www.lonelyvalley.com | chad@lonelyvalley.com

Welcome to our 33rd Annual 'Keepin' Kind' Production Sale and celebrating over 40 years in the seedstock business. Over the years we have developed and built one of the top Limousin/LimFlex herds in the country. We have also added a core group of Angus cows and Red Angus females to the herd. Our goal is to be a one stop shop for all your cattle needs, whether it's Limousin, Angus or Red Angus genetics. We know that there are other places to make your seed stock purchases and we appreciate your loyalty. Taking care of you our customer is our #1 priority. As always, we offer a breeding guarantee on all cattle sold. Please ask us about guarantee program sale day as it may have changed some. If you should have a bull go down during breeding season, we can usually have a replacement for you within a few days, available at our ranch or we will try to meet you half way, depending on the distance. We are very proud to say that we replace very few bulls each year.

Our Nebraska herd consist of over 450 head of registered Limousin, Lim-Flex and Angus cattle. Lonely Valley's Bull Battery continues to be ranked in the top 10% for all EPD traits. Currently our bull battery ranks in the top of the breed for weaning and yearling growth and milk and does so with a low to moderate birth weight. Our Marbling and Scrotal circumference EPD is unsurpassed, not just on one bull, but all LVLS herd sires combined. Forty years of selection pressure really do pay off. We continue to place extensive selection pressure on calm, easy doing cattle. This set of bulls have been easy to work with. You will notice the difference. As well, cows that fail to breed being sent down the road. Fertility in these bulls is excellent with an average scrotal measurement that is unequaled in the Limousin and Angus.

The bulls will be available to be viewed at the ranch near Creston a few days prior to the sale. As well, we will have 300 calves on the ground by sale day and several of the herd bulls for your viewing. We will be serving a complimentary Limousin Beef lunch at 11:00 a.m. Should you need assistance with travel plans, trucking and delivery or anything else, please call and we will be happy to assist you. See you Saturday, February 24th at the Ranch.

We also have females for sale private treaty at all times. Please give us a call if you have any interest in a group of females.

Sincerely,
Lonely Valley Seedstock Chad Settje

LODGING ... Holiday Inn Express, 402.564.2566
East Hwy 30, Columbus, NE

DIRECTIONS TO LVLS ... FROM OMAHA: Take Hwy 275 North and travel Northwest to Hwy 91. Turn West on Hwy 91 and travel West to Leigh, NE, and took for the large propane tank on South side of road, continue to travel west on Hwy 91 four more miles to 160th Ave. Turn North on 160th Ave. and go three miles north to the ranch. **FROM COLUMBUS:** Go to Hwy 30 and 23rd Ave. (Kentucky Fried Chicken) and travel 18 miles North on blacktop road to Hwy 91. Then turn East on Hwy. 91 and go one mile to 160th Ave. and go three miles north to the ranch.

GENERAL SALE INFORMATION ... AIRPORTS: Columbus Municipal Airport, Norfolk Regional Airport & Omaha Eppley Airfield. **DELIVERY:** Free delivery within a 250 mile radius and cost share arrangements will be made for traveling 250+ miles. **ANNOUNCEMENTS:** Announcements made sale day will take precedence over printed material in the catalog. Please take note of any changes. **SEMEN:** Lonely Valley Seedstock reserves the right to semen interest on any bull in the sale. **TERMS:** Terms of the sale are cash unless prior credit arrangements are established between buyer and seller. Settlements are to be made with the clerk immediately after the conclusion of the auction. **MAIL & PHONE BIDS:** Mailed or phone bids will be handled in a confidential matter. If you are unable to attend the sale, simply contact anyone in the sale day phone numbers. Please call in advance of the sale so we can help you ringside sale day. All cattle purchased through our 'sight unseen program' are unconditionally guaranteed, if the cattle purchased for you on order are not what you expected, we don't expect you to pay for them, no questions. **BLOOD TYPE FOR PARENTAGE VERIFICATION:** All animals sold are guaranteed to be offspring of the recorded parents. Under the rules of NALF, all bulls born after January 1, 1991 that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be parent verified by blood typing to both sire and dam. All females born after July 1, 1987 and December 31, 1990 that are to be used for artificial insemination or naturally in a herd other than the owner of record must be sire verified through blood typing. Sellers shall make the necessary parent blood samples available to purchasers upon written request by the purchaser's so long as a written request is received by sellers within 60 days after the sale of the applicable animal. **LIABILITY:** Each animal will be the buyer's risk as soon as it is sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither owner nor sales management can be responsible for accidents, but every effort will be made to provide for safety and comfort of those attending the sale. **INSURANCE:** Insurance on your purchase can be provided by Mark Smith, Grassroots Genetics & Consulting, Ankeny, IA, 515.229.5227 **PAYMENT:** Cattle must be paid for at the time of the sale unless prior arrangements are made with sale management at the time of the sale at 615.330.2735. 3% fee on all credit card payments.

Broadcasting Real-Time Auctions

The 33rd Annual Lonely Valley Keepin' Kind Bull & Female Sale can be viewed and bids can be accepted through www.dvauction.com.

Dear Cattleman,

It is an honor to once again be involved in the marketing of the Lonely Valley Seedstock genetics. This year the Settje Family will celebrate their 43rd year propagating Limousin genetics. This February sale is their 33rd consecutive bull sale which makes it one of the longest running family seedstock sales in the Limousin breed.

The Settje name is well thought of throughout the cattle industry as both Dean and Chad have served as past North American Limousin Foundation Presidents and are very much involved in the cattle feeding industry. The family cattle operation started with Stan Settje and his sons acquiring a few purebred Limousin genetics and incorporating into their commercial cattle program. As time went on they quickly realized growing it into a Limousin seedstock operation was the right path moving forward. The program grew to one that could easily sustain a 70 - 90 head bull sale every year. Under the LVLS umbrella are Limousin, Lim-Flex, Angus and Red Angus genetics.

Their integrity and level headed approach to customer service has kept them going strong for 43 years as a service oriented business.

Please join the Settje Family and all of the marketing team as we know you are sure to be impressed with the strong sale offering.

If we can be of assistance, be sure and let us know and we thank you for your continued interest in the "LVLS" brand.

Sincerely,
Randall O. Ratliff

A high percentage Limousin bull that deserves some serious attention. LVLS Lancaster 3063L is sired by CELL History Maker 0256H ET and out of a COLE Cadillac 05C daughter, LVLS Gabrielle 3063G. On paper, he ranks in the second percentile for his weaning weight figure and in the third percentile for his yearling weight figure. LVLS Lancaster 3063L is a herd sire prospect that you'll be proud to have in your program for numerous years down the road. This is a bull we appreciate for his ruggedness, his overwhelming power and his gentle temperament. If you're in search of a complete, well-balanced bull that is sure to add the pounds to his calf crop- your search stops here. He is double black and homozygous polled.

LVLS Stabilizer 8732L is a 52% Lim-Flex son of LFL Hollywood 0151H ET. His dam, LVLS Hoo Noo? 8732H is a daughter of CELL Hercules 6120D ET and is out of a female that goes back to MYTTY In Focus. On paper this bull ranks in the 10th percentile for his weaning weight figure, in the 15th percentile for his yearling weight figure and in the 20th percentile for his milk figure. LVLS Stabilizer 8732L is a stout made bull who is thick in his top, powerful in his hip and long in his spine. He is a bull that is sure to add value to his progeny no matter the circumstance. We admire his dimension from end to end, his natural body shape and powerful muscle expression. He is homozygous black and homozygous polled.

LVLS Stabilizer 5790L is a 51% Lim-Flex bull sired by LFL Hollywood 0151H ET. His dam, LVLS Gertrude 5792G is a female sired by TMCK Cash Flow 247C. On paper this bull ranks in the 15th percentile for both his weaning weight and yearling weight figures. He also ranks in the 20th percentile for his marbling figure and in the 35th percentile for his milk figure. LVLS Stabilizer 5790L is stout in his hip, wide through his top, huge footed and rugged in his overall build. This is a performance-oriented bull that will add pay weight to your calf crop. He is homozygous black and homozygous polled.

LVLS Optimizer 237L is a 45% Lim-Flex son of CELL Highball 0237H ET, the AHCC Earning Power 900E ET son out of the MAGS American Beauty female. This bull's dam, LVLS Candy Dish 237C is a daughter of LVLS Yukon 798Y and is out of an SAV Brave 8320 female, MCBN Zandra 237Z. On paper, LVLS Optimizer 237L ranks in the third percentile for his yearling weight figure, in the fourth percentile for his weaning weight figure, in the 15th percentile for his marbling figure and in the 25th percentile for his milk figure. This bull exemplifies power, substance, functionality and shear performance. He has exceeded all expectations and we are incredibly excited for his future. Structurally speaking, he is big footed, flexible in his pastern and travels with athleticism. True functionality, maternal stability and predictability line this bull's pedigree and we expect LVLS Optimizer 237L to leave behind a trail of productive progeny. He is homozygous black and homozygous polled.

LVLS Optimizer 998L is a 32% Lim-Flex bull sired by CELL Highball 0237H ET. His dam, LVLS Miss Brilliance 9098C is a daughter of SAV Brilliance 8077 and out of a Connealy Final Product female, LVLS Ammie 9098A. Numerically, LVLS Optimizer 998L ranks in the fifth percentile for his yearling weight figure, in the 10th percentile for his weaning weight figure and in the 15th percentile for both his milk and marbling figures. Balanced, proven genetics that are sure to add the fundamentals to your cow herd, foot structure, performance and longevity. LVLS Optimizer 998L offers real-world performance and spread from birth to weaning. We love this bull's three-dimensional build, his bold body type and eye-appealing look without sacrificing performance. He is homozygous black and homozygous polled.

LVLS Stabilizer 0793L is a 67% Lim-Flex son of AHCC Dakota Thunder 215G. His dam, LVLS Carla 0794C is a female sired by LH Xplorer 152X and out of a JCL Lodestar 27L daughter. On paper, LVLS Stabilizer 0793L ranks in the 10th percentile for his milk figure and in the 35th percentile for his birthweight figure. This bull is bold sprung, loose made and sound at the ground. If you're in the business of marketing cattle that need to be powerful and profitable then you need to have your eye on this guy. LVLS Stabilizer 0793L is stout in his feature, masculine in his design and balanced from end to end. He is homozygous polled and heterozygous black.

ABOUT OUR CATTLE

FEEDING: The yearling cattle are fed to gain 3.25 per day, receiving a ration of corn gluten and alfalfa. We feed our bulls to gain sufficiently, with- out pushing a lot corn in the ration. We believe that corn causes structure problems later in life and causes yearling bulls to 'melt' when turned out to pasture. We are very proud of the success rate our yearling bulls have had.

SEMEN TESTING: All bulls have been semen tested and measured and a certificate will go with each bull sold.

UNCONDITIONAL GUARANTEE: If the cattle that you purchase at our sale fail to meet your expectations, we will replace the animal, providing you return the animal to our ranch at your expense. We will provide you with a replacement animal or give you full credit toward next year's sale or a cash refund. This guarantee expires after the first breeding season. We ask that you provide travel expenses for the replacement animal. Customer Service is #1!

ANALYZE THE PERFORMANCE DATA

BW :: BIRTH WEIGHT We take birth weights on our cattle in order to give you some method of determining calving ease. Larger calves will sometimes come very easy. We believe that calf structure determines calving ease along with size.

WW :: WEANING WEIGHT This is the weight of the cattle taken at weaning time adjusted to a constant age of 205 days, and a good indication of early growth.

YW :: YEARLING WEIGHT This is the weight of the cattle waken at approximately one year of age and adjusted to a constant age of 365 days with at least 150 days between actual weaning and yearling weight dates.

ADG :: AVERAGE DAILY GAIN Growth rate is highly heritable and these numbers will give you an idea of how the cattle respond to environmental conditions. i.e. feed, weather, etc.

HOW TO FIND WHAT YOU ARE LOOKING FOR IN THE SALE

We first select without papers, finding all visible phenotypic defects and problems. Once the outliers are eliminated, we then select on paper, eliminating those cattle with performance, EPD or genetic problems. This two-step selection process is done at weaning and repeated again just before the sale with yearling data and semen checking added to the criteria. Of course, disposition is still the number one culling criteria in our herd. Choose the type of bull that best meets your cowherd or feel free to call us to further discuss your options. We would be happy to visit with you.

'MAXIMIZERS': Purebred & High Percentage Limousin Bulls These lean, red meat machines will maximize hybrid vigor on your British and British X cows. These bulls will maximize performance with- out sacrificing calving ease. Several of these prospects go back into the purebred industry each year, being purchased by other purebred breeders.

'STABILIZERS': 75% Limousin x 25% Angus Bulls Our most popular hybrid for 28 years, these ultra-thick and deep machines are unequalled in their muscle, volume and phenotype. These bulls work well on most any cowherd, offering the extreme thickness of Limousin and the volume of Angus. Hybrid vigor can be increased and maintained with these bulls on most all straight bred and crossbred cows.

'OPTIMIZERS': 50% Angus x 50% Limousin Bulls These Angus x Limousin F1 Composites have been a hit on our sale for many years as well. Many cattlemen are using these bulls to moderate their cow size and create consistency or in a four-way cross breeding system. Optimizers are moderately framed, very deep and offer much more thickness than the pure- bred Angus cattle.

'OPTIMIZERS': 25% Limousin x 75% Angus Bulls They are 25% Limousin and 75% Angus. These bulls combine the best of the numbers of the elite Angus combined with the prominent Limousin. These bulls are huge numbered and have some of the strongest weights and stats of the entire sale offering. These bulls bring the statement of Lim-Flex to a whole new level in our breed. We urge you to see for yourself how any one of these bulls might fit into your program to sire a uniform and very desirable calf crop.

'ANGUS': Purebred Registered Angus Bulls Over the past several years we have acquired over 100 Registered Angus females, along with flushing one of our top Angus cows in our Embryo Transfer Program, to promulgate a complimentary breed to our exist- ing lines of seed- stock. Our goal is to provide Purebred Angus bulls that can offer an ideal complement to high percentage Limousin based cows. We have known for years that the Limousin x Angus cross is the best, now we will be offering both sides of the equation.

LVLS Stabilizer 0126L is a 59% Lim-Flex bull sired by LVLS Justice For All 374J. He is the AHCC Easy Rider 5594E son and out of a CJSL Creed 5042C daughter, LVLS Gwen 374G. LVLS Justice For All 374J is an exciting blend of pedigree, cow power and carcass merit. This bull's dam, LVLS 126J is a daughter of MAGS Cable and out of a HC Coleman Precision 812 female. LVLS Stabilizer 0126L ranks in the 20th percentile for both his milk figure and marbling figure. He also ranks in the 35th percentile for his yearling weight figure. This is a herd sire prospect that will add plenty of real-world balance of maternal power, muscle shape and soundness with lasting genetic value. We love this bull's athletic and fluid movement, his center body capacity and rib shape along with his extra stoutness and tremendous look. The hard work is done and now it's time for LVLS Stabilizer 0126L to shine in your program.

LVLS Land Slide 9099L is an Angus bull sired by KCF Bennett Summation. His dam, LVLS Miss Headway 9098H is a daughter of Musgrave Headway and out of a Connealy Final Product female, LVLS Ammie 9098A. Numerically, this bull ranks in the 10th percentile for both his weaning weight and yearling weight figures. He also ranks in the 15th percentile for his milk figure. What a tremendously balanced set of numerics combined with an even more impressive phenotype. LVLS Landman 9099L is as impressive in person as he is on paper, numerically and genetically. He is near-perfect on his feet and legs, excellent in the set to his pastern and tracks with conviction when he gets out and goes. We love this bull's masculinity, massive depth of rib and center body shape and his muscle expression. He is attractive from all angles, balances up incredibly well on the profile and captures your attention from a mile away.

LVLS Summation 9251L is an Angus bull sired by KCF Bennett Summation. This bull's dam, LVLS Exceptional 9252E is a daughter of Connealy Consensus 7229 and is out of an SAV Brilliance 8077 female. On paper, LVLS Summation 9251L ranks in the 35th percentile for his birthweight figure and in the 40th percentile for both his yearling weight figure and milk figure. This bull's style and look are top-notch and will challenge any herd sire prospect for many years to come. LVLS Summation 9251L has an abundance of natural thickness, depth of rib and muscle shape. A herd sire prospect that will sire the kind of individuals every cattleman desires to have grazing in their pastures.

LVLS Land Mark 2206L is an Angus bull sired by KCF Bennett Summation. He is the KCF Bennett Consent Y75 son out of an SS Objective T510 0T26 daughter, Thomas Patricia 9705. KCF Bennett Summation was the \$67,500 two-thirds interest top-selling bull in the 2018 Knoll Crest Farms Fall Bull Sale. He is known for his outcross pedigree, exceptional growth and calving ease. LVLS Land Mark 2206L's dam is LVLS Darla 2206D, a daughter of SAV Resource 1441 and out of a Bon View New Design 1407 female. This bull ranks in the 10th percentile for both his weaning weight and yearling weight figures. He also ranks in the 15th percentile for his milk figure. Not only is this herd sire prospect desirable on paper and in terms of pedigree power, he's tremendous from a phenotypic standpoint. We love how this bull comes together in terms of build and stoutness. He is super thick over his top and his overall design combined with a tremendous powerhouse look is what captures the attention of many. He has quality genetics generations back on both sides of his pedigree. Buy with confidence in this unique breeding piece.
