F1 TERMINAL INDEX (F1I)

The F1 Terminal Index has an increased weighting on the Marble Score EBV and can be used to select bulls to produce profitable F1 slaughter progeny where none are retained for breeding.

The F1 Index estimates the genetic differences between animals in terms of net profitability cow joined based on production of a 420kg carcass from steers and a 387kg carcass from heifers at 28 months of age. In terms of relative economic importance, the F1 Index places the following emphasis on these main traits: 68% on MS; 9% on Residual Feed Intake (RFI) feedlot; 4% on sale liveweight; 6% on meat yield; 4% on dressing percentage and 9% placed on other young animal traits and 0% on maternal traits.

GENETIC CONDITIONS IN WAGYU CATTLE

KNOWN GENETIC CONDITIONS OF WAGYU:

All breeds of cattle, have undesirable genetic conditions. Fortunately, advances in molecular genetics have facilitated the development of DNA tests for the conditions which enable them to be managed. Breed societies are at the forefront of developing strategies to manage undesirable genetic conditions and seedstock members are leading the industry with their uptake of this technology.

SPHEROCYTOSIS (B3) - Cattle that are homozygous (two copies of the recessive allele) have pernicious anemia (bleeding caused by the abnormal red blood cells). Death normally occurs within the first seven days after birth. Some cases live to adulthood but there is a severe retardation in growth.

CHEDIAK HIGASHI SYNDROME (CHS) - Cattle that are homozygous (two copies of the recessive allele) have a reduced immune response to disease which reduces their ability to resist bacterial infection. Blood is slow to coagulate so often the first indicator is unusual umbilical cord bleeding at calving. Cattle with this syndrome often have an unusually pale coat color.

CLAUDIN 16 DEFICIENCY (CL16) - Cattle that are homozygous (two copies of the recessive allele) have terminal kidney failure and the onset can occur any time from late adolescence. Cattle are unlikely to live more than six years.

FACTOR XI DEFICIENCY (F11) - Cattle that are homozygous (two copies of the recessive allele) show prolonged bleeding time after castration or dehorning. It is also possible that Carrier x Carrier matings have increased difficulty producing viable fertilized embryos or full term pregnancies and may be repeat (return to cycle) breeders.

NOTE - This is generally a non-lethal recessive condition with affected animals being able to live as normal.

IARS DISORDER – Also known as perinatal weak calf syndrome, the disorder results in death within the last few weeks of gestation or few days of life. A mutation in the IARS gene (isoleucyl-tRNA synthetase) causes a reduction in activity of the enzyme for protein synthesis for a developing embryo and newborns. Calves affected by this disorder exhibit anemia, depression, weakness, variable body temperature, difficulty nursing, growth retardation, and increased susceptibility to infection.

CONSIGNOR PROFILES

ARUBIAL WAGYU SELLING LOT 82

Arubial Wagyu is a family owned registered fullblood Wagyu herd, operating alongside a substantial farming and feedlot enterprises. Arubial Wagyu runs a growing herd of 3500 breeding females. Arubial Wagyu are advocates for objective measurement, and full transparency. We pursue excellence in the arena of data harvest and reporting, giving our clients the tools to make breeding decisions based on fact.

LA ROCA RANGE

SELLING LOT 33, 42A, B, 77 & 87

Our focus is on raising high quality wagyu for the seedstock producer as well as meat for consumers. We've incorporated genetics from the east coast to the west coast of the United States as well as Australia and use these genetics to create well balanced cattle. Our established angus herd helps us in the creation of F1s as well as supporting an extensive AI and embryo transfer program. Rick Beard (owner) as well as Steve Frisina (herd manager) and Kari Von Krosigk (breeding coordinator) are very excited about what the marbled future has in store for the ranch as well as the breed.

LONE MOUNTAIN RANCH

SELLING LOTS 5, 12, 17, 27, 29 & 36

The mission of Lone Mountain Ranch is to create the best possible genetics of American-Raised Fullblood Wagyu while educating domestic Ranchers on the unique qualities of this majestic breed. By sharing scientific research and industry information, our goal is to help pioneer Wagyu into one of the great breeds of the American landscape. Located in Golden, New Mexico, our Ranch has been raising Fullblood Wagyu cattle since the early 2000s. Our Wagyu program was developed upon extensive research. Sharing this knowledge with other breeders and ranchers has positioned Lone Mountain Ranch as an important thought leader in the American Wagyu field, as we've developed an industry-leading genetics program and Fullblood Wagyu herd.

M6 RANCH

SELLING LOT 98

Kevin and Jessica Moore are the owners and managers of the M6 Cattle Company, LLC., also known as M6 Ranch Wagyu. Kevin and Jessica are having a blast marketing ranch raised Wagyu beef and genetics. The Moore family has bred and marketed seedstock cattle since 1971. Kevin and Jessica diversified into the Wagyu breed in 2014. The M6 Ranch had its first Wagyu production sale in 2017 and the first Wagyu cattle sale in the United States with Genomic Enhanced EBVs for every animal in 2021. In 2022, the M6 Ranch had the first Stand-Alone Wagyu bull sale in north America.

Now the M6 Ranch has an annual production sale the first Saturday in April every year featuring top 1% genetics. The M6 Ranch Wagyu beef is featured at Farmers Markets in addition to selling beef straight out of the freezers on the M6 Ranch. The M6 Ranch also sells cattle and frozen genetics privately in the summer and the fall. This year the M6 Ranch will have its first Wagyu frozen genetics sale on October 8th, 2023.

QUARRY HILL WAGYU

SELLING LOTS 35 & 49

Quarry Hill Farm is a family owned and operated farm located in Harleysville PA. The Perlman family made the decision to get into the farming business with the mission of feeding the hungry, while also providing the most ethically raised, high-quality beef. Cattle at Quarry Hill Farm have pedigrees from some of the best Wagyu bloodlines from across the country. In our effort to create a herd that is hearty, high yielding, and top quality, we have researched and connected with several well respected ranchers and top breeders. Along with all of that and our breeding program/ sustainable practices, we believe we have successfully achieved this. We are grateful for the supportive Waygu community and all of the wonderful connections we have made thus far. We look forward to continuing to serve you, while also maintaining our mission of feeding the hungry.

SYNERGY WAGYU

SELLING LOTS 2, 6, 9 - 11B, 13A - 16, 18 - 26, 28, 31, 33, 34, 37, 38, 44 - 47, 51 - 59, 63, 67, 68, 72 - 77, 83 - 85, 89, 91, 96 & 96

Synergy Wagyu focuses on breeding high genetic merit Wagyu cattle through the stacking of elite proven and genomic sires on highly proven maternal lines (cow families). We utilize our diverse base of donors to produce genetics that fit crossbred, purebred, and fullblood production. Our genetics program fuels our F1 and fullblood beef production marketed under our Stonyrun Farms branded beef line.

TM LAND AND CATTLE

SELLING LOT 30

TM Cattle and Land is a Full blood Wagyu Breeder located in North Central Texas. Partners John Sisco and Gary Stevens are committed to raising 100% Full blood Wagyu Cattle, with top 1% EBV's, free of recessive genetic conditions. Our Ultimate goal is to help to improve the Wagyu Breed by using pedigree, performance data and genomic information to produce new, world class, defect free, sires and dams.

TOP WAGYU

SELLING LOT 50

Top Wagyu is a breeding company for Wagyu cattle. Marcel Merz from Switzerland and Bernd Neuhaus from Germany are the two founders. The main goal is to produce top genetics to build up our Wagyu herd in Europe. But we also share our genetics with other breeders. Top Wagyu has a growing herd in Australia starting with 20 animals, both poll and horned. We have embryos and semen available from these genetics.

WAGYU EVOLUTION

SELLING LOTS 1 & 8

Wagyu Evolution, a Morace Cattle Co. brand, represents a transformative journey from our humble beginnings as a family farm to a driving force in the Full blood U.S Wagyu industry. As we recognized the limitations of traditional practices, we boldly decided to embrace science, data, and genetics, propelling us into a new era of excellence.

Our journey began with a simple goal: providing our friends and family access to high-quality Wagyu beef in America. However, as we expanded our operations, our vision broadened. We realized that by harnessing the power of science and data, we could make significant advancements in the breed and bring true Japanese-quality Wagyu to our backyard.

With an unwavering commitment to ongoing research, development, and expansion of our breeding program, we have become pioneers in the field. Our focus now lies in improving the genetics of every subsequent generation, ensuring that each animal represents the pinnacle of Wagyu excellence.

We employ cutting-edge technologies and embrace sophisticated breeding software, statistical probability models, and artificial intelligence to achieve this. By tracking donors at an enterprise level and utilizing advanced genetic analysis, we unlock the true potential of each individual animal and make informed breeding decisions.

Wagyu Evolution stands firmly on the belief that we can reshape the breed's future through our dedication to science and genetics. We constantly push the boundaries of what is possible, always striving to bring the highest-quality Wagyu beef to the American market.

Join us on this evolutionary journey as we redefine the possibilities of Full blood Wagyu genetics in the U.S. Together, we can create a future where Japanese-quality Wagyu is no longer an ocean away but a reality in our backyard.

Wagyu Evolution: Shaping the Future of Full Blood Wagyu Genetics in the U.S, One Generation at a Time.

WAGYU GROUP BREEDPLAN JULY 2023 RUN 1

| PURCHASER

| PRICE

- M6 RANCH P342 HIKOKURA 318L is the #1 \$SRI animal (male or female) in the U.S.A. and tied for #10 \$SRI female in the world according to the July (run 2) 2023 BREEDPLAN. 318L is FREE of ALL recessive genetic disorders. She has top 1% genetics for Marble Score, Retail Beef Yield, Gestation Length and ALL four \$Profit Indexes. 318L combines those top 1% genetics with top 5% genetics for Marble Fineness and ALL five Growth traits. She is no doubt extremely valuable, unique, special and one of a kind! Her sire, ARUBIAL UNITED P0342 is the #1 \$SRI sire in the world. His progeny have set records for value here in the U.S.A.. Two six-month old full-sibs sired by United brought \$400,000 and \$325,000 for Triangle B Ranch in March 2023. M6 RANCH P342 HIKOKURA 318L is genetically more valuable with the best \$SRI of any animal in the U.S.A.. She stims from the highly-proven Hikokura maternal line and both her dam, O68H, and maternal grand dam, 1292Y are well-balanced, stout-made, and heavy-milking Wagyu cows.
- The M6 Ranch is selling ½ interest in M6 RANCH P342 HIKOKURA 318L. The buyer will receive ½ of her embryo production and re-sale value. Her natural born calves will be jointly owned with the M6 Ranch for future embryo production, natural calves and/or sell purposes. At no expense to the buyer, the M6 Ranch will manage her embryo work and breeding. The buyer is responsible for ½ of the embryo production expenses, semen and daily care.
