SALE ORDER & SUPPLEMENTAL INFORMATION ...

Sale order is catalog order! Any additional information or corrections to the printed sale catalog will be available online at www.wagyu365.com

AIR TRANSPORTATION ...

Las Vegas, Nevada Airport (LAS)

WATCH & BID ...

Watch & bid online for FREE at DV Auction

TERMS & CONDITIONS ... Cattle will sell under the standard terms and conditions.

EMBRYO GUARANTEE ... Any embryos sold as stated and are not guaranteed on conception. All embryo lots will have statements regarding each with their descriptions.

REGISTRATION, TRANSFERS & EMBRYO TRANSFERS ... Within 60 days of the date of the sale, the cattle sold will be transferred (registrations) to the new owners through the offices of the American Wagyu Association & American Akaushi Association. The fee is paid for by the seller.

PAYMENT ... All lots must be paid for immediately following the conclusion of the Wagyu and Akaushi "On the Strip" Sale, unless prior payment arrangements have been made with any representative of Wagyu365. Buyers are welcome to pay by credit card. If so, you will be charged a 3% fee on the total sum of your purchase.

DELIVERY ... Buyers are responsible for any shipping cost pertaining to embryo purchases and transportation of the live cattle. Wagyu365 buyers and sellers will work together to make this the easiest and most efficient process possible. Export details are listed on each lot.

LIVESTOCK MORTALITY INSURANCE ... Any representative of the Wagyu365 team can assist any buyer with insurance regarding their purchases.

LIABILITY ... All persons attending the sale, do so at their own risk, legal or otherwise for their safety. The consignors, sale management, and sales staff assume no responsibility or liability for property loss or any accidents that may occur.

\$5,000 GIVEAWAY

All in-person sale attendees will be eligible to win a sale credit up to \$1,000!

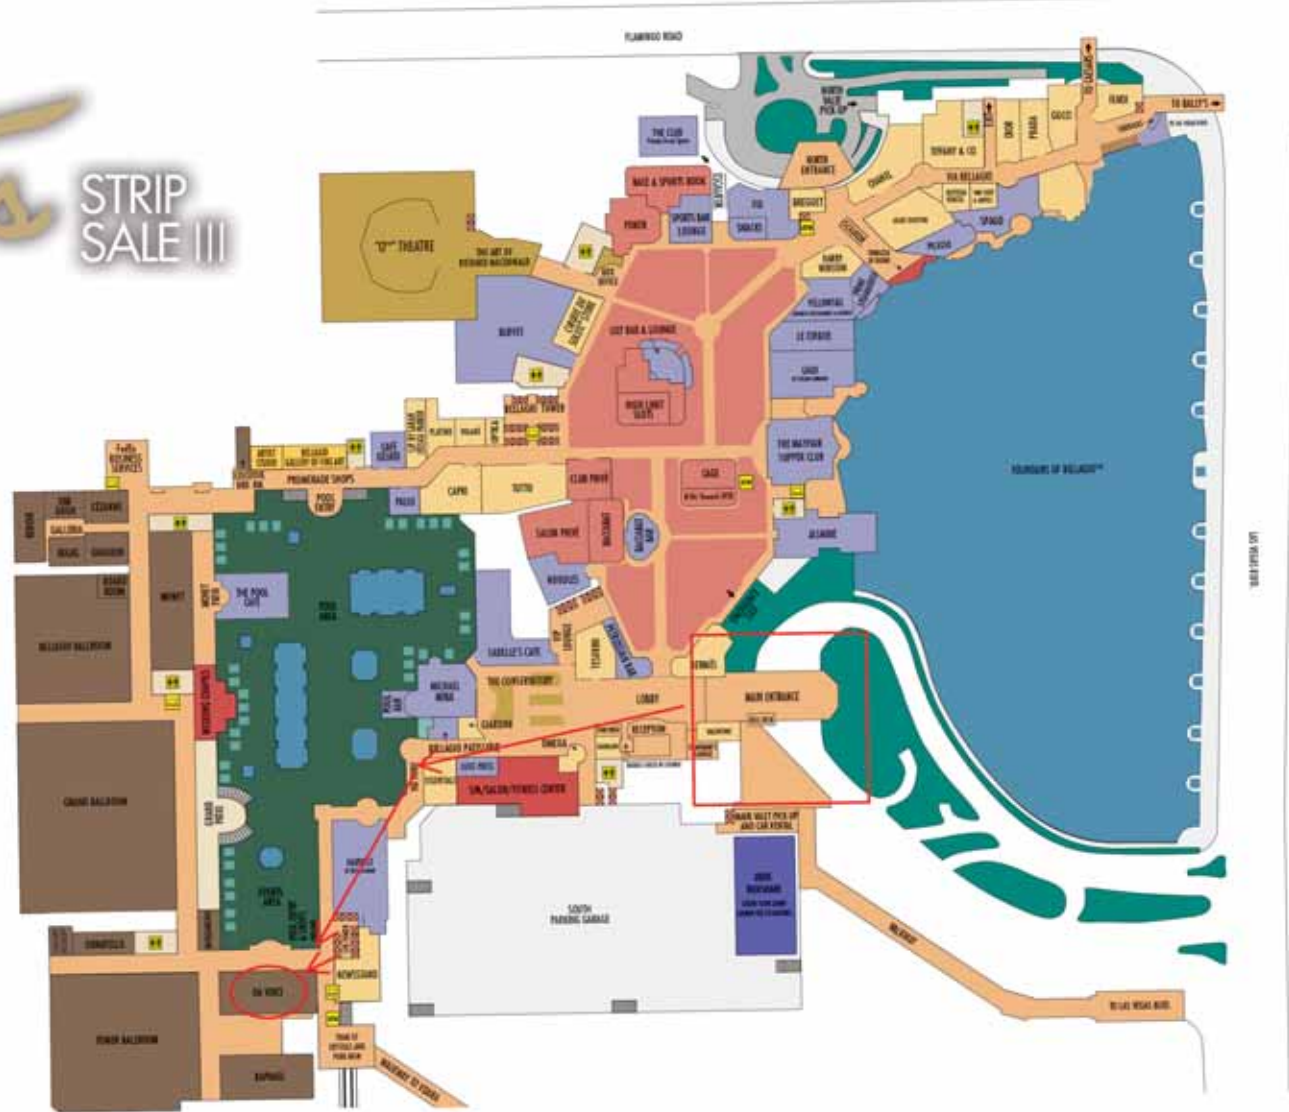

WAGYU & AKAUSHI

Auction money and proceeds will be conducted under Randall O. Ratliff, DBA R & R Marketing, P.O. Box 60097, Nashville, TN 37206.

Bond # 7901027402 (U.S. Department of Agriculture, Grain Inspection, Packers and Stockyards Administration Packers & Stockyards Program).

Contact Abby@wagyu365.com for any questions in regards to payment.

The American Wagyu Association reserves the right to accept or refuse any advertising or copy at its sole discretion. All advertising through the American Wagyu Association is a benefit of membership and must promote the best interests of the American Wagyu Association. For more information contact the office of the American Wagyu Association.

DVAUCTION

Watch & bid online for FREE at DV Auction Buying online is as easy as 1, 2, 3 ...

1. Create an account at www.dvauction.com under the "register" tab.
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction — a DV Auction representative will notify you once you have been approved.
3. Tune in for the sale and make your purchases! After the sale, contact the sale manager or owner to arrange transportation and payment. High speed internet is required for successful bidding. Be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

PROXY BIDDING: If you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids.

We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. The DV Auction full-time support team can also always be reached at 402.474.5557.

Dear Wagyu Enthusiasts,

It is with great pride and pleasure that Wagyu365 welcomes you to the Wagyu and Akaushi "Vegas On The Stripe" Sale. The team members of Wagyu365 have worked closely with the select few Wagyu and Akaushi breeders in solidifying their entries for this unique sale. We couldn't be more pleased with the amount of interest in the promotion and the betterment of the Wagyu Breed. As you review the sale catalog, you will find some of the finest registered Wagyu and Akaushi cattle available for sale. These breeders have worked hard to showcase their genetics to the highest level to highlight in this sale. The consignors have outlined their thoughts on each of their lots and we look forward to showcasing them in the sale. Make plans to join us for this special sale event

on December 11th. We start the day at 8:30 a.m thru 11:00 p.m. with Industry speakers which are highlighted in this sales catalog. We will then have a social hour at 1:00 p.m. with the sale starting at 2 p.m. We are hoping you can attend the sale in person, but if you are unable, we urge you to log onto www.dvauctions.com to participate. If you have any questions in regards to the sale, please feel free to contact me or any of my team members at Wagyu365.

We look forward to hosting one of the most premier Wagyu and Akaushi events to ever happen!

Thanks in advance,
Randall O. Ratliff

WAGYU GROUP BREEDPLAN NOVEMBER 2023 RUN 1													

- LMR Ms United 3644L is the inaugural United sired heifer offered by Lone Mountain! She immediately catches your attention with elite Top 1% figures for SRI \$347, WBI \$355 and Top 5% for FTI \$260 and F1T \$220. This recessive FREE female offers tons of growth potential and will add pounds and profit. Her sire, Arubial United P0342 is a son of Simon Coate's super bull, Michifuku F126 — United's genomically enhanced EBVs are powerful and impressive across the board but especially in respect to growth: 600 day Wt EBV +84 and Carcase Wt EBV +73 — both in the top 1% of the breed — plus a Marble Score in the Top 3% with an EBV of +2.5 and incredibly United ranks in the Top 1% for ALL Indexes (WBI, SRI, FTI & F1T): \$429, \$424, \$346, and \$297.
- 3644L's dam, LMR Ms Itoshigenami 6535D, is an excellent TF148 donor. She has produced 93 embryos in 16 flushes and 37 offspring to date. She brings balance and carcass merit across her pedigree and EBV profile. In addition she has a huge EMA (+8.6).
- 3644L sells open.

- Wow, check out this incredible foundation bred CHR female with elite GEBVs too! Her pedigree reads TF 148 x Sanjiro 3 x TF 151 x Sanjiro x JVP 400 x Yasuyoshi 410. This is the maternal line that has produced many elite bulls in the USA. Including the renowned proven bull CHR Shigesigetani 5, who is a maternal brother to the dam of T1009. She has top EBVs including a 2.6 MS, 10.4 EMA, .39 MF, and \$262 SRI (November Run 1)! All top 1-5% traits in the breed. Take this donor dam home and build a program with her.

- Free of all genetic conditions
- At \$341 SRI, U14, is one of the highest SRI live female in the sale! It also puts her in the top 30 females in the USA. She is sired by Arubial United who needs little introduction since he has taken the breed by storm. His elite proven performance with carcasses now coming in through the Arubial herd gives confidence in his \$424 SRI, 2.5 MS, 6.9 REA, and 73 CW!
- United is paired with one of our top donor dams here in 532G to produce this heifer! 532G is unmatched in the US in that she has six progeny from 4 different all over \$320 SRI. The four different sires are JNR, L195, L10 and United! She makes good ones! 532G is one of the oldest Sumo F154 daughters in the US as she is the result of an embryo imported from Synergy's Australian program. She is from the Chiyotake maternal line, one of the most successful Takeda families. U14 carries in her mothers footsteps with tremendous balance featuring a \$341 SRI, 2.4 MS, 3.4 REA, 51 CW, .50 MF, 1 Milk, and moderate 3.8 BW (November Run 1). She is one of only 4 females in the world to that minimum line for those traits and that maximum BW!

- Bull of buyer's choice. Guaranteed minimum of 4 embryos, no maximum.
- Sell a successful conventional flush. Defined as a minimum of 4 quality embryos. 0353H will be set up to flush at the M6 Ranch on January 10th, 2024. The buyer is responsible for all flush/freeze expenses and providing a minimum of 2 units (prefer 3 units) of semen for fertilization. A prorated refund will be returned if less than 4 quality embryos is achieved.
- 0353H is the \$100,000 female sale topper at the Fall 2022 TWA Sale. She is the #2 \$F-1TI dam in the U.S.A. who is FREE of all genetic disorders and the #6 \$SRI dam in the U.S.A.. The only time a flush in this industry leading dam has been offered was at the 2023 M6 Ranch Sale and it commanded \$30,000. 0353H has top 1% genetics for EMA, Marble Score, \$FBTI and \$F-1TI. She is a beautiful-uddered, heavy-milking "L10" daughter who stems from the rare CHISAHIME maternal cow family. This is an opportunity to go straight to the top of this industry. Get a genetic head start on the best this breed has to offer and never look back.

- Never been offered for sale to the public! The original Itomichi bull that sired so many of Shogo Takeda's legendary foundation cows. Itomichi was born in January, 1981 in Akagi Cho, Shimane Prefecture, and was raised by Kenji Mukunoki (No.2 wagyu breeder in Japan) in Masuda City, Shimane Prefecture. In 1983, Takeda farm purchased Itomichi and has used him for priority breeding since. Before Itomichi's offspring became available, the average carcass value of Takeda Farms cattle was 960,000 yen per head. Itomichi's offspring has raised the value to 1,060,000 yen per head. In addition, the offspring resulting from the inbreeding program between Itomichi BMS and his daughters are worth at least 1,220,000 yen per head. This is the reason why Takeda farm uses Itomichi extensively for the Takeda breeding, cross-breeding and inbreeding program. This is a once in a lifetime opportunity to acquire semen from this breed legend sire!

• Check out this heifer calf! She has a simply amazing pedigree. She descends from super JVP Kunisakae on her maternal side. Her sire, Rueshaw, is one of the very first 4 import bulls. One of the other four original imports was Judo — and he is the fourth sire back on the maternal side of this heifer. When you glance at her pedigree you see some of the most influential sires of all time besides Rueshaw and Judo. You will find Red Emperor, Umemaru, Big Al, and Hikari all stacked on the maternal side of this young heifer, along with foundation females Akiko, Marunami, Kaedemaru, and Kuniaso. This is a beautiful investment opportunity!

- Wow! These embryos can never be made again! They are a true staple of breed history. The dam Marunami is the original import cow that had the stamp of approval for breed improvement in Ku-mamoto Japan before her export! Marunami is the legendary dam of Tamamaru and Red Emperor, making any resulting calves maternal siblings to these legendary bulls!
- Big Al was the first bull born outside of Japan in January of 1995. Big Al is the legendary Dai 10 Mitsumaru 76 son of Akiko and is highly proven with elite EPDs. To this day Big Al has top 30% growth and maternal EPDs along with top 10% carcass EPD for Ribeye Area, Marbling, and Car-cass Index! On top of his fantastic EPDs, he is known for making incredible females with growth, strength, maternal traits, and longevity. Big Al is considered by many to be the greatest Akaushi bull of all-time!

- Direct embryos from Akiko, the queen of the breed herself! These embryos are a mind blowing chance to acquire direct progeny of the most prolific cow to have ever been exported from Japan! The resulting calves will be maternal siblings to Big AI! You will have breeders knocking down your door to access these genetics. Secure them now because it is 2023 and this wont likely ever be a chance to get these again!
- One of the three imported bulls that came to the United States from Japan. Shigemaru is the most widely used of the sire lines for his breeding versatility. He is known for moderating frame size, adding body mass and structural width in his progeny. His daughters are built broody, good footed and are high maternal performers. Use Shigemaru with confidence in laying a good foundation of growth and maternal genetics.

- LMR Bond 2596K is an elite Bond sired herd bull prospect from the heart of the LMR breeding program. 2596K ranks in the Top 1% of all Wagyu bulls outside of Japan for MS (+3.1) and FIT (\$262). Incredibly, he is in the Top 3% for EMA (+9.7), MF (+0.43), SRI (\$268), FTI (\$250), and BW (-2.1). This is a Bond son that can improve any herd's carcass traits!
- The pedigree of 2596K is stacked with industry legends including Mayura Itoshigenami Jnr 0139 "The King of Australian Wagyu Sires", Shigesheetani and Michifuku. 2596K's dam, LMR Ms Shigesheetani 3443A, is a 10-year-old donor cow who produced the 2022 Passion for Prime sale topping heifer LMR Ms Mayura 0506H who sold to \$67,500.
- LMR BOND 2596K is sired by Arubial Bond Q007; an outstanding son of Mayura Itoshigenami JNR 0139 — whose genomically enhanced EBVs, with 856 progeny analyzed, are equal to and in some cases exceed his sire: MS EBV +3.1 and EMA EBV +15.1 — both trait leading in the breed (plus a BW EBV -3.7). BOND ranks in the Top 3% for the Indexes (FTI & FIT): \$254 and \$265. BOND has higher carcass EBVs than both his sire, A0139 and his half sib, Mayura L0010.

- LMR Shogun 0397H is a Lone Mountain herd sire that is entered into the AuWA Progeny test program. He is sired by TF148 out of the proven LMR donor cow, LMR Ms Kitaguni 8168U. 0397H ranks in the Top 1% for BW (-2.9), Top 5% of all Wagyu bulls for MS (+2.7) and FT1 (\$210) all while staying in the Top 10% for EMA (+7.1). This is your opportunity to buy a bonafide LMR herd sire and add elite marbling/carcass genetics to your herd!
- The pedigree of 0397H is stacked with pathfinder marbling genetics on both sides with the legendary Itoshigenami TF148 and Kitaguni Jr. represented. 0397H's dam, LMR Ms Kitaguni 8168U, is one of Lone Mountain's most outstanding donors with a MS EBV of +2.6 and a BW EBV of -5.7! She has been an incredibly productive donor, producing 95 offspring including four steers by TF148 graded 45%, 43%, 42% and 41% IMF. She is sired by WKS Kitaguni Jr, who is a Trait Leader and for two traits: Top 1% for BW EBV (-3.6) and Top 15% for Marble Score (+2.1). The dam of 8168U is BR Ms Yasufuku 0645, was one of the premier donor cows in the Lone Mountain herd — productive for 21 years, she is the dam of both LMR Kitaguni 1441Y (the #1 Sire for USDA Grade) and LMR Koichi 1409Y. Yasufuku 0645 has produced 21 calves over her breeding life, including a son of Kitaguni Jr (8166U) who graded 50.2% IMF and scored VAB100 by the USDA Grading Inspector.
- LMR Shogun 0397H is a LMR special that stacks proven marbling genetics at every corner of his pedigree.

- 151 direct son
- Top 1% for all growth 200/mat
- This is a chance to add a direct TF 151 Itozuru Doi son to your Wagyu breeding program!
- TF 151 represents some of the rarest and most expensive genetics in North America. TF 151 is widely considered the best all-round original import bull and when his semen rarely comes up for sale it has sold for \$15,000+/ Straw! S101's dam comes from the legendary Crescent Harbor Ranch herd with tremendous growth and maternal power through her sire Itomoritaka and the Hikohime 3/2 maternal line. S101 himself has inherited this with his GEBVs featuring an incredible +11 Milk along with top 1-5% on all growth traits!

- Recipient cow is a four-year-old Angus tag 9219
- Donor caliber heifer pregnancy here! On actual carcass ultrasound, the dam of this pregnancy records the most marbling and ribeye per pound of body weight of the entire Christensen Genetics donor battery. She stacks a perfect original import pedigree of Big Al x Hikari x Shigemaru x Ume. This beautiful cow is our highest producing Akaushi donor, making up to 16 embryos per flush! She is the dam of the featured AI stud bull, Davy Crockett. The sire of this heifer pregnancy is Outback. Outback is sired by the Australian stud, Kotsukari, whose semen has sold for up to \$6200/unit. Outback's dam comes from an imported Australian embryo, as well. She and her sisters show impressive width of base and capacity. Outback has proven his merit with elite sons and daughters in production and carcasses on the rail. Don't miss out on this opportunity to add phenotype, marbling, ribeye, and the best of foundation and Australian genetics to your herd!

- This young cow packs incredible Akaushi genetics into her profile! Her sire is the popular Hastings, who is a Big Al son from the great Kaedemaru 2, who in turn is a Tamamaru daughter of the matriarch, Kaedemaru. The dam of this lot has an equally powerful pedigree which pulls in the blood of Akiko and Marunami through Red Emperor. The next generation back combines a double dose of the legendary Namiko through both the maternal line of the pedigree and the top side with the Australian sire, Kalanga Kajikari. This lot is elite genetics at the highest level!
- LOT 14A - Fullblood Bull, 11.22.2023 sired by LAG 1105D (FB29170) (Ishigemaru x WSI Kaedemaru 2).

- Location: Spring City, PA
- This is an elite early Olive Grove Wagyu Q038 daughter! Q038 brings the super sire Sumo F154 with rare outcross and elite Westholme genetics to the table. The full brother to her dam graded a Marble Score 17.43 on our MJJ carcass camera with an astounding 59% Dmp (IMF). This heifer brings elite carcass proven genetics combined with elite EBVs of \$253 SRI, 1.8 MS, 57 CW, 3 Milk, and top 10% growth traits (November Run 1). Her pedigree is just as impressive tracing back to the great Hikohime 3/2 cow that has produced so many breed leading sires in the USA and AUS. The pedigree of Q038 x Sumo F126 x TF 149 x TF 148 x Michifuku x Kikuhana x Hikohime 3/2 solidifies this heifer as a herd building donor dam! One of only 7 females in the USA with her 1.8 MS, 57 CW, and 3 Milk!

- FIRST FLUSH EVER OFFERED ON A KINU LINE COW AT AUCTION!
- This is a world 1st offering from the donor dam TJ Ms Kinu 312B. She is an Itomichi ½ direct daughter of the original TF Kinu 1 cow. Kinu represents outcross high marbling and carcass traits genetics as she was the only 100% Tajima cow of Okudoi strain (Yoshi line) to be exported from Japan. Her genetics have proven to be extremely valuable with descendants selling for \$100,000+ in both the USA and Australia! Pick your ideal sire to mating this incredible Takeda bred donor dam to and create the next generation of Kinu line cattle for your herd.
- Buyer supplies the semen. Seller pays for flushing. Buyer gets a minimum of 5 embryos with a maximum of 10.

• The proven sire of the embryos, Notorious, has set the bar incredibly high with his enormous eye muscle area and the enormous selling price of his semen in 2022. His progeny will be extremely rare as his semen is no longer available. With this embryo lot, Notorious is combined with a super donor that can also claim rarity as she is a Sanjiro 3 daughter out of a Kage daughter. The base of her maternal line is World K's Kaneti. This maternal line has bred some great cattle and produced standout carcasses. Resulting calves will carry unbelievable value!

- Mayura Notorious N0387, the sire of this of this lot, is a direct son of Mayura Itoshigenami JNR and a Wagyu Trait Leader ranking in the Top 1% for EMA EBV (+16.0) and MS (+3.2) and in ALL 4 wagyu indexes: WBI (\$333), SRI (\$353), FTI (\$279), and FIT (\$262). Notorious has strong reliability in his numbers based on collected progeny data and enhanced by Genomics. He is the top carcass sire in the breed and has produced 2 of the finest carcasses ever in the Mayura program. His semen has consistently topped Wagyu sales.
- Mayura Notorious N0387 semen is extremely rare. Get these embryos sired by this breed changing sire while you can.
- LMR Ms Itoshigenami 9610G is one of Lone Mountain's younger donors and rising stars (producing 69 viable embryos to date) who ranks in the Top 5% of the breed for both Marble Score EBV (+2.3) and BW EBV (-4.5). 9610G's dam, LMR Ms Kitaguni 8168U, is an excellent donor in the Lone Mountain program, ranking in the Top 3% for both Marbling Score EBV (+2.6) and BW EBV (-5.7) and in the Top 3% for Marble Fineness (+0.44). 8168U has produced 95 calves, including 5 steers by TF148 grading 45%, 43%, 42%, 41% and 39% IMF. 8168U has produced a remarkable 340 viable embryos over 48 flushes (averaging 7 embryos per flush).

- The sire of these embryos, Olive Grove S033, is the #5 \$SRI sire in all of BREEDPLAN who is FREE of all recessive conditions. He is also the #5 Marble Finess sire in BREEDPLAN. There is an extremely limited amount of semen available in the U.S.A. from this great sire. S033 has top 1% genetics for both Marble Score, Marble Fineness and all 4 \$ Profit Indexes. His sire, Coates itoshigenami G113, a highly proven "SUPER SIRE" and S033 maybe his best son.
- The donor, M6 Ranch Ms L10 Okutani R085H, is a high-quality, well-balanced and heavy-milking "L10" daughter who is FREE of all recessive conditions. 085H ranks in the top 10%-15% for Marble Score, Marble Fineness and all 4 \$Profit production systems. These embryos will be shipped from Elgin Breeder Service (512) 285-2019

DAM WILD MS. NOTORIOUS 53K

- Sired by HP Wagyu Reliable R0157, who is the result of the combination of Mayura L0010 and one of HP's leading females Mayura L0082; this makes Reliable a double bred JNR. He is an outlier with his superior genomics, being the only bull in the whole breed with a +10 milk and +3 for marbling and to top it off being free of all genetic disorders! HP has utilized him extensively throughout their program as they think very highly of this bull. Reliable does it all; maternal, growth and carcass. Reliable semen sold for \$14,000 AUD per straw in the 2023 Marble High Sale in August.

The donor here is Wild Ms Notorious 53K, the Mayura Notorious daughter that sold for \$12,000 in the Wilders production sale! Notorious is the revolutionary Mayura Itoshigenami JNR son with tremendous proven REA and Marbling ability. Notorious is dead and his semen when rarely sold has commanded up to \$57,500 USD per straw! Secure genetics here while you can from this donor dam. She has elite EBVs of 31 CW, 10.0 REA, 1.6 MS, and \$231 SRI. Be one of the 1st in the USA with Reliable progeny!

- PVF will guarantee the sire and dam of embryos will be registered with the USA AWA in 2024.
- Blackmore K733 is a high accuracy (97%) flagship bull. K733 has been proven in the Blackmore program to have a both a marbling GEV and ribeye area GEV exceeding Michifuku. To add to the excitement, K733 also posses a carcass weight GEV that is well in excess of TF151 Itozuru Doi and equal to TF 147 Itoshigefuji!! K733 is currently the most elite, overall bull that David Blackmore ever bred.
- Chiyofuku K733's dam Chiyotake Y377, is an outstanding proven bull mother; being dam of Chiyozakura F349, Chiyohana F340 and Dai Ichi Yasuchiyo G615. Chiyofuku K733's pedigree contains four of the best known sires used for improving eye muscle are (EMA); Michifuku, Itozuru Doi and Itoshigenami 148. In the genomics research, eye muscle area (EMA) has the highest carcass trait heritability at 0.59. EMA affects the two most expensive cuts in the carcass; the cube roll and the striploin, and is the main area of significance when comparing our Wagyu beef against the Japanese produced Wagyu beef. Combined with a high marbling score (MS) GEV, Chiyofuku K733 is an elite plus rated bull for EMA at +16.45 GEV.
- The sire of Blackmore Aizakurra S1944 is Dai Ichi Yasuchiyo G615—a combination of 20 years concentrated breeding that combines all of the successful bloodlines used in Japan. Dai Ichi Yasuchiyo G615's dam, Itochiyo A009 is line bred to the famous Japanese Hyogo cow, Kikutsuru (Nakadoi blood) six times in a seven generation pedigree. His sire, Yasuchiyo C058 is a grandson of the famous Yasufuku (Nakadoi blood) who was bred as a result of line breeding to Yasumidoi.
- Despite the high percentage of Tajima bloodlines in Dai Ichi Yasuchiyo G615's pedigree, he is the largest and heaviest Wagyu bull the Blackmore program has bred to date, weighing in excess of 1000kg. Dai Ichi Yasuchiyo G615 is a very important sire in the Blackmore breeding program, being used to improve all aspects; breeding females, carcass quality and weight, and as a sire of their next generation of breeding bulls.

- Top 1% Marbling EPD on both sire and dam.
- Line bred Suzutani genetics here! Suzutani appears three times in the 3-generation pedigree of the resulting calves; they will be 50% Suzutani genetics! Sired by World K's Shigesigetani, the proven super sire with 123 carcasses to his Breedplan proof and EBVs highlighted by a 2.5 MS, +11.0 REA, and \$261 Self Replacing Index. Shigesigetani's elite marbling and rib eye area are paired here with Wagyu royalty in TRR Ms Suzusan 113P. She is a World K's Sanjirou daughter of Suzutaka 2! Suzutaka 2 is a full sister to TWA Shikikan and direct daughter of the queen of the breed Suzutani herself! With a pedigree of Shigesigetani x Sanjirou x Takazakura x Suzutani this pedigree writes a royal legacy to build around! The 113P cow recently had a yearling heifer of hers sell for \$16k in the Wagyu Super sale in Lexington.

- Resulting calves will be full brothers or sisters to Bar V Blanche United 301L (373 SRI) WBVF23U301L who has a \$373 SRI and 3.5 MS!
- Sired by Arubial United, who is currently taking the Wagyu breed by storm. At 400+ SRI, he represents a massive move forward in Wagyu genetics by transmitting massive growth combined with very good carcass traits. His progeny are dominating the Breed-plan Index rankings. United brings new genetics to US breeders through his sire, Sumo F126, and his maternal grandsire, Macquarie Y408. The dam brings further elite Aus-tralian genetics from her sire Mayura L0010. She has a pedigree of L10 x Michifuku x Ki-taguni x Yasufuku x Michifuku x JVP 400 x Shigehime. She brings elite LMR bred genetics to the table highlighted by a 2.8 MS!

- Here is an opportunity to own seldom offered Vermont Wagyu genetics, a VT Wagyu dam crossed with one of the top super star sires to emerge in the US. After 15 years of breeding, this dam excels without the benefit of Australian genetics in her pedigree. Her breeding comes from the Takeda line, sire TF 902, a seldom used bull siring a main herd line for Vermont Wagyu, also out of Takeda Itogshigenami 148.
- Live Ultrasound demonstrates her remarkable ability to marble by a year of age, far exceeding heifer averages at Vt Wagyu, while maintaining an above average herd size.
- The Sire, TNO 29K, is a new sire to look out for, having super high, top 1% EBVs for marbling, marbling fineness and SRI index. And he is well balanced for size being in the top 30% for carcass weight. He is sired by Australian sire Max Miku Mojo Q28 from Coates G113. His dam's sire is another Takeda high marbling sire, TF 813 Kimitofuku.
- This embryo pairing rises to the top 1% with marbling, marbling fineness and SRI Index. Being a US bred embryo combo, the low COI at 7% represents a breeder's opportunity.

SIRE ARUBIAL UNITED P0342

- Arubial United P0342, the sire of these embryos, is an outstanding son of Simon Coate's super bull, Michifuku F126 — United's genomically enhanced EBVs are powerful and impressive across the board but especially in respect to growth: 600 day Wt EBV +84 and Carcase Wt EBV +73 — both in the top 1% of the breed — plus a Marble Score in the Top 3% with an EBV of +2.5 and incredibly United ranks in the Top 1% for ALL Indexes (WBI, SRI, FTI & FIT): \$429, \$424, \$346, and \$297.
- LMR Ms Itoshigenami 8107U, is a 15-year-old donor cow sired by TF148 out of a dam melding Michifuku and JVP Kikuyasu 400 bloodlines, has produced 13 calves for Lone Mountain so far, including two steers grading 44% and 47% IMF. 8107U incorporates 70% Tajima, 5% Kedaka, 4% Tottori, 6% Itozakura, 1% Okayama and 1% Hiroshima bloodlines.

• Look at this package! Arubial United x Mayura Itoshigenami JNR x Suzutani! The sire, United, is blowing up the genetic ceiling of the breed. The maternal grandsire is none other than Mayura Itoshigenami JNR, who has taken Wagyu carcass performance to the next level. The dam of these embryos, T477, is a genetic package that you simply cannot find. She is a Suzutani and true to Suzutani form, she dominates in carcass traits. She boasts a 3.0 MS, 7.0 EMA, and .49 MF (November Run 1). Her pedigree is equally exciting with a stack of JNR x 003 Kitateruyasudoj x Michifuku x Suzutaka 2 x Suzutani! Suzutaka 2 is the maternal sister to breed greats Shigeshigetani, Kanad-agene, Sanjiro, and Sanjiro 3. These embryos are next level!

MATERNAL GRANDDAM SYNERGY MICH SUZI 158D

- Here is a genetic package that is otherwise not found in the US! This is a dream sire stack of Arubial United x Mayura Itoshigenami JNR x Michifuku x TF151 Itozurudoi x the maternal sister to Shigesigetani, Sanjiro, Kanadagene, Sanjiro 3 x Suzutani herself! The Suzutani's continually produce breed leading genetics, particularly excelling in carcass traits. The JNR dam, S595, of these embryos is no exception as she has an elite genomic EBV profile for carcass traits of 2.1 MS, 16 CW, and 8.9 EMA. This a carcass proven Suzutani line for us with a maternal brother to S595 grading a Marble Score 11.37 and 38.5% IMF with the highest marble finesses score we have ever had (11.77 NFI-2) and large ribeye area over 15.7 Inches (101 cm²) at 30 months. Combining Arubial United with this donor, S595, is the recipe to create big-time genetics with virtually no risk. Performance is built into this package.

- Sired by Arubial United, who at 400+ SRI, he represents a massive move forward in Wagyu genetics by transmitting massive growth combined with very good carcass traits. His progeny are taking the breed by storm, dominating the Breedplan Index rankings. His elite proven performance with carcasses now coming in through the Arubial herd gives confidence in his \$424 SRI, 2.5 MS, 6.9 REA, and 73 CW (November Run 1)!
- The dam here is a top-ranking daughter of super sire Sumo F154! She is highlighted by a \$291 SRI, 2.5 MS, and 5.9 REA! She has a pedigree stacked for carcass performance as she is an F154 x TF148 Itoshigenami x Shigeshigetani x TF151 Itozurudoi from the Suzutani! This a carcass proven line for us with a maternal brother to T462 grading over 40% IMF at only 27 months of age. Tremendous potential here.

A black cow standing in a field. The cow is facing right, and its body is mostly black with some lighter patches on its hindquarters. It has a white tag on its ear. The background is a green field with trees in the distance.

MATERNAL GRANDDAM SYNERGY MICH HIKOKURA 509F

- Arubial United x Coates Itoshigenami G113 donor dam! Sired by Arubial United, who at 400+ SRI, he represents a massive move forward in Wagyu genetics by transmitting massive growth combined with very good carcass traits. His progeny are taking the breed by storm, dominating the Breedplan Index rankings. His elite proven performance with carcasses now coming in through the Arubial herd gives confidence in his \$424 SRI, 2.5 MS, 6.9 REA, and 73 CW (November Run 1)!
- The dam here is one of only 12 G113 daughters in the USA! G113 needs little introduction as the breed leading proven sire from the Macquarie Wagyu program in Australia. This is the opportunity to stacked United on a G113 donor dam with stats of \$282 SRI, 2.3 MS, 6.3 REA, and 27 CW. Resulting calves will have a commanding pedigree of United x G113 x Michifuku x Itomichi ½ x Shigesheetani x TF 151 x Hikokuras. This is our 1st release of genetics from this G113 daughter in the USA!

• Here is a genetic package that is otherwise not found in the US! This is a dream sire stack of Arubial United x Mayura Itoshigenami JNR x Michifuku x TF151 Itozurudo x the maternal sister to Shigesigetani, Sanjiro, Kanadagene, Sanjiro 3 x Suzutani herself! The Suzutani's continually produce breed leading genetics, particularly excelling in carcass traits. The JNR dam, T478, of these embryos is no exception as she has an elite genomic EBV profile for carcass traits of 3.0 MS and 9.1 EMA. This is a carcass proven Suzutani line for us with a maternal brother to T478 grading a Marble Score 11.37 and 38.5% IMF with the highest marble finesses score we have ever had (11.77 NFI-2) and large ribeye area over 15.7 Inches (101 cm²) at 30 months. Combining Arubial United with this donor, T478, is the recipe to create big-time genetics with virtually no risk. Performance is built into this package.

• Arubial United is currently taking the Wagyu breed by storm. At 400 SRI, he represents a massive move forward in Wagyu genetics by transmitting massive growth and milk combined with very good carcass traits. His progeny are dominating the Breedplan Index rankings. United brings new genetics to US breeders through his sire, Sumo F126, and his maternal grandsire, Macquarie Y408. His semen is in huge demand in Australia and the US. In this lot United is combined with the donor dam, 505F, who is a Hikokura with balanced EBVs, great pedigree, and excellent flush history. Her phenotype catches your eye as much as her pedigree. The pedigree is a balance of highly proven carcass and growth sires, stacking Michifuku x 001 x Shigesigetani x TF151 x TF148 x Hikokura 1/10. Her granddam, Hikokura 15, sold for \$56,000 as the top seller in the 2018 Synergy sale. These embryos are a phenomenal pairing of elite genetics.

• Arubial United is currently taking the Wagyu breed by storm. At 400 SRI, he represents a massive move forward in Wagyu genetics by transmitting massive growth and milk combined with very good carcass traits. His progeny are dominating the Breedplan Index rankings. United brings new genetics to US breeders through his sire, Sumo F126, and his maternal grandsire, Macquarie Y408. The dam of the embryos, T455, has a nicely balanced EBV profile. She has a pedigree stacked for carcass performance as she is an F154 x TF148 Itoshigenami x Shigesigetani x TF151 Itozurudoi from the Suzutani! She exhibits excellent growth for a high Tajima pedigree. Tremendous potential here!

• A very rare opportunity to acquire genetics featuring G113 and Sumo F154 close up in the pedigree! The sire of the embryos, Guardian, is a son of G113. G113 semen is not available and only a few straws ever come to the US. Guardian semen is also not commercially available. Guardian has an incredible carcass trait profile topped with a 3.2 MS. He comes from the maternal line that produced the incredible Notorious and his maternal brother is the MS 3.5 Gatekeeper. The dam, 539G, is from the Chiyotakes. She is an outstanding daughter of the elite, proven sire, Sumo F154. 539G has strong phenotype combined with elite balanced EBVs of 246 SRI, 1.8 MS, and 47 CW. This is an ideal mating that combines elite carcass traits with superior growth.

• Sired by David Blackmore's best carcass proven Ribeye Area sire (K733) stacked on a Sumo F154 donor dam! Blackmore Chiyofuku K733 is a top ribeye area and marble score EBV bull in the Blackmore herd at +16.45 EMA and +1.78 MS (Both 91% Accuracy). He is a maternal brother to the massive Blackmore G615 super-sire, and his dam is Y377. She is famously one of David Blackmore's best cows having produced 6 carcasses all MS 9+ with a huge average Ribeye of 14.7 in2 (94.9 cm2) and average HCW of 992.2 lbs (451 kg). Chiyofuku K733's pedigree contains three of the Blackmore Wagyu's best-known sires used for improving ribeye area (EMA); Michifuku, Itozurudo1151 and Itoshigenami 148. Don't miss this amazing Blackmore Wagyu Super-Sire! The dam of these embryos, 532G, is the amazing, feature donor of the Synergy flush program. 532G is unmatched in the US in that she has 6 progeny from 4 different all over \$320 SRI. The three different sires are JNR, L195, L10 and United! She makes good ones! 532G is one of the oldest Sumo F154 daughters in the US as she is the result of an embryo imported from Synergy's Australian program. She is from the Chiyotake maternal line, one of the most successful Takeda families. 532G has outstanding EBVs with a very well-balanced profile with an elite level SRI of 270 to go along with outstanding phenotype.

• This lot is sired by R112, the highest SRI TESTED RESESSIVE FREE son of Mayura Itoshigenami JNR! He ranks ahead of breed leaders like L10, N4451, N4431, and Prologue for SRI. His semen sold for \$2,750/straw in the 2022 EWS and \$1,800/straw in the Vegas Sale! R112 has Top 1% and balanced genomic EBVs to back up his elite sire stack of JNR x TF 148 x 003 x TF 151 x Michifuku x TF Kikuhana x TF Dai 2 Kinntou 3!! This is the maternal line of Mayura Itoshigenami JNR, TF Terutani 40/1, Sumo F126 and so many more great sires. The dam of the embryos, 509F, is one of the mature, feature donor cows in the Synergy flush program. She is a large Michifuku daughter from the Hikokuras that flushes extremely well. As a high, genomic EBV daughter of Michifuku , she carries a balanced EBV profile, reflective of her pedigree and sire stack of Michifuku x Itomich ½ x Shigesigetani x TF151 Itozurudoi. These embryos combine the Hikokura and Chiyotake lines from Takeda Farms.

• This lot is sired by R112, the highest SRI TESTED RESESSIVE FREE son of Mayura Itoshigenami JNR! He ranks ahead of breed leaders like L10, N4451, N4431, and Prologue for SRI. His semen sold for \$2,750/straw in the 2022 EWS and \$1,800/straw in the Vegas Sale! R112 has Top 1% and balanced genomic EBVs to back up his elite sire stack of JNR x TF 148 x 003 x TF 151 x Michifuku x TF Kikuhana x TF Dai 2 Kintou 3!! This is the maternal line of Mayura Itoshigenami JNR, TF Terutani 40/1, Sumo F126 and so many more great sires. The embryo donor dam is Yuriko 34. The Yuriko maternal line has been a successful genetic powerhouse in the US and Australia. Yuriko 34 offers a very different, outcross pedigree to much of the US Wagyu population. She does not have Michifuku or TF148 Itoshigenami in her pedigree. Her sire stack is 001 Hirashigetayasu x Shigesigetani x Takazakura. She is a large, powerful cow which is also reflected in her EBVs. She has the growth of 001 and good carcass traits from Shigesigetani. R112 is an excellent mating for her.

WAGYU GROUP BREEDPLAN NOVEMBER 2023 RUN 1													

• Sired by Arubial United, who is currently taking the Wagyu breed by storm. At 400+ SRI, he represents a massive move forward in Wagyu genetics by transmitting massive growth combined with very good carcass traits. His progeny are dominating the Breedplan Index rankings. United brings new genetics to US breeders through his sire, Sumo F126, and his maternal grandsire, Macquarie Y408. The dam brings further elite Sumo F126 genetics with tremendous phenotype, growth, and maternals. This is no surprise with here pedigree of F126 x 001 x TF 151 x Yurikos! She possesses incredible balanced EBVs highlighted by a +12 MILK, 32 CW, and 1.0 MS. These embryos will create a foundation to build a herd around!

• This embryo package represents timeless Akaushi genetics! Be a part of breed history right here. Embryo sire, Rueshaw, was an original import in the 70's. The donor dam, 803, is 15 years old and still going strong. That is proven longevity and profitability! With the highly proven Homare maternal line, you can't go wrong, especially when you throw in sires such as Shigemaru, Hikari, Judo, and Namimaru. This is a total package.

- The Wright Wagyu Master Chef offers an elite combination of carcass traits from his sire TWA Kijikari (Hikari x Ume), and top 1% of the breed for growth and maternal traits from the Shigemaru and Homare lines.. He is a leading Australian Akaushi sire with very limited semen available.
- This is a rare direct Judo daughter! Judo is a largely outcross sire from the 1976 import. This is one of the best maternal lines in the breed having produced numerous elite sires including Big Al, Red Star, etc. Judo 73z is an ideal blend of proven performance and outcross genetics, sure to transmit elite carcass ability from the Akiko maternal line.

• HeartBrand 7151K is a true example of what a “near perfect” Akaushi female should look like. She is flawless in her design and absolutely stunning in her side profile. She is angular up through her head and neck, so long and level down her topline and very structurally correct. We admire her depth of flank, sweep in her forerib and overall maternal characteristics. Not to mention his value in outcross genetics and performance in the feedlot. Her bottom side of the pedigree features the elite growth and maternals sire Heartbrand Joe. Behind this is the Himawari maternal line crossed with Big Al and Tamamaru, you can’t go wrong with this breeding!

- First fullblood Kumamoto Red. From a young age he was always a most impressive looking calf and weaned a hefty 353 kgs and has been an easy doing heavy bull ever since. At 18 months he was 600 kgs 53" fat 4:3 EMA 88, IMF. 5.7 and testicles 34 cm. His mature weight for the past two years was 984 kgs. when he came in for his vaccinations in the autumn. His sire Kajakari is known for his light birth weight calves and they are structurally very correct with good depth of rib and a strong hind quarter. His mother is the great KALFB0234 who has bred so well at Academy. Master Chef is a very sound, quiet bull with a tremendous amount of meat in him.
- HEARTBRAND JULIA 1736A - A DIRECT JUDO DAUGHTER HERE! Judo is the extremely rare and out cross 1970's original import Akaushi bull. Judo is a valuable breeding tool in the limited Akaushi genetics pool to manage in-breeding. Judo semen is averaging \$4000 per straw when you can find it. This donor can be mated to virtually any leading sire. This cow's sire stack is as good as you will find with Judo x Tamamaru x Big Al x Himawari! Himawari is the rare original import cow who came in the Takeda Farms import. This is an opportunity to get into the Himawari 245 maternal line. Himawari is sired by Dai 10 Mitsumaru 76. This rare female gives you the opportunity to have Judo and Himawari in one pedigree.

- Sired by Come and Take It, the Heartbrand H0518 son of Akiko these embryos are certain to have elite carcass quality from the combination of Hikari and Akiko genetics in one package. The dam of the embryos, 58G, supplies elite genetics from her amazing sire pathway of Big Al x Rueshaw x Umemaru stemming from the great JVP Kunisake. These embryos have a no-holes pedigree behind built on all proven sires.

• This mating speaks for itself. Hikari is the sire on top of a Big Al daughter. This Big Al daughter, 2077A, has been an elite flush cow. She packs a foundation sired genetic package. She traces directly to the legendary Akiko cow on her maternal side through performance-proven, breed legends Big Al, Shigemaru, and Tamaru to Akiko, herself. These embryos have it all!

• This is a classic Akaushi package! Hikari is the sire and the donor dam’s maternal line is the amazing Namikos, which have produced some elite bulls of the breed. Donor dam, 2080A is a Big Al granddaughter of Namiko, herself! This is a genetic package that is very difficult to find. Resulting calves will have a pedigree of Hikari x Big Al x Shigemaru x Namiko!

A photograph of a young brown cow standing in a grassy field. The cow has two yellow ear tags and is looking towards the camera. The background shows a line of trees under a clear sky.

• Master Chef is the current in-demand sire fueled by the performance of his progeny and the scarcity of his semen. Here are Master Chef sired embryos from a super Big Al daughter that traces maternally directly to Ume! In between Big Al and Ume is a sire stack of breed impacting sires Tamamaru x Shigemari x Dai 10 Mitsumaru! This is a fantastic opportunity to acquire proven foundation genetics combined with the current star, Master Chef!

- Sired by SOR Mr Hiromitsu 1090D, who is an elite Kaedemaru grandson. He was the Grand Champion of the Houston Livestock show in 2017 & 2018, The Grand Champion of the National Western in 2018, and he also won the prestigious PJ Budler Sponsored Word Championship in 2018. From a conformation basis, he is superior in form to his sire WSI Umemaru who is known as one of the best marbling Akaushi sires ever produced in North America. Mr. Hiromitsu’s dam is Kaedemaru #2, a Tamamaru daughter of Kaedemaru. Kaedemaru #2 is a transcendent cow and another hall of famer.
- He is paired with LAG Ms Fair Princess, a Big Al daughter. Big Al is the legendary son of Akiko aka the Queen of the Breed and Big Al is often referred to as the best all round bull in the Akaushi breed. There is further line breeding in these embryos to Kaedemaru on the bottom side of the pedigree here. Her dam is Kaedemaru 2 continuing to stack the carcass traits of this maternal line into the blood of this embryo lot!

• Sired by LAG Rueshaw 's XXX one of the top Rueshaw sons in the breed! His sire stack is an impressive Rueshaw x Shigemaru (Nikki) x Akiko. This is a complementary outcrossed pedigree and is compatible with most of the USA Akaushi population (No Big Al, Tamamaru, or Hikari in this bull). Rueshaw semen is extremely rare and if found regularly sells for \$15,000+ per straw!. LAG RUESHAW'S XXX 2133F ET's dam, is none other than Heartbrand Nikki, a direct Shigemaru daughter from Akiko and famous in her own right. She has been a prolific donor dam for years having produced 99 registered progeny and is still going strong today.! The dam of this lot is a red Emperor daughter of Kaedemaru 2 herself! This makes her a maternal sister to Hiromitsu, Hastings, and Rueshamaru among others. This is you chance to get into the heart of the Kaedemaru maternal line!

- One of the three imported bulls that came to the United States from Japan. Shigemaru is the most widely used of the sire lines for his breeding versatility. He is known for moderating frame size, adding body mass and structural width in his progeny. His daughters are built broody, good footed and are high maternal performers. Use Shigemaru with confidence in laying a good foundation of growth and maternal genetics.
- The dam here is a result of the Idaho Wagyu Genetics program. She is sired by the WSI Umemaru son IWG 69Z. He contributes genetics from Hikari and Judo stacked on the Homare cow family. This will create a balanced base with strong carcass traits the hallmark of the Akaushi breed. The bottom side of her pedigree features Australian breeding tracing back to Marunami 8, one of the prized original import cows!

• Natsuki has a tremendous pedigree being sired by TWA Kotsukari! TWA Kotsukari is the only Hikari x Akiko son ever bred and therefore extremely rare genetics given he was born in Australia and few straws were imported to the USA. Hikari x Akiko marries the two best carcass traits animals to have been exported from Japan and stamps elite carcass traits in his progeny. Behind that is a rare direct Judo daughter! Judo is a largely outcross sire from the 1976 import. This is one of the best maternal lines in the breed having produced numerous elite sires including Big Al, Red Star, etc. Judo 73z is an ideal blend of proven performance and outcross genetics, sure to transmit elite carcass ability from the Akiko maternal line.

- These embryo are sired by IWG 157. 157 is bull that combines the superior Akiko and Marunami maternal lines. Both sides of his pedigree trace to two heifers that were live imports into the US from Australia and developed in the Garth Monroe’s IWG herd. The donor dam of these embryos is from a Red Emperor son from the very proven, highly profitable Homare maternal line. The donor’s maternal line is from an equally outstanding maternal line in the Marunamis via the imported female, Coates Taiyo, who was imported from Australia as a heifer by Garth Monroe. These are unique genetics from international breeding programs.

- The embryo sire, Tamamaru, is a foundation sire that has been one of the most heavily used bulls in the breed due to his consistency. He brings length and thickness to his progeny. His dam, Marunami, is one of the legendary brood cows of the Akaushi breed. The donor dam of these embryos is a Kings High Ranch donor dam by the "GOAT" Big Al. She has a fantastic pedigree of royal Akaushi genetics of Big Al x Hikari x JVP Kunisakae. This is as good an Akaushi foundation bred pedigree as you will find.
- All embryos are AWA bred right with low inbred coefficient.

- Big Al was the first bull born outside of Japan in January of 1995. Big Al is the legendary Dai 10 Mitsumaru 76 son of Akiko and is highly proven with elite EPDs. To this day Big Al has top 30% growth and maternal EPDs along with top 10% carcass EPD for Ribeye Area, Marbling, and Carcass Index! On top of his fantastic EPDs, he is known for making incredible females with growth, strength, maternal traits, and longevity. Big Al is considered by many to be the greatest Akaushi bull of all-time!
- The donor dam of these embryos is a Kings High Ranch donor dam, she contributes the genetics of WSI Umemaru, Judo, Tamamaru, and Shigemaru. This is a balanced bred cow that will have growth, maternals, and carcass traits.
- All embryos are AWA bred right with low inbred coefficient.

• This lot is sired by R112, the highest SRI TESTED RESESSIVE FREE son of Mayura Itoshigenami JNR! He ranks ahead of breed leaders like L10, N4451, N4431, and Prologue for SRI. His semen sold for \$2,750/straw in the 2022 EWS and \$1,800/straw in the Vegas Sale! R112 has Top 1% and balanced genomic EBVs to back up his elite sire stack of JNR x TF 148 x 003 x TF 151 x Michifuku x TF Kikuhana x TF Dai 2 Kinntou 3!! This is the maternal line of Mayura Itoshigenami JNR, TF Te-rutani 40/1, Sumo F126 and so many more great sires. The dam here is an elite World K's Michi-fuku donor dam! She boasts elite EBVs of \$223 SRI, 1.6 MS, 4.6 REA, .34 MF, and 17 CW. She is one of very few Michifuku daughters with those trait benchmarks. 505F features an impressive sire stack to back up her GEBVs of World K's Michifuku x 001 x World K's Shigesigetani x TF 151 x TF 148 x Hikokura 1/10! Her full brother scored a MS 9+ on our carcass camera for us at only 27 months of age (HCW 920 lbs)! 505F's granddam, Hikokura 15, sold for \$56,000 as the top seller in the 2018 Synergy sale. These embryos are a phenomenal pairing of elite genetics.

- Here is an opportunity to acquire genetics that are set apart from the pack in a breed leading combination of Gatekeeper on a super daughter of Sumo F154. Gatekeeper is a game changer in many ways. Gatekeeper semen is also not commercially available. Gatekeeper has an incredible carcass trait profile topped with a 3.5 MS. He comes from the maternal line that produced the incredible Notorious and his maternal brother is the MS 3.2 Guardian. Gatekeeper's sire stack makes his top 1% EBVs no surprise with a stacking of F154 x JNR x Yasufuku Jr x TF 151 x Kaneyama x Michifuku x TF Hikohime 34/2. He puts it all together with TOP 1% GEVBS, a world class pedigree, and being tested FREE of all recessives! Incredible potential!
- The dam is one of the rarest females you will find in the USA being sired by Westholme Hiramichi Tsuru! Westholme Hiramichi Tsuru hails from the renowned, high Kedaka, Hatsuhi maternal line. He is a Breedplan leader in growth traits, carcass weight, and Milk among proven sires. Westholme no longer sells any semen on this bull. This is an elite daughter of his with a 50 CW, 7.3 REA, and \$237 SRI (November Run 1)!

- Trent Bridge R112, the sire of this lot, is an outstanding JNR son bred by Trent Bridge Wagyu. He is one of the most balanced bulls in their lineup. R112 is a super balanced sire that ranks in the Top 1% for 3 of 4 Wagyu Indexes (SRI: \$322; FTI: \$280; and FIT: \$265). He is also Top 3% for MS (+2.7), WBI (\$302), and MF (+.41). Get involved with this bull early and often!
- LMR Ms Itoshigenami 3525A is an impressive 10-year-old donor. She is a trait leader for Ribeye Area at (+11.7) and also ranks in the Top 3% for Marbling Score (+2.7) while staying in the Top 5% for Marbling Fineness (+0.36) and FIT (\$223). Her 24 progeny include a carcass by LMR Mitsuru 2450Z that graded 40% IMF! 3525A has produced 96 viable embryos in 15 flushes. 3525A is sired by the famous Takeda bull Itoshigenami TF148. TF148 is also the sire of the record breaking "King" of Wagyu, Mayura Itoshigenami JR 0139. TF148 is one of the most proven sires in the Wagyu breed who posts a Marbling EBV (+2.4) and BW EBV (-1.6).
- Don't miss this embryo mating stacked with Itoshigenami TF148 carcass genetics.

• Sired by R112, the highest SRI TESTED RESESSIVE FREE son of Mayura Itoshigenami JNR! He also ranks ahead of breed leaders like L10, N4451, N4431, and Prologue on SRI. R112 has Top 1% and balanced genomic EBVs to back up his elite sire stack of JNR x TF 148 x 003 x TF 151 x Michifuku x TF Kikuhana x TF Dai 2 Kintou 3!! R112 features a 2.7 MS, 9.9 REA, 35 CW, and \$322 SRI to go along with low birth weight and positive on all growth traits! He is the ultimate balanced breeding package. He is paired with M6 F154 Hikokura R084H who was the \$50,000 high selling female at the 2021 M6 female dispersal sale! Her pedigree is wagyu royalty with supersire Sumo F154 x 001 x Michifuku x TF 151 x TF 148 x Hikokura 1/10. She has elite GEBVs highlighted by \$263 SRI, 52 CW, 4.6 REA, and 1.3 MS (November Run 1).

• Here is an opportunity to acquire genetics that are set apart from the pack in a breed leading combination of Guardian on a super daughter of Sumo F154. Guardian is a game changer in many ways. He is a son of G113, whose semen is not available and has only had a very few straws ever come to the US. Guardian semen is also not commercially available. Guardian has an incredible carcass trait profile topped with a 3.2 MS. He comes from the maternal line that produced the incredible Notorious and his maternal brother is the MS 3.5 Gatekeeper. The dam of these embryos, 532G, is the amazing, feature donor of the Synergy flush program. 532G is unmatched in the US in that she has 6 progeny from 4 different all over \$320 SRI. The four different sires are JNR, L195, L10 and United! She makes good ones! 532G is one of the oldest Sumo F154 daughters in the US as she is the result of an embryo imported from Synergy's Australian program. She is from the Chiyotake maternal line, one of the most successful Takeda families. 532G has outstanding EBVs with a very well-balanced profile with an elite level SRI of 270 to go along with outstanding phenotype.

• This embryo lot combines history and current relevance in the same package! Itozuru Doi TF151, Itoshigenami TF148, and Michifuku are seemingly timeless bulls. They are original import sires and yet are still relevant with their current EBVs! In this package these three bulls are stacked on the amazing foundation Hisako cow! This is a breeder's dream — either for the new breeder or established breeding program. The Hisako maternal line is highly sought after, and we know the extreme value of Itozuru Doi as an unsurpassed all-round sire. Itoshigenami and Michifuku have locked the carcass traits into this genetic offering. Don't miss out on this piece of history with modern-day relevance!

• Look at the Takeda Farms genetics here! The embryos are sired by TF Itohana 2, who is a direct son of the Aino 6 cow. Aino 6 is an Itomichi daughter of the legendary Aino 5 cow. The dam of these embryos, 1030D, enhances this 100% Takeda pedigree through her sire TF Yasutani 1012. 1012 is one of the more current, successful Takeda sires and pulls in the genetics of his outstanding carcass trait sire, TF813. The maternal side of this embryo package is further highlighted with Itozuru Doi TF151 featured as the maternal grandsire of the donor dam. Very few breeders can say they have 100% Takeda Farms progeny. You can join that short list here!

- Here is an ultra-rare genetic investment opportunity! Try to find the sires TF902 and TF727 stacked on top of each other anywhere else in the world. TF727 is a son of CF505 who is one of an absolutely incomparable set of full sisters from the Hikokuras. Better yet, they are stacked on top of an Itozuru Doi TF151 daughter that is out of the TF702 cow. This package is immersed in Takeda Farms breeding history. Takeda genetics are known the world over and this is absolutely a one of a kind historic opportunity to acquire some of these classic genetics.

- Suzutani is one of the all-time great cows in the wagyu breed outside of Japan. She has had a profound influence in the US and Australian Wagyu populations through her outstanding, carcass improving sons. Shigesigetani and Sanjirou are two of those sons. They are both featured here with Shigesigetani as the embryo sire and Sanjirou as the great grandsire of the donor dam. The donor dam is a rare daughter of TF Kikutsurudo 146, who in turn is out of the very famous Itozuru Doi daughter, Nanashi! This is a rare genetic package and with a double bonus of proven genetics which will return great performance and many alternative breeding possibilities!

- Sired by Wynford Itoguni 308H, who has made a name for himself in the Wagyu breed quickly with his tremendous carcass traits and elite breeding combining USA and Australia's best genetics. Sired by the revolutionary Mayura L0010 and from a Lone Mountain Ranch signature breeding with World K's Kitaguni Jr as his maternal grandsire carcass traits are stamped into this bull! He is currently tied in Breedplan as the highest Marble Score sire with progeny registered at +3.6 MS!
- The dam of these embryos is a Triangle B Ranch bred female. She combines the bloodlines of TF 146, TF 148, TF 147, and Shigesigetani to create a balanced base to breed from. Her sire is the TBR staple TFR Kikutnami 4051, a rare TF 146 son. He contributes out-cross TF 146 carcass specialty genetics to this pairing that compliment Itoguni 308H perfectly!

• Look at this genetic offering! Elite L195 daughter flushed to Olive Grove Wagyu S033! The Suzutani maternal line combined with S033 who is an elite G113 son from an amazing Westholme maternal line, the Umekos! S033 is an astounding 3.0 MS, 6.5 REA, and 50 CW! Pedigree of the donor is unmatched — L195 x TF148 x Shigesigetani x TF151 x Suzutaka 2 x Suzutani! The Suzutanis produce breed leaders generation after generation. Huge opportunity with this embryo lot!

The sire of these embryos, Guardian, is a son of the highly proven G113. G113 semen is not available and only a very few straws ever come to the US. Guardian semen is also not commercially available. Guardian has an incredible carcass trait profile topped with a 3.2 MS. He comes from the maternal line that produced the incredible Notorious and his maternal brother is the MS 3.5 Gatekeeper. The dam of the embryos, 509F, is one of the mature, feature donor cows in the Synergy flush program. She is a large Michifuku daughter from the Hikokuras that flushes extremely well. As a high, genomic EBV daughter of Michifuku, she carries a balanced EBV profile, reflective of her pedigree and sire stack of Michifuku x Itomich 1/2 x Shigeshigetani x TF151 Itozurudoi. These embryos combine the Hikokura and Chiyotake lines from Takeda Farms.

SIRE LMR YUKI 9273J

- LMR Yuki 9273J the sire of this offering is sired by WKS Kitaguni Jr, who is a top performer for two traits BW EBV (-3.6) and MS EBV (+2.1). In the 2017 LMCC Sire Performance Study, WKS Kitaguni Jr as a sire ranked 4th for Marbling with an average of 31.73%, with 61 carcasses studied, following WKS Yasufuku Jr and his own son, LMR Koi-chi 1409Y with 16 images studied as a Dam Sire, Kitaguni Jr displays his staying-power by ranking #1 for IMF (34.35%). Yuki exceeds his sire in every carcass relevant EBV category posting a strong MS (+2.7), EMA (+5.3), MF (+0.38), FTI (\$208), and FIT (\$214). Yuki which means snow in Japanese is sure to put marbling first!
- LMR Ms Yasufuku 1259Y is an outstanding 12-year-old LMR donor who has produced 114 viable embryos in 16 flushes to date. She also has produced 54 offspring to date including a steer sired by LMR Sensei 817T that graded 44.5% IMF at harvest and a heifer sired by L10 that sold for \$30,000 at the 2021 Passion for Prime sale. 1259Y's dam, LMR Ms Sanjiro 767T, is a direct daughter of WKS Sanjiro out of the rare dam WKS Nakazakura.

- Low risk and high performance probability are the two main keys to breeding success and profitability. These embryos are that kind of investment! This Okutani offering pairs the highly proven Michifuku 154, with Marie, an outstanding daughter of TF148 Itoshigenami. Marie traces to Okutani via super sires Itoshigenami x Michifuku x Haruki I x Okutani. Marie is a full sister to Maverick, a bull who is making great carcasses. She is also a full sister to Elizabeth, FB13775, whose embryos sold for over \$10,000 per embryo at the 2019 Australia Elite Sale. These embryos are a high reliability investment in fantastic genetics.
- Michifuku F154 has extremely superb EBV's for both marble score and carcass weight. And, with all three indexes in the top 1%, it makes him not only sought after but one of the best bulls around. He is 67% Tajima and 23% Itozakura and 4% Shimane. He was born in 2010 so his stats are beyond proven. This bull is a trait leader for both marble score and carcass weight.

• Hiratanachi is sired by Itozuru Doi, 26T, FB3685. Itozuru Doi TF151's grandsire is Dai 7 Itozakura J65 and his maternal grandsire is Yasumi Do J10328. He is known as a fabulous composite bull in the industry. Itozuru Doi TF151 is 50 percent Tajima, 25 percent Fujiyoshi, and 25 percent Kedaka. He has an extremely big frame, weight 2420 lbs., carries early maturing traits that produce great Full Blood mothers with excellent milk, and is the best marbling bull of the Fujiyoshi bloodlines. By the time his progeny were tested and his value was discovered, Itozuru Doi FT 151 was deceased, leaving a very limited supply of semen, and semen from Itozuru Do is the most expensive semen in the Wagyu breed. Hiratanachi is a SCD AA, Tenderness 4.

Miku Mammut Q26, is sired by Coates Itoshigenami G113, FB55323, and his dam is Trent Bridge N190, FB72467. He is offering all the traits required to develop the female side of the herd. His dam, Trent Bridge's N190, is out of one of the leading carcass sires, Macquarie's Y408. Y408 has earned a reputation as one of the very best carcass sires in the industry. Miku Mammut, according to the AWA, is in the top 20% marbling. He was selected as a Link Sire in the Australian Wagyu Association's long term Progeny Test Program with all 4 indexes comfortably above the Top 1% mark.

- Low risk and high performance probability are the two main keys to breeding success and profitability. These embryos are that kind of investment! This Okutani offering pairs the highly proven Suzutani son, Shigesigetani, with Kikokage 29A. Shigesigetani is a famous sire that is believed to have a high degree of propensity to transmit his characteristics to offspring. He is bred from some of the most famous and highly regarded genetics exported from Japan, and has been well proven. He is 75% Tajima line. The Kumanami family is known for its extremely potent marbling genes, and si perhaps the primary reason that Shigesigetani's dam, Suzutani, is generally regarded as the best carcass female to have left Japan. These embryos are a high reliability investment in fantastic genetics.

- Kikokage 29A is a super mix of bloodlines: 32% Tajima, 26% Kedaka, 35% Shemane, 9% Okahama. This is very closely related to the original Japanese genetics. Her 6* dam, Yuriko-1 si one of the very few cows which exported from Japan to the USA. These embryos are a high reliability investment in fantastic genetics. Expect superior next generation results and propel your breeding program to the next level of performance!

- Itomichi 1/2 is known for the docility, muscularity and structure. He is a growth cow from Dai 7 Itozakura line. He is a trait leader and top 1% for both rump fat and milk; top 7% for carcass weight; and top 10% for mature cow weight. His genetics are widely used for producing consistently large quality beef, increased milking abilities, mature size and growth rate without reducing marbling. SCD VV, 6 tenderness, free of genetic defects.
- Itomichi 1/2 is paired with the dam Winson who was sired by Kitaguni Jr., FB2422. Kitaguni Jr. is a son of Kitaguni 7-8 whose name is very prominent in current Japanese pedigrees. He is also a grandson of Dai 7 and Itozakura. This line is very famous in Japan. His sons and grandson include Kitaguni 7-8, Itomichi and Itozuro Doi 151. Winson's dam is Michifuku, 4628, FB7339.

WAGYU GROUP BREEDPLAN NOVEMBER 2023 RUN 1													

The sire of these embryos, Guardian, is a son of the highly proven G113. G113 semen is not available and only a very few straws ever come to the US. Guardian semen is also not commercially available. Guardian has an incredible carcass trait profile topped with a 3.2 MS. He comes from the maternal line that produced the incredible Notorious and his maternal brother is the MS 3.5 Gatekeeper. The dam of the embryos, T461, has a nicely balanced EBV profile. She has a pedigree stacked for carcass performance as she is an F154 x TF148 Itoshigenami x Shigeshigetani x TF151 Itozurudoi from the Suzutani! She exhibits excellent growth for a high Tajima pedigree. Tremendous potential here!

• Embryos sired by one of David Blackmore’s best carcass proven sires! Blackmore Dai Ichi Yasu-chiyo G615 is an ideal largely outcross blend of Yasufuku Jr, TF Kikutsurudoi 146, TF Itozudoi 151, and JVP Fukutsuru 068. G615 is backed up by over 240 carcasses in the Blackmore program and is an all-round super star consistently producing elite marbling, large ribeye area, and heavy carcass weights. He does not sacrifice any growth and maternal traits either producing amazing cows and himself weighing in at 2,486 lbs as a mature bull! G615’s dam Y377 is famously one of David Blackmore’s best cows having produced 6 carcasses all MS 9+ with a huge average Ribeye of 14.7 in2 (94.9 cm2) and average HCW of 992.2 lbs (451 kg). G615 is a very important sire in the Blackmore breeding program, being used to improve all aspects; breeding females, carcass quality and weight, and as a sire of our next generation of breeding bulls. The dam here is an elite World K’s Michifuku donor dam! She boasts elite EBVs of \$223 SRI, 1.6 MS, 4.6 REA, .34 MF, and 17 CW. She is one of very few Michifuku daughters with those trait benchmarks. 505F features an impressive sire stack to back up her GEBVs of World K’s Michifuku x 001 x World K’s Shigeshiigetani x TF 151 x TF 148 x Hikokura 1/10! Her full brother scored a MS 9+ on our carcass camera for us at only 27 months of age (HCW 920 lbs)! 505F’s granddam, Hikokura 15, sold for \$56,000 as the top seller in the 2018 Synergy sale. These embryos are a phenomenal pairing of elite genetics.

• The embryo sire, Goorambat Mr Marble, is the highest ranking EBV/SRI proven son of Shigesheetani. Unlike his sire, Mr Marble transmits excellent growth to his progeny, along with great carcass traits and positive milk. His pedigree features sires that were not available in the US, making him a sought after bull. The dam of the embryos, 509F, is one of the mature, feature donor cows in the Synergy flush program. She is a large Michifuku daughter from the Hikokuras that flushes extremely well. As a high, genomic EBV daughter of Michifuku, she carries a balanced EBV profile, reflective of her pedigree and sire stack of Michifuku x Itomichi ½ x Shigesheetani x TF151 Itozurudoi. These embryos combine the Hikokura and Chiyotake lines from Takeda Farms.

AWA EPDS

• Emperor 110J is a breeding age bull from 22 Wagyu that is from the heart of the IWG breeding program. His paternal and maternal granddams were both imported as heifers from Australia by Garth Monroe. They are descended from the Akiko and Marunami maternal lines that had been developed in the herd of Wagyu pioneer Simon Coates. 110J’s sire is a Red Emperor son out of a Judo daughter. 110J’s dam is a daughter of IWG, who is a product of a Tamamaru x Rueshaw mating. On the bottom side of his pedigree is a very enviable sire stack of an early Master Chef daughter x Big Al x Big Al x Marunami herself. This bull has high performance genetics in his blood!

- As his name implies, K206 pulls in the genetics of the highly sought after The Wright Wagyu Master Chef! The sire of K206 is a son of the proven sire, Red Emperor, and traces back directly to the legendary breed matriarch, Akiko, through such bulls as Judo, Shigemaru, Big Al, Tamamaru x Akiko. The maternal side of K206 traces to Marunami through a Tamamaru son x Master Chef x Big Al x Big Al x Marunami. This is a fantastic young bull!

• Coates Taiyo was a live heifer that Garth Monroe purchased and imported from Australia. She was developed in his IWG herd. She is sired by Big Al and is out of a Shigemaru daughter from the great Marunami. Taiyo appears on the top and bottom side of the pedigree of this young bull that is line bred to the previously mentioned Marunami cow. Marunami may be best known for being the dam of the international star Heart Brand Red Emperor. She has also produced many elite sons and daughters. This bull will elevate a breeding program to the absolute next level.

AWA EPDS

• K222 is a son of IWG 240F. 240F is a masterful combination of Marunami and Akiko bloodlines through two heifers imported from Australia, Taiyo and Rubi. Those two heifers were mainstay foundation females in the well-known IWG herd. In the pedigree of K222, IWG240F was bred to a Red Emperor daughter, who was in turn Taiyo herself who is a Big Al daughter. This created a doubling up of the legendary sire Big Al. The import cow forming the foundation for the pedigree of this young bull is none other than Marunami!

• TWA Kotsukari is the elite, Australian son of the Hikari x Akiko mating. He is quickly gaining traction and popularity in the US. His semen is highly valued and difficult to find. Here is a Kotsukari son that is ready to go to work for you. 602K is out of a JC Rueshaw 92 daughter. Behind that we find the maternal line of this young bull is established on Kalanga breeding from Australia. His maternal line is actually from the very high performing Namikos. The sires that pull this pedigree together are Kalanga Red Star, TWA Kojikari, and Big Al. This bull boasts serious Akaushi genetics!

- Bar R 5U is arguably the most famous and influential polled female of the breed. Arubial Bond has been a game changing sire for extreme carcass traits. Bond 13K is a spectacular combination of 5U and Bond. He is heterozygous polled and transmits the best traits of his sire and dam. He boasts a +2 EBV for milk and +31 for Carcass Weight while packing a big EMA of +8.1 and an extremely enviable +2.8 MS. He tops the charts for MS and MF for all polled bulls with semen available in the US. Don't miss out on this amazing polled offering!

- A featured semen lot from a top selling bull lot in the recent Wilders Wagyu Sale.
- Semen from an exciting Sumo Michifuku F154 son! With above average Value Indexes and growth EBVs, you know this bull is going to perform. He is a phenotypic standout. This bull is powerfully designed with plenty of mass and depth, upheld with structural integrity. The maternal side goes back to the great Sumo Hikokura breeding on the top side and the dam brings strong Triangle B Ranch and Takeda breeding. He also traces back to TF Kimitofuku 813 through TF Yasutani 1012 to add even more prolific marbling potential.

• TJ 296J represents are outcross genetics as he does not have any TF 148 or Michifuku in his pedigree! His sire TJ MR Kinu 4 351B is a Kimifuku 3 son of TF Kinu 1, a very unique 100% Tajima breeding from Kinu 1. Kinu 1 was the only 100% Tajima cow of Okudoi strain (Yoshi line) to be exported from Japan. The dam side here is just as impressive with an Itohana 2 daughter of TF Dai 2 Kintou 12. The Dai 2 Kintou lines have been some of the most prolific breeding animals to come from the Takeda Farms program, producing bulls such as Mayura Itoshigenami JNR in Australia.

- TJ MR KINU 4 351B is a product of the incredible mating of Kimifuku 3 x TF Kinu 1 cow! Kimifuku 3 is a 100% Tajima bull, keeping this pedigree 100% Tajima, very few 100% Tajima animals remain outside Japan, and this is a chance to secure semen on one now. Kimifuku 3 is sired by the Japanese legend Tanifuku Doi, who brings the genetics of "The Hyogo Cow" Kikutsuru to the table. She is renowned in Japan for having brought size and structure to the 100% Tajima Hyogo prefecture cattle without sacrificing any carcass quality. In fact, her sons were some of the best carcass proven bulls in Japan! Kimifuku 3 genetics are extremely rare and closely held.
- The dam here is not to be overlooked either! She is TF Kinu 1, who is renowned for her elite carcass qualities and her ability to transmit to the next generation. She also is 100% Tajima and the only 100% Tajima cow from the Okudoi strain to have been exported from Japan (the other two strains in Hyogo prefecture being Nakadoi and Kumanami). TF Kinu 1's sire, Kikuyasu Doi is known in Japan to produce extremely good marbling. Kinu's maternal granddam was born in the Hyogo prefecture and designated as one of the best foundation stock in the Hyogo prefecture! The combination of the Kikutsuru lines and the TF Kinu 1 cow family has produced elite proven sires in the Blackmore Wagyu program like BLACKMORE KINUSURUKIKU H224 and BLACKMORE KINUFUKU C182. This proven performance in one of the world's leading Wagyu herds illustrates how impactful these genetics can be!

• Macquarie M0546 is a direct son of Macquarie Y408, the renowned Macquarie bred and proven Chiyotake maternal line sire. Y408 is dead and very limited semen from ever sold by Macquarie Wagyu. Y408 has been one of the highest marbling carcass proven bulls to be produced in the Macquarie herd. The dam of Macquarie M0546, Macquarie C1589, is a combination of World K's Michifuku, World K's Haruki II, and TWA U561 a major Chiyotake matriarch. M0546 is himself now in proven status with 21 carcasses in Breedplan producing elite figures of 2.1 MS, 10.0 REA, 17 CW, and 259 SRI! With no TF148 in his pedigree he is the ideal sire to mate with your JNR and L10 daughters!

MAZDA

- Mazda semen is extremely rare and valuable, as one of the original two Black Wagyu bulls export in the 1970s his semen is becoming increasingly rare. Mazda also is one of the few 100% Tottori/Kedaka sires available to breeders outside Japan. He is known as a growth and maternal traits specialist, sireing high performing cows. Here is your chance to incorporate this ultra rare breed legend into your breeding program!

- This Hikari son is born out of the original import cow Kaedemaru. Umemaru is a transformational sire, he corrects many conformation inadequacies, has sired many show champions, improves carcass texture and composition and is considered by many to be the top Akaushi sire ever born in North America! His semen has become very rare, currently sells for \$4000/straw and is seldom available. He has a grandiose reputation outside of the American Akaushi Association where he is known for being the sire or grandsire of many show champions and most of the top bulls in circulation today.

TWA KOTSUKARI

- TWA Kotsukari is the only Hikari x Akiko son ever bred and therefore extremely rare genetics given he was born in Australia and few straws were imported to the USA. Hikari x Akiko marries the two best carcass traits animals to have been exported from Japan and stamps elite carcass traits in his progeny.

LAG UMERINGO 2279G ET

- LAG Umeringo is a fantastic WSI Umemaru son. WSI Umemaru semen is rare and he is regarded as one of the best carcass traits Akaushi sires in the breed. He inherits this strength from his sire Hikari and maternal grandsire Dai 10 Mitsumaru. The dam side of his pedigree features Big Al, the undisputed “GOAT” of the foundation Akaushi sires followed by RINGO! Ringo is the Namimaru daughter of the legendary original import cow Dai 8 Marunami!

- Here is Hikari! He is an unquestionable star of the breed! He is a son of the great Dai 10 Mitsumaru and is an original, foundation sire. He has proven himself over and over again through his direct progeny and through his grandsons and granddaughters. He has established and proven himself in Australia and the US. He is still competitive as a sire today! Don't miss this opportunity to infuse Hikari into your breeding program with this straw.

SHIGEMARU

- One of the three imported bulls that came to the United States from Japan. Shigemaru is the most widely used of the sire lines for his breeding versatility. He is known for moderating frame size, adding body mass and structural width in his progeny. His daughters are built broody, good footed and are high maternal performers. Use Shigemaru with confidence in laying a good foundation of growth and maternal genetics.

- If not the best, clearly one of the top Rueshaw sons in the breed! His sire stack is an impressive Rueshaw x Shigemaru (Nikki) x Akiko. This is a complementary outcrossed pedigree and is compatible with most of the USA Akaushi population (No Big Al, Tamamaru, or Hikari in this bull). Additionally, XXX differs from his contemporaries in so much that there is no Kunisakae, Homare or Judo in his background. Rueshaw semen is extremely rare and if found regularly sells for \$4,000+ per straw! Secure genetics from one of his best sons now. About LAG RUESHAW'S XXX 2133F ET's dam, she is none other than Heartbrand Nikki, a direct Shigemaru daughter from Akiko and famous in her own right. She has been a prolific donor dam for years having produced 99 registered progeny and is still going strong today.! Don't miss this rare opportunity to get outcross genetics backed by the leading Akiko maternal line!

TAMAMARU

- Tamamaru is one of the most widely used and predictable Akaushi bulls due to his consistency and legendary mother, Dai 8 Marunami. There's no other foundation sire that can add the length of body and stoutness of structure. His sire, Dai 5 Tamanami Tokkyu 96 provides a slight outcross to the rest of the 1994 importation. Tamamaru is a paternal sib to the foundation cow Dai 9 Kobai 73. Tamamaru is F11 free.

- IWG 157 is a paternal grandson of Judo. His sire, 79Z, was built on a Marunami foundation with the building blocks of a double cross to the incredible Big Al. Judo appears again on the marenal side of 157 as his maternal grandsire. The bottom side of 157’s pedigree is the standout Akiko line. The foundation greats, Shigemaru, Big Al, and Tamamaru take you straight to Akiko herself. These are performance genetics!

- Come and take it is an F11 free grandson of Hikari and backed by tremendous cow power. His dam is the foundation cow Akiko from Japan and transmits her additional body mass and stoutness while proving to be easy calving. His sire, 518, is out of Dai 8 Marunami. She was given the governor's stamp and designated to lead a beef improvement project before being sold into the United States.

- Samsung is a legend in the Heartbrand herd because of his incredible longevity. He has endured one of the longest tenures as a herd bull in the HeartBrand herd to date. His impressive feet and leg design, fertility, and quality of offspring has kept him breeding cows twice a year for over 10 years. Samsung is one of the most proven and consistent sires that has one of the highest progeny retention rates among all bulls in the history of the HeartBrand herd. His dam, Haruko, is a foundation female that was imported from Japan in the mid 90’s.

- Wyndford Itoguni 308H (WYNFR308H) is the Marble King — Wyndford Itoguni 308H (WYNFR308H). Itoguni 308H is now the #1 Marbling sire in the world according to the most recent November 2023 BREEDPLAN with a world leading +3.5 Marble Score and +0.47 Marble Fineness.
- On selection indexes, he is the #4 bull in the world on F1 Terminal Index (+\$294).
- In the recent 2023 TWA Fall Harvest, an Itoguni daughter, Wyndford Lillibet 206k with a +3.5 Marble Score sold for \$60,000. Accordingly, Wyndford Itoguni 308H will be a key breeding tool to inject high marbling genetic into your herd. This sire gives you all the marbling of Bond, yet larger size.
- This world leading bull is a perfect blend of US and Australian Genetics. His dam is from a line of proven superior meat quality sires including Itoshigenami 148, World K's Michifuku and Word K's Kita guni JR. His sire, Mayura L0010 has added weight and strength. He is also enlisted in the Australian Wagyu Association Progeny Test Program.
- The bull will now be your #1 breeding tool to inject marbling and marbling fineness into your wagyu herd. Do not miss this chance to acquire these elite genetics. Straws are CSS and eligible for export to most major countries — please inquire for your country.

MAYURA L0010

• MAYURA L0010, simply known as L10 is a Mayura bred World Super Sire. His progeny dominate public sales in N. America with an L10 daughter (LMRFR0353) selling for \$100,000 and two L10 son's (M6RFR073H & LMRFS1749) selling for over \$150,000 in 2022 (M6 Bull Sale & 2022 TWA Fall Harvest). You will see L10 progeny at the top of every major sale. He leads in the BREEDPLAN Selection Indexes for Wagyu Sires. A review of November 2022 BREEDPLAN, shows him as an elite sire (with proven progeny), with top 1% of all four - WBI (+\$296), SRI (+\$302), FTI (+\$286), and FTTI (+\$265). This amazing bull hits all four of the major profit drivers of top 1% Marble Score (+3.0), top 5% Marble Fineness (+0.36), and top 10% Eye Muscle Area (+5.2) and Carcass Weight (+43). L10 is the son of Itoshigenami Junior 0139 who has the title of, The King of Australian Wagyu Sires, and now has pass his sire on major selection indexes. L10's pedigree combines the genetics of the King of Australian Sires (JNR) with TF151 Itozurudoi, Kanadagene 100, and the Aizakura maternal line. These legends of the Wagyu breed are stacked on an established, leading maternal line that has produced proven sires Macquarie Wagyu C1176, TF Itohana 2, Blackmore Aizatzurudoi Y398, and Blackmore Dai Ichi Kikuzakura H017! Do not miss the opportunity to move your herd to the top with this amazing Australian bull. Size, marbling, eye muscle area and top 1% BREEDPLAN Selection Indexes, L10 has it all!

• Goorambat Mr. Marble K483 (GRSFK0483) is the #3 highest SRI ranked son of legendary sire WKS Shigeshigetani, one of the most well rounded and consistent carcass sires. Mr Marble has one of the highest accuracies for all proven wagyu sires. Many breeders in N. America are missing Mr. Marble K483 in their portfolio and this sire makes for an outstanding outcross. Of all Shigeshigetani son's, Mr Marble K483 is a trait leader for milk growth, CWT, and MS EBVs. This is due to his beautifully balanced pedigree featuring a combination of foundation sires — Shigeshigetani, Itoshigenami TF148, and Terutani 40/1. This sire has 1271 Progeny with 393 Progeny analyzed and 37 carcass progeny spread across 45 different herds. He has size, marbling, accuracy, and outcross genetics — here is your opportunity to bring these outstanding genetics to your herd. Available both in USA (Brushy Creek) and Canada (Alta Genetics).

- Q038 is one of the most balanced bulls in the breed with elite growth, MS, MF, and Carcass Weight! He combines Sumo Cattle Co Michifuku F154 with an outcross, exclusively Westholme bred maternal line, with his dam being Westholme K5241. Westholme K5241 is a rare daughter of the Westholme super bull Hiramichi Tsuru, and her pedigree is backed by 001 x 002 x 003 x original import Umeko, who was double bred to Dai 20 Hirashige and is one of the few high Kedaka/ Tottori females exported from Japan. Q38 is one of the highest ranked bulls under 50% Tajima, featuring astounding 22.5% Kedaka/Tottori by blood! Q038 excels in the key profitability carcass traits of Marble Score, Marble Fineness, and Carcass Weight! He is tested FREE of all recessive disorders. The perfect bull to use on all L10 and JNR bloodlines!

• LMR Kenroku 1779J is THE future herd sire for Lone Mountain Ranch. This Shigesheetani son is FREE of all recessive defects and has impressed at every turn of his development. He is a breed trait leader for both MS EBV (+3.2) and EMA EBV (+10.7) while also ranking in the Top 1% for 3 of the 4 Wagyu Indexes: SRI (\$318); FTI (\$276); and F1T (\$271) AND Top 5% for WBI (\$282). He is the ONLY Shigesheetani sired individual registered with the Australian Association to be equal to or better than a SRI of \$318, MS +3.2, and an EMA of +10.7. Kenroku's pedigree stacks Shigesheetani over LMR Ms Itoshigenami 9320W, a stellar donor in the Lone Mountain program. She exhibits a wonderful EBV profile and combines TF148 and Sanjiro in her pedigree. The semen is ready for export and is CSS certified.

- Project Link sire in cohort 3&4 of the Australian Progeny Test Program!
- Superior has an amazing combination of low birth weight, positive milk, heavy carcass weight, large ribeye area, and high marble score.
- Multiple GEBVs Traits & Indexes in the top 1-15% of the breed! Including Marble Score, Ribeye Area, Carcass Weight, Self-Replacing Index, and F1 Index. Above Breed Average on ALL TRAITS!
- 3/4th sibling to Superior's dam was 2nd place in the MJ Carcass Camera category of the 2021 Triple Crown Steak Challenge.
- Synergy JNR Superior S594 is a direct son of Mayura Itoshigenami JNR combined with Genjiro and the Suzutani maternal line. JNR needs little introduction, now often called "The King of Australian Wagyu". The dam here is a Genjiro daughter with tremendous growth and maternal ability, having been line bred to Monjiro bloodlines through Genjiro, Haruki 2, and Michifuku. Superior blends genetics from the leading families of Suzutani, Okutani (Genjiro), and Dai 2 Kinntou 3 (JNR).

- 122H, is an elite L10-sired bull and now ranks ahead of his world-leading sire Mayura L0010. 122H is free of all genetic conditions.
- Size, marbling and free of all genetic conditions — he delivers it all.
- In the recent November 2023 BREEDPLAN, he gives you the double shot of growth and marbling with top 1% on 200/400/600Day Weights, Mature Weights, and Carcass weights. He scores top 3% on Marble Score (+2.1) and top 10% on Marble Fineness (0.28).
- Recently, 0122H was selected for the 2022 & 2023 AWA-PTP Progeny Study in Australia and will serve as a link sire for 2022 & 2023.
- Phenotypically on the hoof, he has tremendous performance, length of body, and extra body depth with a bold spring of rib.
- 0122H is a son of Mayura L0010, who has risen to the top in the wagyu world. L10 combines the genetics of the King of Australian Sires (JNR) with TF151 Itozurudoi, Kanadagene 100, and the Aizakura maternal line. These legends of the Wagyu breed are stacked on an established, leading maternal line that has produced proven sires Macquarie Wagyu C1176, TF Itohana 2, Blackmore Aizaturudoi Y398, and Blackmore Dai Ichi Kikuzakura H017!
- 0122H is a generational breeding tool with growth and marbling that will transform efficiency in the Wagyu industry in North America.

- Irongate Mayitoshigeyama R162 (IGRFR0162) boasts some remarkable EBV figures, notably his EMA, MS and growth traits producing an SRI (Self Replacing Index) well inside the top 1%. On selection indexes, he leads with top 1% SRI (+\$317) and WBI (+\$311), top 2% FTI (+\$253), and top 3% F1TI (+\$226).
- On EBVs he sports top 5% Carcass Weight (+52) and Eye Muscle Area (+8.9), and top 10% Marble Score (+2.0) and Marble Fineness (+0.31). This results in an extremely balanced bull for carcass and marbling and these genetics are now available in the USA.
- Besides his impressive EBVs, R162 is growing out to be a strong bull holding a fantastic phenotype, as well as presenting some exceptional semen quality. Sired by Tyddewi N4451, and Itoshigenami Jnr son, over Teruyamanami D37 producing this outstanding young bull. R162 has 42 progeny with 40 progeny analyzed. He has been utilized throughout the world leading Irongate herd and we are sure he will be a great sire within your heifer or cow herd.
- Do not miss this opportunity to add size and marbling to your herd with world class genetics.

- Michifuku F154 has extremely superb EBV's for both marble score and carcass weight. And, with all three in- dexes in the top 1%, it makes him not only sought after but one of the best bulls around. He is 67% Tajima and 23% Itozakura and 4% Shimane. He was born in 2010 so his stats are beyond proven. This bull is a trait leader for both marble score and carcass weight.

• Here is a chance to semen from a high-ranking son of the breed leading sire Mayura Ito-shigenami JNR. Itoshigenami JNR semen is currently not available on the market and re-cently 2 straws sold in the 2021 Mayura Sale for \$70,000 per straw! Mayura Itoshigenami JNR carries elite high reliability EBVs because of his superior carcass data. In Mayura Station herd he has averaged a 9.05 MS, 448 kg (986 lbs.) HCW, and 109.0 cm2 (16.9 in 2) EMA on an astounding 805 carcass harvested at just 26 months. This makes Tyddewi N4451 a unique combination of elite Mayura Station and Westholme blood-lines. Through his dam Westholme J0147, he receives growth and carcass traits from the top Westholme lines of Yoshifuji 8 and Yamafuji. These are two high Shimane in-fluenced (through Dai 7 Itozakura) Westholme foundation cows. The combination of the growth of these Westholme lines with the carcass traits of Itoshigenami JNR produces the massive genomic figures of +2.6 for MS, +6.9 for EMA, +40 for Carcass Wt, and +\$324w Self Replacing Index. These figures spell PROFIT for any breeder, backgrounder, feedlotter, or retailer! Here is an opportunity to add extreme value to any breeding pro-gram or branded beef operation.

- Samurai is a son of Mayura L10 with extreme, bred-leading genomics for marbling!
- His genomics marbling score and marbling fineness place him at the top of the charts for those traits. Samurai has excellent balance of traits with good growth to go along with the carcass traits. He descends from the highly respected and proven Chisahime maternal line. Samurai's sire stack solidifies his genetic values for carcass traits with proven carcass trait leaders such as TF148 Itoshigenami, Michifuku 1604, Takazakura and JVP 068. You can be certain that you will enhance carcass performance with Samurai.

- M6 Ranch Itoshigenami 108J, is an elite L10-sired bull and was one of the top selling bulls in the 2022 M6 Sale. 108J is a ¼'s maternal brother to "Mr Universe 073H".
- He leads on BREEDPLAN in both size, growth, marbling, and carcass qualities with top 5% Selection Indexes across the board. On individual traits he leads with top 3% Marble Score (+2.5) and top 7% Marble Fineness (+0.36).
- 108J is a son of Mayura L0010, who has risen to the top in the wagyu world. L10 combines the genetics of the King of Australian Sires (JNR) with TF151 Itozurudo, Kanadagene 100, and the Aizakura maternal line. These legends of the Wagyu breed are stacked on an established, leading maternal line that has produced proven sires Macquarie Wagyu C1176, TF Ithana 2, Blackmore Aizatuzurudo Y398, and Blackmore Dai Ichi Kikuzakura H017!
- 108J straws are CSS and eligible for export to ost countries — please inquire for your country.

- Arubial United x F154 x TF 147!! A genetic homerun, Julius 73K is out of the leading Bar V program and has size plus marbling on top of United & F154 genetics. The upcoming bull is very balanced with size, carcass weight (+60), eye muscle area (+4.4), marble score (+1.9) and marble fineness (+0.33) ... all four of the profit drivers. On the indexes, he scores top 1% on SRI (+\$311) and WBI (+\$323), top 3% on FTI (+\$250) and top 4% on F1TI (+\$210).
- His dam is an allstar genetic female out of the Lone Mountain with Sumo F154 on the sire side and a TF 147 x TF 148 stack on the dam size.
- Do not miss this opportunity to add size and marbling to your herd with world class ge-netics.

| PURCHASER | PRICE

- MR MARBLE JNR T157K is a top 1% high ranked (SRI) breeding age progeny male out of the recently deceased world leading GRS Mr Marble K483 (GRSFK0483). He has now been selected for the 2024 Elite Sale in Australia.
- In SRI ratings, he exceeds his great accuracy sire, Mr Marble, by 17 points - all by reflecting larger carcass, ribeye area, marble score and marble fineness! According to the most recent November (run 2b) BREEDPLAN, he is top 1% male across four indexes with WBI (+\$330), SRI (+\$329), FTI (+\$266), and FITI (+\$234).
- He leads with top 10% growth traits on 200/400/600/Mature Wtg and then follows that with top 5% Carcass traits on Carcass Wtg, and top 10% on Eye Muscle Area (+6.1), Marble Score (+2.2), and Marble Fineness (+0.32).
- Growth with strong carcass traits built on a Shigeshigetani foundation. His sire needs no introduction. Goorambat Mr. Marble K483 (GRSFK0483) is the #1 highest SRI ranked son of legendary sire WKS Shigeshigetani, one of the most well rounded and consistent carcass sires. Mr Marble is a top 1% sire. Globally, he is a top 1% sire across three indexes with WBI (+\$314), SRI (+\$312), FTI (+\$267) and top 3% FITI (+\$237). Mr Marble has one of the highest accuracies for all proven wagyu sires. K483's maternal sire is World K's Shigeshigetani, some would consider the best foundation sire in the wagyu breed outside of Japan. Of all Shigeshigetani son's, Mr Marble K483 is a trait leader for milk growth, CWT, and MS EBVs. This is due to his beautifully balanced pedigree featuring a combination of foundation sires — Shigeshigetani, Itoshigenami TF148, and Terutani 40/1.
- On the dam side is the strong Sumo donor female, Sumo Fuku K174. She is well balanced genetic pedigree of 55% Tajima and 44% Shimane/Tottori. She has a notable top 2% Marble Score (+2.7) EBV which has been inherited from a high combination of Tajima sires including Sumo Itoshigenami X81.
- This bull is now available in the USA and we expect to have exportable straws in the near future.

- Arubial Bond (a double Itoshigenami Jnr) x WKS Shigesigetani 1593 x WKS Sanjirou with Size, Eye muscle, and Marble.
- LRX-TX BOND SHIGE T144K is an elite son of Arubial Bond and is in elite group of world class wagyu bulls. He reflects a top 1% Eye Muscle Area (+12.8) and Marble Score (+2.8) and one of only 7 bulls in the world with Carcass Weight greater than zero, Eye Muscle of +12.8, Marble Score of +2.8, and Marble Fineness of +0.39. This elite class includes Arubial Bond, Mayura Notorious and Florida Bond (see graphic). Of these, semen is only available on Arubial Bond, Notorious, and LRX-TX BOND SHIGE T144K.
- LRX-TX BOND SHIGE T144K is sired by Arubial Bond Q007; an outstanding son of Mayura Itoshigenami JNR 0139 — whose genomically enhanced EBVs, with 871 progeny analyzed, are equal to and in some cases exceed his sire: MS EBV +3.1 and EMA EBV +13.9 — both trait leading in the breed (plus a BW EBV -3.8). BOND ranks inthe Top 5% for the Indexes (SRI, FTI & FIT): \$248, \$246, and \$258.
- The dam of T144K is an outstanding female from the Lone Mountain program that is a stack of WKS Shigesigetani 1594 over a WKS Sanjirou female.
