**OUR BRANDED PRODUCT**

In 2024, HeartBrand Beef graded a total of 17,076 individual carcass sides utilizing a camera grading system. To our knowledge, this is the largest set of Akaushi cattle ever graded, and quite possibly, the largest set of Wagyu cattle graded in the United States that can be used for breeding evaluations and data. The average marbling on all 17,076 sides revealed a score of 797. In comparison to USDA grading scales, this average marbling score is equivalent to Slightly Abundant 50 and would be equal to USDA Prime. The yield grade landed at 3 when evaluating the data from these sides and showed a ribeye area of 13.82. These numbers speak volumes for the industry.

If you want to be a part of raising higher quality beef, we invite you to join! Joining is easy—the first step is buying a bull. HeartBrand currently has over 20,000 head on feed across three different states at five feedlots. These calves were bought from producers who purchased one or more HeartBrand Akaushi animals and chose to sell their calves back to us. What are we doing with this many calves on feed? HeartBrand runs the second largest Wagyu beef program in the U.S., and we source our calves from producers who buy HeartBrand Akaushi breeding stock just like the ones offered in this catalog. While we purchase lots of calves from producers, the opportunities with this breed are endless. The calves can be finished out and used to supply any meat program depending on your demand whether that is all-natural, grass fed, grain fed, organic, or even locally raised beef. An Akaushi animal will upgrade any beef program. At the end of the day, we want you to make the highest profit possible on your herd and follow what makes the most sense for you and your family. The progeny from our seedstock will be considered free market trade and there is no obligation to sell your calves back to HeartBrand or for HeartBrand to purchase from you. We welcome you to find the best opportunity to put the most money in your pocket, and we believe you could raise that bar with Akaushi genetics.

Over the past 10 years, we have had the pleasure of watching firsthand the impact Akaushi beef has made on the consumer. Our Akaushi beef program has grown drastically in size because we produce what the customer wants: marbled beef at a decent price. Akaushi beef is served in some of the best restaurants in the country and offered in many retail stores across the U.S. Customers are asking for better quality beef and that's what we are serving. If you agree with today's consumer and want tasty, tender, marbled beef for the future, Akaushi is the breed for you. We look forward to you joining the movement of raising better beef for the future.
