Dear Friends,

Welcome to the Coyote Hills Ranch Annual Bull Sale. We trust you will come early and enjoy yourself, meet new friends and renew old acquaintances. Circle March 8 on your calendar and plan to be with us in Chattanooga, Oklahoma.

The covers of this year’s catalog pay tribute to the fact 2025 marks the 51st year we have hosted Limousin sales at this location. The memories are plentiful and the friendships we have made are priceless. Rest assured we appreciate our new customers just as much as our very first ones 51 years ago.

As it always has, the annual Coyote Hills Ranch Bull Sale offers some of the top Limousin and Lim-Flex genetics available anywhere in the country. Most of the bulls were born and raised here on the ranch and those that were not have been here since weaning time and fed as a group in a 20 acre trap. The Lawrence and Parkinson bulls came at weaning time. Buy from any of these breeders with the utmost confidence.

We congratulate the Lawrence Family Limousin operation for their success at the recent Cattlemen’s Congress in Oklahoma City and National Western Stock Show in Denver. The Lawrence family showed the People’s Choice Champion and Reserve Champion Lim-Flex Pen at the 2025 Cattlemen’s Congress and the Division Champion Pen of Lim-Flex Bulls at the 2025 National Western Stock Show. They sell March 8 as Lots 1, 2, 3, 4, 9 and 29.

You will note that we offer a host of information in the catalog – and additional information will be available sale day on the supplement sheet. All bulls will have passed a breeding soundness exam, trich test and semen evaluation by Dr. L.D. Barker prior to the sale. If you have any questions regarding any of this information, don’t hesitate to contact any member of the sale team.

The bulls will sell in catalog order again this year. We believe this is the best offering of bulls we have ever offered and “good” ones can be found from the top to the bottom of this offering. We invite you to come and see for yourself.

We appreciate your interest in our genetics and look forward to working with you. Don’t hesitate to contact any one of us with any questions you may have.

See you March 8.

Sincerely,  
Coyote Hills Ranch Crew and Friends

Today, as we remember Ken, our husband, father, grandfather, partner, fellow cowman and friend, we thank God for the precious time, lessons, laughter and love we shared with him. We honor and strive to carry on his legacy with courage and the dignity he lived by. He has instilled in us his love for the cattle industry as well as his genuine appreciation of you—his friends and customers. We thank each of you for your continued support of our seedstock programs.

## FOR YOUR QUICK REFERENCE

**B**  
**G**  
**M**  
**C**  
**MB**

Due to the limited amount of time in a fast-paced auction, we are providing an additional tool for your quick reference for your selection of bulls for a specific purpose. Each bull has been evaluated by visual inspection, pedigree analysis, performance records and EPDs.

**"B"** is in the catalog to indicate those bulls we feel comfortable recommending as calving-ease bulls with birth weight EPDs below breed average and most likely suitable to use on heifers.

**"G"** is noted on those bulls whose evaluation of all criteria including their own performance and EPDs indicate they can add growth above breed average.

**"M"** is listed on those bulls whose pedigree and EPDs indicate they can add maternal ability or milk for those who plan to keep replacement heifers.

**"C"** is listed on those bulls whose carcass weight EPD and ribeye area EPD exceed breed average thus adding pounds of carcass and muscling to their offspring.

**"MB"** is listed on those bulls whose marbling EPD and/or ultrasound IMF% indicate their ability to sire offspring that fit the mainstream market.

## POLLED TEST

Gene Seek Inc. of Lincoln, Nebraska, performed the DNA tests for the polled trait. Every animal has two copies of each gene. One copy of each is inherited from the sire, the other from the dam. Polled is a dominant gene, meaning animals with one or two copies of the polled gene will be phenotypically polled. Animals having two copies (homozygous) for the polled gene will produce only phenotypically polled offspring.

**Tru-Polled results are reported in one of the following categories:**

**Homozygous Polled** = Two (2) copies of the polled gene

**Heterozygous Polled** = One (1) copy of the polled gene

**Horned** = Zero (0) copies of the polled gene

**Inconclusive** = Test cannot determine if the animal has copies of the polled gene

Some homozygous polled cattle are results of both sire and dam being homozygous, thus they are marked homozygous polled (ped).

The seller warrants that test samples have been accurately drawn and submitted and that all published results are accurately reported. The Gene Seek service is based upon scientific, biologic analysis and assessment of statistical probabilities. Gene Seek believes there is a range of probabilities and does not assure 100% accuracy. The Gene Seek service may fail from time to time, and either not be able to make a determination or make an incorrect determination.

## TRAIT GUIDE

### Bulls Suitable for Heifers

5	35	57	74
8	36	59	76
9	41	63	82
12	44	64	83
24	46	68	85
30	47	69	89
31	54	70	

### Bulls Above 35th Percentile for Milk

2	12	38	78
4	13	59	82
6	21	63	84
7	22	65	
8	25	66	
10	30	73	

### Bulls High in Marbling

4	24	47	67
5	26	48	68
6	27	49	69
7	28	50	70
8	29	53	72
10	30	54	74
11	31	55	75
12	35	56	76
13	36	57	79
14	39	58	80
15	41	60	81
16	42	61	83
20	43	63	85
21	44	64	86
23	46	66	88

Take note: When applicable bulls are indicated with the GE-EPD (Genomically Enhanced Expected Progeny Differences) logo. They are the best estimate of the animal's genetic worth as a parent as if they have produced 10-25 progeny.

**All bulls selling have been sire-verified.**

# EPD AND PERFORMANCE INFORMATION

The EPDs in this catalog reflect the new base used to calculate EPDs for Limousin cattle. They now have the same look as Angus EPDs. This rescaling helps simplify the use of Limousin EPDs by managing the ranking benchmarks in both breeds. While EPDs of the two breeds cannot be directly compared, if you know the benchmark within the Angus genetic evaluation, you also know the EPD benchmarks within the Limousin evaluation. Periodically, EPDs are recalculated to include new data submitted to NALF. This is done to keep them up-to-date and improve accuracies. With this in mind, expect EPDs to change on the animals you purchase. The EPDs for the Lim-Flex calves reflect the combined EPDs of the Angus Association and the current information in the Limousin EPD bank from the sires and dams of that breed.

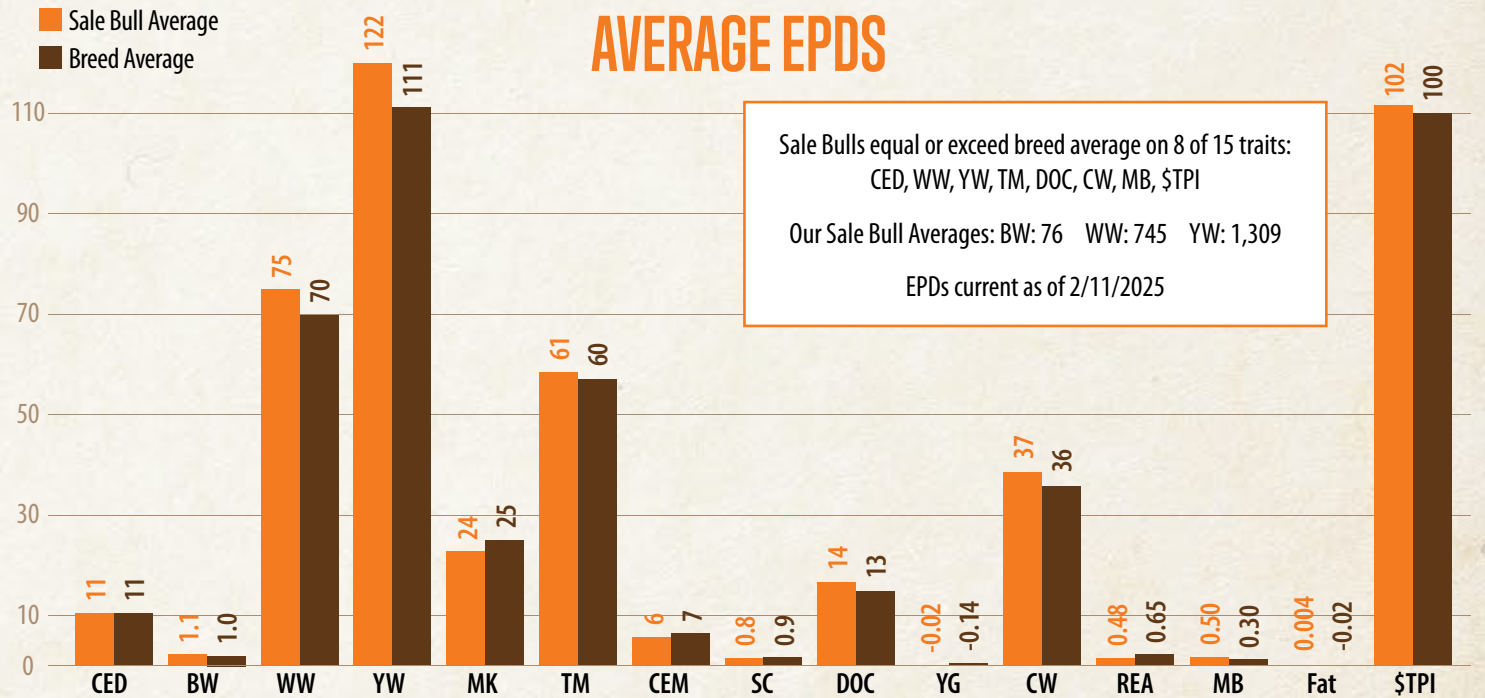

## PERFORMANCE EPDS—

- CED EPDs:** Stands for Calving Ease Direct and is important when choosing sires to produce calves born easily. The higher the number, the better.
- BW EPDs:** Expresses the difference in birth weight on the progeny of the bulls being compared.
- WW EPDs:** Expresses the difference in pounds at 205 days on the progeny of the bulls being compared.
- YW EPDs:** The same as WW, except it is the weight at 365 days.
- MK EPDs:** Predicts differences in weaning weights from daughter's calves due to genes inherited for milk.
- TM EPDs:** A combination of 50% WW plus milk equals total maternal ability.
- CEM EPDs:** Stands for Calving Ease Total Maternal and is important for choosing sires that produce replacement females that give birth to their first calf easily. The higher the number, the better.
- SC EPDs:** Expressed in centimeters of scrotal circumference, and compares the difference expected in sons of the animal. Scrotal EPDs are a good indicator for age of puberty of both the sons and daughters of the animal.
- DOC EPDs:** An expression of disposition, the higher the number, the better.

## CARCASS EPDS—

- YG EPDs:** Due to the limited range and usefulness of Limousin fat thickness EPDs, they have been replaced with the more informative EPDs for yield grade. YG EPDs are favored and indicate genetic differences for yield grade and cutability of offspring.
- CW EPDs:** Expresses the difference in pounds of carcass weight.
- REA EPDs:** Expresses the difference in square inches of ribeye area.
- FAT EPDs:** Expresses the difference in the inches of back fat.
- MB EPDs:** Expresses the difference in the amount of marbling or flecks of fat in the ribeye.
- \$TPI EPDs:** Terminal Profit Index is used to rank animals according to net genetic merit for producing the highest profit potential for fed cattle. \$TPI is designed for terminal sires that excel in feeding performance and carcass characteristics on an economic relevant basis.

This information is provided to help you analyze and sort the bulls to fit your specific needs. We realize this is a lot of data to use, so please ask us if you need further assistance.

# Glossary of Sale

**FERTILITY TESTED** – Definition: Bulls' semen has been tested by a licensed veterinarian or a recognized A.I. breeding center and is considered a satisfactory breeder as per the accompanying signed veterinarian certificate.

**HEALTH PAPERS** – Definition: Proper health papers furnished on all animals in the sale resulting from T.B. and Bangs test.

a. **T.B. TEST** – Animals have been tested for T.B. and found negative within thirty (30) days of the sale, both males and females with the exception of young calves or from a TB-free state.

b. **BANGS TEST** – Animals have been tested by licensed veterinarian and have met the requirements for a negative test in the state which animals sells. This includes all males and females except those exempted from this test due to age, calfhood vaccination, or certified Brucellosis free herd status.

**BREEDER** – The owner or lessee of the dam at the time the dam was served to produce the calf.

**OWNER** – The individual, partnership, or corporation in whose name an animal is registered.

**HORNED** – Those animals with hard, bony projections from their head. May be surgically removed or dehorned.

**POLLED** – Those animals that are genetically hornless. They have at least one copy of the polled gene. Animals with both parents polled that have been tested and found not to be homozygous are not listed double polled, but Het Polled.

**DOUBLE POLLED** – Those animals that result from two polled parents and have not been DNA-tested.

**HOMOZYGOUS POLLED** – Individual has been DNA-tested to be genetically "PP" or proven by parentage to be homozygous thus not carrying the "p" horned gene by pedigree or DNA test.

**PB** – Those animals that are 94% or more Limousin.

a. **American PB** – Those upgraded PBs that are 94% or greater Limousin, and 6% or less other breed as indicated by the breed codes. Registration numbers beginning NPM (North American PB Male) and NPF (North American PB Female).

b. **Fullblood** – From 100% or full French ancestry. They have registration numbers beginning with NFM (North American Fullblood Male) and NFF (North American Fullblood Female).

**HOMOZYGOUS BLACK** – DNA-tested and found to be homozygous black or genotype ED/ED or both parents were DNA-tested homozygous.

**DOUBLE BLACK** – Indicates animals whose parents are both black in color. These animals have NOT been DNA-tested. Animals with both black parents have been tested and found to be red carriers are not listed as double black, but as Het Black.

**LIM-FLEX** – Denotes the Limousin-Angus hybrid that may vary in composition from 25-75% Limousin and 25-75% Angus or Red Angus with a maximum allowance of other breed or unknown genetics of 12.5%.

**EPD** – Expected Progeny Difference – A user friendly way of summarizing performance information for quick reference.

**GE-EPDs** – Genomically Enhanced Expected Progeny Differences are the best estimate of an animal's genetic worth as a parent. GE-EPDs predict an animal's genetic worth as a parent as if they have produced 10-25 progeny

**% RANK** – Percentile breakdown that allows for quick reference when comparing individuals to current sires of the most recent calf crop recorded with NALF.

**(100/89.9)** – Percentage of Limousin genetics. The first figure indicates the rounded NALF percentage while the second number is the actual percentage of Limousin genetics.

**RETAINING SEMEN INTEREST** – Seller retains option to collect semen on said bull at buyer's convenience and seller's expense. Should both parties agree to offer semen for sale – each share in revenue proportionately.

LIVESTOCK NUTRITION CENTER

## BETTER FEED, BETTER RESULTS

Livestock Nutrition Center specializes in blending customized rations, supplements and premixes to meet the specific nutritional needs of your operation. We understand that management, performance objectives and feeding practices can be vastly different between operations, and that these differences dictate specific nutritional or formulation requirements. Our experienced sales staff will work with you to design a feeding program that is specific to your operation.

LFL Lafayette was our lead bull in our Division Champion Denver Pen of Bulls. His dam, LFL Gold Medallion, is a flushmate to LFL Gamer who is owned with Wulf Cattle. Lafayette appears to be and his numbers indicate he will be a multipurpose seedstock bull that can sire both females and herd sires. He ranks in the top 5% for WW, 10% for YW and 1% for DOC. Retaining 1/3 Semen Interest.

Congratulations Bruce Lawrence and the entire crew at Lawrence Family Limousin for being named The North American Limousin Foundation Promoter of the Year.

Time to reset your eyes as we dig into this select set of impressive yearling bulls. If you are looking to take advantage of the front-end of our genetic improvement this section is for you. These yearling bulls are subjected to the same rigorous standards as their fall yearling counterparts. In other words, they have cleared every hurdle we have put in front of them. The pedigrees are fresh, their performance is impressive and they are ready to be taken home and make a positive impact on your program.

# Terms & Conditions

## IDENTIFICATION OF ANIMALS

1. Each animal sold will have a readable tattoo corresponding to its registration paper.
2. Seller agrees to check all tattoos for accuracy prior to the sale. The buyer has the responsibility for rechecking the tattoos after taking possession and reporting any discrepancies to the seller immediately.
3. All animals to be sold will be identified by their official registration numbers, their tattoos and their registered names. If nicknames are used, they should be in addition to the other information.
4. The NALF Board of Directors recommends that, when any animal is sold, there is complete disclosure of any retained genetics in the form of pregnant recipients, frozen embryos or frozen semen.
5. The prefix in an animal's registration name cannot be removed or changed by subsequent owners. Owners other than the original applicant cannot add a two-, three- or four-letter prefix to the name of the animal unless it matches the prefix in the animal's tattoo.

## REGISTRATION CERTIFICATES

1. The seller of the animal will submit the original registration certificate with transfer information or an application for registration with transfer information on it so that a certificate can be produced by NALF and transferred to the new buyer. The seller must sign the back of the certificate on the application to authorize the transfer.
2. It is the responsibility of the seller to provide NALF with the buyer's complete name, address and membership number (if available) so the transfer can be completed. It is important that the membership number be given if the buyer is already a member of NALF.
3. It is the seller's responsibility to provide the registration certificate or application and transfer information to NALF within 60 days following the date of sale and pay transfer and registration fees.

## TERMS

Terms of all sales are considered to be cash unless credit arrangements have been made prior to the sale between the buyer and the seller.

## HEALTH

1. On all animals sold, health tests will be announced at the sale or printed in the sale catalog. It is understood that health papers reflect the condition of the animal at the time of the sale but carry no further guarantee as to the future health of the animal.
2. Buyers having special health requests or who wish to take cattle into states with specific and rigid health regulations should inquire specifically about the health tests required for entry into their state prior to the sale.
3. All females sold are considered to be calfhood vaccinated for brucellosis unless they are otherwise stated in the catalog or announced from the block. It is suggested that verification of vaccination be written on the health certificate.

## PURCHASER'S RISK

1. Each animal becomes the risk of the purchaser as soon as it is sold.
2. It is the responsibility of the buyers to see that their purchases are fed and cared for following the sale. 3. It is the responsibility of the buyers to arrange all trucking for their purchases.

## ANNOUNCEMENTS

1. Any change from the information that is printed in the catalog will be announced from the auction block. 2. All announcements made from the auction block take precedence over the printed catalog.
3. Cataloged lots not selling will be announced prior to the sale or printed on a current supplement sheet.

## BREEDING GUARANTEE

1. All animals are guaranteed to be breeders with the exception of (a) calves under 12 months of age; (b) in the event of any injury or disease that occurs to the calf after sale; (c) gross negligence or willful misconduct on the part of the purchaser; or (d) females used in embryo transplant/transfer (ET).
2. A lactating cow with calf at side, sold as one unit, is a proven breeder, as indicated by the calf at side. 3. Bulls are guaranteed to be breeders at the time of sale or at 14 months of age if they are younger than 14 months at time of sale. Any bull that either settles cows by natural service or passes a fertility test made by a competent veterinarian is considered fertile. Any guarantee with respect to the ability to freeze semen shall be a separate agreement between buyer and seller.
4. Females sold as safe in calf have been examined by a competent veterinarian or other reproductive technician and are so guaranteed to be with calf. It is the buyer's responsibility to pregnancy-check all females and report any discrepancies within 30 days following the sale.
5. Any guarantee with respect to ET production shall be a separate agreement between buyer and seller.

## OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT

1. All claims for adjustments or refunds must be made in writing either within six months of the date of the sale or no later than six months after the animal reaches 18 months of age, whichever occurs later.
2. In the event that an animal is claimed to be a nonbreeder, the animal must be returned to the farm of the seller in good condition and must have met the health requirements of the original seller's state. The seller shall be entitled to six months' trial following the return of the animal in which to prove that the animal is a breeder. If, at the end of six months, the seller has been unable to prove the animal as a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the total purchase price. The return of the purchase price shall in all cases be deemed as full settlement.
3. Any expense incurred in transporting the animal that is claimed to be a nonbreeder shall be the responsibility of the purchaser except that the seller shall be responsible for transportation costs in the excess of the distance between the purchaser's farm and the location of the sale. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expenses incurred for transportation.
4. It is the obligation of the buyer and seller to negotiate any settlements on cattle that have not been properly represented at a sale. The selling of an animal constitutes a contract between buyer and seller, and it is neither

the responsibility nor the right of NALF or of the sale-management firm to settle disagreements between buyers and sellers of cattle that have not been properly represented.

The return of an animal at the expense of the purchaser with a refund of the purchase price made by the seller is in all cases considered a complete settlement. Other settlements, which are negotiated between buyer and seller, may be equitable to cover instances in which cattle are not as represented sale day, but that does not warrant complete return of the animal.

## PARENTAGE VERIFICATION

1. If, at some time, the purchaser raises a question as to the accurate parentage of an animal he has purchased, it may be settled by DNA-typing. DNA samples will be taken by a licensed veterinarian of the animal in question and of its sire and dam if they are not currently on file. The verification of the parentage test will be made by one of NALF's approved laboratories (GeneSeek Inc., or Zoetis Inc.). The results of these tests will be sent directly to NALF and will be sent on to both the purchaser and the seller so they will be aware of the official results.
2. If the DNA tests indicate that the animal is not as it was registered originally, the seller will reimburse the buyer for the test and will refund the total purchase price of the animal or replace the animal with another of equal quality and value as determined by the purchaser.
3. It is important to remember that DNA-typing is not 100 percent exclusive and that it simply identifies animals that will qualify as the parents or animals that cannot be the parents.
4. All bulls born after January 1, 2009 that are to be used for artificial insemination (AI) must be parent-verified by DNA-typing (both the sire and dam). Sires born between January 1, 2001 and December 31, 2008 must have a DNA type on file and be parent verified through DNA typing. All females born after January 1, 2009 that are to be used for ET must be sire-verified through DNA-typing. All females born prior to January 1, 2009, that are to be used for ET must have DNA type on file and be sire verified through DNA typing. If sire is deceased and no sample is available for DNA typing, blood typing may be used for sire verification.

## HORNED/SCURRED/POLLED

### DEFINITIONS

1. **HORNED** – An animal with a horn growth affixed to the skull that has or has not been removed.
2. **POLLED/SCURRED** – An animal with rudimentary horn growth that will not develop into a horn. The rudimentary horn growth may or may not become affixed to the skull at an older age.
3. **POLLED** – An animal with absence of horn growth. (An animal can have scurs and still be genetically polled.)
4. **SMOOTH POLLED** – A smooth-polled individual has no scurs and does not develop scurs later in life.

### GUARANTEES

1. If an animal is sold as polled or polled/scurred and proves to be horned, the seller shall be obligated to refund the purchase price upon return of the animal to the farm of the seller at the expense of the seller or may be exchanged for a polled animal of equal value, whichever is acceptable to the buyer. The buyer has 30 days from date of sale to notify the seller that an adjustment is in order.
2. If an animal is sold as smooth-polled and proves to be scurred, the seller shall be obligated to refund the price upon return of the animal to the farm of the seller at the expense of the seller or, at the buyer's option, shall be exchanged for a smooth-polled animal of equal value.
3. If an animal is sold as polled and develops scurs, the seller will not be obligated to make any adjustment because a scurred animal is considered polled.
4. If an animal is sold as polled and has scurs, it shall be announced at the time of sale that the animal has scurs. If it is not announced and the buyer finds before the animal leaves the sale premises that the animal has scurs, the buyer must notify the seller of the findings. The seller shall then be obligated to refund the purchase price.

## DISCLOSURE OF RETAINED GENETICS

Because the sale of a registered Limousin animal constitutes the transfer of ownership of all, or a portion of, a "genetic package," it is the seller's responsibility to inform potential buyers of all retained genetics of animals in circumstances where potential exists for buyers to be misled. This includes, but is not limited to, semen collected and frozen prior to sale, embryos flushed, existing clones as either live animals or embryos, and cows carrying the service of an offered bull.

## DISCLOSURE OF TESTS RESULTS FOR KNOWN GENETIC DEFECTS AND FACTORS

1. The seller shall have an affirmative duty to notify the buyer of any test results for genetic defects or genetic factors not otherwise reflected on an animal's pedigree.
2. Nothing contained herein should be construed to relieve the parties from complying fully with the rules and policies of NALF relating to genetic defects generally or individually.

## LIMITATIONS OF OBLIGATIONS

1. If these suggested terms and conditions are adopted, they should constitute a contract between the buyer and seller for each animal sold under these terms, as such; and it should be binding upon both parties. Animals resold following purchase in a sale shall constitute a separate transaction, and the privileges and obligations of the original two parties connected thereto are not covered by the terms and conditions of sale.
2. NALF, its directors and employees are not in any way responsible or liable for enforcing the suggested terms and conditions of any agreement involving transactions between buyers and sellers.

## INSURANCE

Anyone wishing to insure their purchases may do so by contacting the sale manager or settling clerk.

## MAIL BIDS

Mailed or telephoned bids will be handled in a most confidential manner if you are unable to attend the sale personally. By contacting a representative of the sale staff prior to sale day, you will enable us to assist you at ringside on sale day.
