Selling 83 Bulls & 28 Females

Welcome to our 45th Annual Production Sale! We appreciate your interest in our program, and feel this is one of the deepest, thickest sets of bulls from top to bottom we've ever offered. The females offered represent many generations of breeding decisions centered around structure, fertility and efficient muscle growth.

Keeping up with the changes in the cattle business that enhance production and predictability can be a challenge. We've tried to keep the toolbox full through taking precise weights and measures, ultrasound data, and DNA testing that provides enhanced EPDs. You, the producer, can decide which tool works best for your operation.

While all of this is and more is a part of being in the cattle business, we've always felt we're in the people business as well. Customer service is a top priority for us, so every animal carries a one year breeding guarantee. We'll also work to deliver the cattle to you as reasonable as possible. That being said, buyers can take delivery of bred heifers and two-year-old bulls as soon as possible.

The bulls and heifers offered here have been developed to the best of our ability and what the environment can offer. We offer creep feed to the calves for the last 50 days before weaning. Yearling bulls and heifers have been developed on a growing ration in line with getting them ready to breed, without over-conditioning them. The two-year-old bulls and bred heifers stay on grass until late fall, when the bulls receive ground hay and silage and the heifers graze corn stalks and cover crop until deep snow or the grazing becomes diminished. Again, ground hay and silage, with a well balanced mineral program, take the place of grazing during frigid South Dakota winter months. Rest assured, all of this is done in coordination with our nutritionist, with the health of the cattle and the stage of production in mind.

Thanks again for your interest in Symens Brothers Limousin, and our decades and generations of production. Your calls, messages and visits are always welcome.

THANK YOU.
Symens Bros.

Limousin Friends,

It is our sincere pleasure to be working side by side with the Symens family to present their 45th Annual Muscle Up For Profit Production Sale offering.

You have come to expect excellence from the Symens program and your interest in their genetics is certainly appreciated. Bulls and females carrying the SYES prefix can be found working from South Dakota to both coasts and borders. It is truly impressive when you consider their half century involvement in the breed and the fact their genetics positively influence both purebred and commercial herds across the country.

Take comfort in the fact the Symens operation keeps a keen eye on how their genetics perform from birth all the way to the rail. In an effort to better predict how their genetics will perform, notice that animals in the sale have been genomically-tested. The end result of this meticulous attention to each and every detail are bulls and females proven to work in a variety of herds.

It should come as no surprise that customer service remains a top priority, and that each and every customer is important to the success of their program. Many of you reading this catalog are previous customers—a return customer is the ultimate compliment. These repeat customers are a true testament to both the genetics offered as well as the people who stand behind them.

We hope you will be able to attend the sale in person to take part in the hospitality the Symens program is known for.

Thank you again for your interest in this offering. Please do not hesitate to contact us. We are here to assist you in any way possible.

Regards,

MC

GENOMICALLY-ENHANCED EPDS

Animals in the sale have been genomically tested. These EPDs are re-evaluated more often than before so they will change more often. GE-EPDs provide more precise EPDs based on a combination of pedigree, phenotype and DNA. One major benefit is risk reduction through increased accuracies on many traits—the equivalent to having 8-20 progeny. This saves time when assessing young breeding stock and delivers commercial customers more confidence when buying seedstock. Also, if you look under the EPD block of information, there is a % rank category with numbers showing where each animal ranks within the population. This will help you select bulls high in the traits important to you. EPDs dated 1/24/25

LIMOUSIN BULLS

Lots 1-83

RESERVE CHAMPION
PEN OF LIMOUSIN BULLS
2025 National Western Stock Show

Born: March 2024
Avg. Weight: 1,113 lbs.
Avg. WDA 3.74 lbs.
Avg. UREA 16.08
Avg. UIMF 2.62%
Avg. UFAT 0.22

For 54 years we have taken our role as professional seedstock producers very seriously. Our goal has always been to supply genetics capable of helping our customers succeed. As you study this set of bulls, know that every effort has been made to manage, measure, evaluate and represent these bulls in a manner consistent with our philosophy to insure 100% customer satisfaction.

The bulls were weaned in October and put on a grower ration of prairie hay, corn silage, corn and supplement to project a 3.5 lb per day gain. After taking yearling weights they will be backed off to prepare them for breeding in the pasture this summer. They were poured for lice in January and again if needed. We will have a supplement sheet prior to the sale with adjusted ultrasound carcass data, adjusted yearling weights and scrotal measurements. We are confident all bulls should calve virtually unassisted on mature cows.

- Will keep and feed bulls until April 15.
- Free delivery to 400 miles.
- First breeding season guarantee.

AGE-EPDS

Member of the 2025 National Western Reserve Grand Champion Pen of Limousin Bulls. Leading off our 45th Annual Sale is SYES Mastercharge 89M. This homozygous polled, red son of SYES Hardrock 65H is out of a fantastic LFLC Empire 903E daughter. This is a great bull to start off our 2025 offering. Mastercharge is stout in his features with a big, square hip and lots of muscle shape that ties down nicely to his quarter. With added depth of rib and flank and a smooth shoulder, this herd-sire prospect will serve his new owners well for years to come. When you factor in his breed-leading numerical profile you really start to get excited! He ranks in the top 5% for ribeye area, top 10% for yield grade and top 15% for calving ease. There is a lot to like about this bull. With his powerful phenotype, genotype and lineage, he offers you a package capable of adding value!

Member of 2025 National Western Stock Show Pen. You'll want to sit back and enjoy what this guy does in your herd. SYES McClintoc 202M is a homozygous polled son of COLE Genesis 86G, which I think you can see a pattern with these sons—incredible carcass merit, maternal traits and growth. His dam is a nice-producing LFLC Empire 903E daughter. Study the strong numbers, look at the impeccable phenotype and we think you'll agree it works with McClintoc and works well! Breeding-leading EPDs from top to bottom with impressive maternal traits. This bull is the real deal!

SYES Lexicon 48L is a powerful RMKR Hercules son. He is a double homozygous bull that has an impressive look about him. He is rugged in his design and sound on the move. Opportunity knocks.

BRED HEIFERS

Lots 84-97

The bred heifers presented here represent our five decade long commitment to the Limousin breed and the producers who have come to rely on the muscle, growth and efficiency inherent to the Limousin breed. They sell bred to bulls proven for calving-ease as well as growth traits. The projected due dates are based on ultrasound pregnancy testing done in September. Those bred earliest will be due shortly after the sale and we will help arrange delivery as soon as possible. They have had two rounds of Scour Guard vaccinations for scour prevention. We encourage you to be prepared to take the females home early so they may acclimate to your environmental conditions prior to calving. If you take them home sale day we will credit you \$50 per head.

OPEN HEIFERS

Lots 98-111

This top-notch set of yearling heifers was selected based on their conformation, pedigree history and EPDs in order to predict superior future production. Just as with their yearling bull contemporaries, since birth, these heifers have sorted themselves toward the top of their respective calf crop. In many instances, their genetic makeup is similar to the females we have chosen to retain in the herd to produce the next generation of SYES bulls and replacement females. We encourage you to take these females home early so they may adapt to your management style prior to showing or breeding. If you take them home sale day we will credit you \$50 per head.
