

Reynolds Land and Cattle

43rd Annual Production Sale

MARCH 21, 2025

LUNCH STARTS AT 11

SALE AT 1 P.M.

LIMOUSIN, LIM-FLEX, ANGUS & SIMX BULLS AND HEIFERS

PAP tested and Rancher approved!
“A Breed Apart”

Welcome

We welcome you to our 43rd Production sale and over 50 years of selling high quality Limousin and Limousin x cattle. We are in some exciting times in the cattle industry with record prices occurring around the country. With cow numbers down over 2% country wide, and the demand for quality beef both nationally, and internationally at an all time high, we are looking at some of the best times ever in the cattle business.

We continue to strive to produce the absolute best quality bulls and females for our customers. It is our commitment since dad started doing this over 50 years ago. If you are looking for high quality limousin, Lim-Flex, angus, or Simmental x bulls or maybe a heifer or two to add to your program, then plan on joining us on March 21, 2025 in Sanford, or join us online with DV Auction.

As we all know in agriculture and life we face challenges everyday but we continue to adjust and advance. We are grateful for all of you involved in this wonderful industry and consider you the best of the best! Thank you for your interest in our program and we look forward to catching up on sale day.

Sincerely, The Rod Reynolds Family

Reynolds Land & Cattle

43rd Annual Production Sale
At the ranch Sanford, Colorado

**17463 County Road 19
Sanford, CO 81151**

Schedule:

Bulls and Females are available for viewing anytime prior to the sale.

Friday March 21, 2025

11:00 - BEEF lunch

1:00 Sale Starts

Auctioneer:

Aaron Tenney _____ 208-320-8017

Sale Day Phones:

Rod Reynolds _____ 719-588-1230

Troy Reynolds _____ 719-580-1308

Joe Cary _____ 719-580-8702

Sale Consultant:

MC Marketing

Kiley McKinna__402-350-3447

Wiley Fanta _____320-287-0751

Air Transportation: Commercial airline service is available into the Alamosa Airport, 14 miles north of Sanford.

Buyers unable to attend the sale may send their bids to any of the sale staff or auctioneer. We guarantee 100% all sight-unseen purchases.

Terms: Terms of sale are cash or bankable check on sale day unless prior arrangements have been made. Settlements are to be made with clerk immediately after the conclusion of the auction.

Health and Guarantee: All bulls will be fertility and trich tested prior to sale. Health certificates will be provided on each lot sold. All bulls, 12 months of age and older are guaranteed breeders. Tests and Certificates will be done by Dr. Jeremy Sowards of Elk Creek Vet.

We follow the NALF guarantee. A bull is determined a breeder when he settles one or more females.

Liability: Each animal will become the buyer's risk as soon as sold but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the animal. Neither owner nor sales manager can be responsible for any accidents, but every effort will be made to provide for safety and comfort of those attending.

Announcements: Announcements made on sale day will take precedence over printed material in catalog.

Feed Arrangements: If the buyer desires, Reynolds Land and Cattle will continue to feed the purchased yearling bulls their growing rations at the ranch in Sanford. The service will be free of charge. The bulls can then be picked up at the ranch or delivery arrangements made no later than April 15, 2025.

Free delivery on all cattle for the first 200 miles. Any distance past that we will work to accommodate delivery to central locations.

Weights and Scrotal Measurements: Will be available on sale day.

All animals have been PAP tested here at the Ranch Dr. Tim Holt. We hope this will help you in choosing a bull or bulls for your program. Bulls and heifers without PAP scores listed tested over 50.

Online Bidding:

The sale will be broadcast live on DVAuction.com with videos available prior to sale day.

Reynolds Land and Cattle

43rd Annual Production Sale

OUR BREEDING PHILOSOPHY

When dad “Phil” was discharged from the Army in 1946, he had saved up enough money to buy 20 acres of land and 14 hereford, shorthorn cross heifers. He had always had a desire to be a cattleman, now as the third generation rancher he had his opportunity.

In the late 60’s a brand inspector told dad he thought his calves were a little small that year, that didn’t set well with dad and he began studying what he might do to improve the genetics in his herd. Brown Swiss would improve the milk and growth. Angus bulls were used on those heifers until he saw a couple of Limousin calves at the NWSS, his comment was”those are the best calves I have ever seen, someday we will have a whole herd of them.” We realize most of those original characterists are gone from our herd, but the genetics continue on deep and has made us maybe “A Breed Apart.”

Dad once told me, if you just raise good cattle and not chase the fads, you will always have good cattle. We at Reynolds Land and Cattle believe in cattle that calve easily, have plenty of growth, convert feed, have excellent dispositions, make good mothers with plenty of milk, all while getting out and working in the harshest conditions.

We believe by using Reynolds Land and Cattle bulls and heifers, you will be raising some of the most problem free, productive cattle in the industry. More live calves due to the calving ease and hybrid vigor, which means more pounds at weaning time. The feeders love them because they convert feed better than any other breed. The packers love them because they get more saleable product than from any other breed. We believe we are producing the kind of cattle that exceeds the industry standard. If you haven’t tried our cattle, maybe it’s time you did, your bottom line will be glad you did. And if you have, come back as we will continue to work hard at making what we think are really good cattle even better.

Expected Progeny Difference and Performance Information

The EPD's in this catalog reflect the new base used to calculate EPD's for Limousin cattle. They now have the same look as Angus EPDs. For commercial producers this rescaling helps simplify the use of Limousin EPDs by making the set of ranking benchmarks similar for both breeds. While EPDs of two breeds cannot be directly compared, if you know the benchmark within the Angus genetic evaluation, you also know the EPD benchmarks within the Limousin evaluation. Twice a year the EPDs are recalculated to include any new data that has been submitted to NALF. This is done to keep them up-to-date and improve accuracies. With this in mind, expect EPDs to change on the animals you purchase. The EPDs for the Lim-Flex calves reflect the combined EPDs of the AAA and the current information in the Limousin EPD bank from the sires and dams of that breed. As this is a fairly new development, the accuracies will be low.

Performance EPDs:

BW - Express the difference in birth weights on the progeny of animals being compared.

WW - Expresses the difference in pounds at 205 days on the progeny of bulls being compared.

YW - Expresses the difference in pounds at 365 days on the progeny of animals being compared.

MK - Expresses the differences in weaning weights from daughter's calves due to genes inherited for milk.

SC - Expressed in centimeters of scrotal circumference, and compare the differences expected in sons of the animal.

Scrotal EPDs are a good indicator of age of puberty of an animal's offspring.

DOC - Expresses the difference in animals predicted for docility. Higher EPD value represents calmer behavior.

YG - Expresses differences in yield grade score. Smaller values predict a better lean to fat ratio.

CW - Expresses the difference in pounds of hot carcass weight.

REA - Expresses the difference in square inches of ribeye between the 12th and 13th rib.

MB - Expresses the difference in degree of marbling score units.

\$TPI - Terminal Profit Index predicts genetic differences in profit per carcass by combining potential of post-weaning growth, quality grade and yield.

*EPDs are subject to change as more information is calculated.

A word about PAP..

Pulmonary arterial pressure (PAP) testing is used as a predictor in cattle for susceptibility of high mountain disease (HMD)

Not all PAP tests are equal! There are key differences to pay attention to:

- Elevation of the animals tested.
- Age of the animal when tested.

Elevation: The higher the elevation of the test the higher the accuracy of the test. Here at Reynolds Land and Cattle we test all our cattle at over 7,600 feet. Our cattle run up from 8,500 to close 10,000 feet in the summers and have been adapted to the elevation for many generations. Our PAP tests are a good indicator but are simply another tool to use in your selection.

Don't let an animal get away or overlook one that may be a few points higher than your ideal score. Evaluate your bulls in a range of PAP scores including those that are slightly above your target score. PAP score is an indicator but we also stand behind our elevation adapted genetics and cull and select animals accordingly. Below are only guidelines as other considerations should be given to all other aspects of an animal. Please know that we bring you the best of our best.

PAP Risk Factor at High Elevation Test Chart
 PAP test conducted at elevation of 5500-7000 feet.
 (75-95% Repeatable, Predictive Value)

PAP SCORE	USE AT LOW <4000 FEET	USE AT MODERATE 4000-5000 FEET	USE AT HIGH 5500-7500 FEET	USE AT EXTREME >7500 FEET

A MODERATE THICK MADE BULL THAT COMES FROM A GREAT COW FAMILY.

” Consistently, Limousin and LimFlex active sires are in the top percentile ranks for docility.”

BOB WEABER
KANSAS STATE
UNIVERSITY

“Superior Feed Efficiency: The Limousin breed has documented advantages in feed efficiency and is a proven leader in carcass cutability and retail yield. The combination of these attributes result in more saleable beef produced per pound of feed consumed. That means increased efficiency and improved sustainability.”

WE END THE BULL OFFERING WITH A GOOD FANTSASTICO SON THAT IS OUT OF A TOP END COW. SHOULD SIRE POWERFUL CALVES THAT WILL CONTINUE TO GROW AND MAKE THE FEED YARDS AND PACKERS EXCITED.

ELITE YEARLING HEIFERS

These phenomenal cow prospects are strategically designed to go out into the industry and produce economically relevant cattle. These girls are right out of the replacements. We stand behind these females 100%. Whether you're looking for a show prospect, a serious brood cow, or just something to make all your neighbors jealous help yourselves!

**For an additional \$250 we would be glad to keep these heifers here at the ranch until June 1st and service them first service A.I. to any sire of your choice including our owned herdsires.

WE DONT HAVE MANY RODZ ELITE FEMALES BUT THE ONES WE DO HAVE WE LIKE. OUT OF A GOOD YOUNG MODERATE FRAMED HEAVY MILKING COW.

THANK YOU!!

CLASS WINNER AT CSF

We also have a set of cross-bred cows used to raise show steers and heifers. They consist of Chi-Maine, shorthorn, Simmental, and Angus. This began a number of years ago after leaving Colorado State fair and knowing we needed to do more to compete in the Final Drive. From this herd have come numerous champion steers and females all across the country. Watch for our sales this fall on sconlinesales.com and pick out a champion.
